(Fire Marshal)

REPORT OF FIRE ALARM				CITY OF PHILADELPHIA FIRE DEPARTMENT		DATE <u>May 13, 1985</u> F.M. NO.	
CO. NO. <u>L. 24</u>	PLATOON <u>A</u>	BATTALION <u>07</u>	DURATION ☒ FIRE ☐ OPER. ☐ INVEST.			TOTAL (Approximate) <u>6</u> HRS. <u>48</u> MIN.	
FIRE DISPATCHERS REPORT		ENTERED	ALARM #	DURING	1ST ALARM	TIME	
LOCAL #		At Company	<u>593</u>	<u>1985</u>	LOCAL		
BOX #		At Headquarters			BOX	<u>4713</u>	<u>1854</u>
ASSIGNED TO CO. NO.		ON THE	ALARM	FROM BOX	COVERED UP FOR CO. NO.		
LOCATION <u>6221 OSAGE AVE. EXTENDED. SEE E. 57'S REPORTS</u>							
TIME CONSUMED <u>02</u> MIN.		GETTING TO <u>above location</u>		PRESSURE DURING SERV.	HIGHEST	LOWEST	AVERAGE
DELAYED MIN.		CAUSE		HYDRANT	lbs.	lbs.	lbs.
SUCTION ATTACHED FT.OF IN.		HYDRANT LOCATION		PUMP	lbs.	lbs.	lbs.
Reported to <u>977</u> was Ordered by F.C.C. to report						DURATION (Approximate)	
to staging area at Cobbs Creek Pkwy. & Osage Ave.						HRS.	MIN.
						<u>2</u>	<u>30</u>
After which was ordered by D.C. <u>[redacted]</u> to raise our ladder pipe over the houses on Cobbs Creek Pkwy. and to play a stream on the Osage Ave. homes.						b6 b7C	<u>38</u>
Then by Deputy Commissioner <u>[redacted]</u> to proceed with a stakeout team into various homes on the south side of Osage Ave. in an attempt to find positions to stop the spread of fire. We made forcible entry into 6226 & 6246 Osage Ave. and we were going to use these two homes for our positions. We were removed from this area when it was determined that there was still gunfire in that area. At this time there was no fire on the south side.							
Then on orders of Deputy Commissioner <u>[redacted]</u> , we re-entered the area on the south side of Osage Ave. Under the Command of B.C. <u>[redacted]</u> and accompanied by a stakeout team, we stretched a 3½" W.L. up the alley and attached a 3-way, from which we took 2 mobile 2½" W.L.'s. These lines were used in an attempt to stop the spread of fire which was now coming from 6232 Osage Ave. We entered some of the homes to try and stop the fire, but we were forced to move the lines to the Addison St. roof area, where the spread was stopped.						b6 b7C	<u>48</u>
After which was by D.C. <u>[redacted]</u> ordered to Station.

Report of Alarm - Osage Street Residents

This is to advise you that the usual fee charged for reports of alarm should not be levied against any of the residents of the Osage Street area affected by the fire of May 13, 1985. You are justified in not levying this fee since, it is my understanding, that you will be responding to each inquiry via a letter setting forth the circumstances of the fire, rather than the form report of alarm.

8/8/78

Statement of Fr. [] Age [] m/w, []
Payroll [] interviewed inside Hahnemann Hospital, Emergency Room, at 2:05 p.m. b6 b7c

He stated on Tuesday, 8/8/78 at 8 a.m., I reported to work at Engine 5, Plat. "D", 43rd and Market Sts. and was taken by Police van to man a deluge gun at 33rd and Pearl Sts. I manned the right side of the gun, steering it. Just as I got there, the gun was pressurized. I was aiming the gun in a basement window of the "move" compound. Approximately 5 mins. went by; the gun fire started. I don't know from where. That's when I felt my back and my arm and I realized I had been hit. I was frozen at the gun. Someone pulled me down and away. I saw Chief [] come up and try to control the deluge gun. b6 b7c

Q. Did you see anyone throw the window you were aiming the water?

A. No, I didn't see anyone.

Q. Did you see where the shots that caused your injuries came from?

No, I didn't see, but they had to come from the "Move" building from the cellar window, or the window above it.

Q. Do you remember anything else?

A. I remember hearing shots. Then turning and I saw a policeman returning fire. I saw [] (Fire Dept. rescue) trying to control the deluge gun. b6 b7c

Q. Did you see the wounded policeman?

A. No, I didn't.

Injuries to Fr. []:

Shot gun pellets to neck under chin. Lower right arm above wrist. Center right chest. Treated at Hahnemann Hospital by Dr. [] Admitted in satisfactory condition. b6 b7c

Note: Fr. [] running coat turned over to Det. []
[] CDD. Submitted to Police Crime Lab.

Statements by Lt. [] FMO, Det. [] CDD and
Det. [] Homicide.

"MOVE INCIDENT" 309 N. 33rd St.

Statement of [redacted] m/w [redacted]
Engine 5, Plat. "A", interviewed 2nd floor Feinstein Bldg.,
at Hahmenann Hospital, at 11:15 a.m., 8/8/78.

b6
b7c

Q. How long have you been a fireman?

A. 1½ years.

Q. How did you get shot?

A. I was on the deluge gun at 33rd and Pearl Sts., then I
heard shooting and everybody was ducking. I felt a sting
on my 2nd finger, right hand. The doctor [redacted] said
there are 3 shot-gun pellets in my finger.

b6
b7c

Q. Is there anything else you can tell me?

A. No.

Q. Did you see who did the shooting?

A. No, but I think it came from the basement of the "Move"
house.

Q. Did you see anyone else get shot?

A. A lot of guys I was with got shot.

Q. Firemen?

A. Yes.

Q. Anything else you can tell me?

A. No, everything happened so fast.

Statement taken by Lt. [redacted] and Det. [redacted] and
Det. [redacted], Homicide.

b6
b7c

Statement RE: Move Incident

309 North 33rd Street

Prebyterian Hospital, Tuesday, 8/8/78 at 9:50 a.m.

Fr. [redacted] W/m, assigned to Engine 43, "A" Platoon -
stated that he was inside the dwelling with a mobile 2½" water line. They were playing the line through a hole in the floor and we were trying to flood out the basement. I heard shooting and it sounded like to me that it was coming from the basement. The cops drew their guns and directed them toward the cellar steps. We were in between the Police and the cellar when everything seemed to quiet down, then they started to put tear gas into the building. One of the cops then said to try and get outside, that's when we bailed out of the side window on Pearl Street I was the last man out and hit brick or something and twisted my right arm on the debris and that's when I went down. A cop and fireman grabbed me and drug me away from the area. They then put me in a Police wagon and took me to the hospital. I don't know what the number on the wagon was.

b6
b7c

Interview taken by Lt. [redacted]

b6
b7c

8/8/78

Statement of [redacted] m/w, DOB [redacted]
Engine 43, Rescue 7, 21st and Market Sts. interviewed 8/8/78 at
11:11 a.m. inside Homicide Hdqrs. Policeroom.

b6
b7C

On 8/8/78, at approximately 8:05 to 8:10 a.m., while on duty at 33rd and Pearl Sts., I was delivering a message to Car #4 (Chief [redacted]). The Chief was right on the corner of 33rd and Pearl Sts. I delivered the message to the Chief. I was returning to 33rd and Baring Sts. where my unit was parked. I was stopped by a Police Captain. I was told to stay where I was. While there, I assisted Engine 5 with the deluge gun. The gun was shut down for a time. It was being re-charged. I heard a shot, it sounded like it was coming from inside "Move Hdqrs.". When I looked towards Move Hdqrs., I saw a black stake-out cop lying face down on the ground, facing away from the building. The side of his face and shoulder, I believe, his left side below the ear was hit. I was the nearest to him. I ran from behind the wall to drag the officer back. While dragging him back, I felt something hit me in the face, and right arm. I was facing "Move" when I heard a shot that sounded like a shot gun to me. I had my right arm on his neck trying to stop the bleeding and I was dragging him with my left arm. I had the officer lying against the wall and I had my right leg on the base of the deluge gun, and they shot at my legs. I was still facing towards the "Move" Hdqrs. 6 or 7 stake-out cops came and dragged the officer and we took back to the wagon. A couple of firemen pulled me back to the squad. I was in the front and saw the wounded Police Lt. in the back so I went to assist him.

Q. When you got hit, where do you feel the shots came from?

A. I feel they came from the side basement window towards the foot of the house, on the Pearl St. side.

Q. Did you see anyone inside the basement of "Move" Hdqrs.?

A. I saw somebody crawling around in the basement wearing a dark blue shirt, like what Police and Firemen wear.

Statement taken by Lt. [redacted] FMD, Det. [redacted] CDD
and Det. [redacted], Homicide.

MEMORANDUM

File 100-1081
FIRE DEPARTMENT
CITY OF PHILADELPH.

TO : Joseph R. Rizzo, Fire Commissioner
FROM : A.C., Staff Services

DATE March 16, 1978

SUBJECT: FIRE DEPARTMENT PARTICIPATION, OPERATION "MOVE"

*3/22 6:00PM Engine 44 p.m. 203, and
should relief from 6:44 - if not
available must have 7:00 7:45 #3*

Fire Department participation in Operation "MOVE" will be as follows:

b6
b7C

MANPOWER

The on-site commanding officer will be a Deputy Chief. The hours of operations for the detail will be 10 hours for day shift, and the night shift will operate on 7 hour shifts.

Required manpower will include:

- ~~a. Deputy Chief 3/16 - cut 4 B.C.~~
- b. Officer and two men, each pumper
- c. Officer and one man, Giant Deluge
- d. Two EMT II's, Rescue 1M
- e. One operator, F-200

All members will be detailed to Engine 44, the ^{*Deputy Chief*} ~~Deputy Chief~~ will arrange with the Police Commander on the scene for sufficient police wagons to be at Engine 44 to transport personnel to and from the site at 8:00 a.m., 6:00 p.m. and 1:00 a.m. Members on scene of the operation will be assembled at F-200 so that when relief arrives, they will be immediately transported to Engine 44's station, where their tour of duty will end at 8:00 a.m. and 6:00 p.m. The Fire Communications Center will arrange to have any member in need of transportation at 1:00 a.m. back to their station, accommodated.

A separate roll call for each of the three (3) shifts will be maintained by the Deputy Chief in F-200 for all detailed personnel.

Acting men will not be used to replace an officer. Engine 44 will run 1-6 for the duration of this assignment.

To provide required manpower, Driver Training School will be cancelled for Friday, March 17, 1978 (Engine 61 and Engine 41) and on Monday, March 20, 1978 (Engine 20, Engine 18 and Rescue 1M).

COMMUNICATIONS

F-200 will serve as the Fire Department Operations Command Post, located at 33rd and Baring Streets, adjacent to the Police Command Post.

The Deputy Chief in charge of the detail will operate as "^{*Dep.*} ~~Dep.~~ 1X" for all communications. This will allow the regular field divisions to operate as Dep. 1, 2, and 3, as normal.

COMMUNICATIONS

con't

Communications for this detail from on-site to Fire Communications Center will be via the F-2 band. Confidential information will be transmitted via Bell phone, located in the Police Command Post. [redacted] or via [redacted] frequency.

b7E

The following codes will be transmitted to the Fire Communications Center when appropriate:

CODE "YELLOW" - This will be transmitted by the Commanding Officer when overt action is imminent (when tension or activities begin to escalate).

CODE "RED" - This will be transmitted by the Commanding Officer when overt action actually occurs.

Whenever a CODE "YELLOW" or CODE "RED" is received, the Commissioner and both Deputy Commissioners will be notified immediately by the Fire Communications Center.

The Fire Communications Center will inform all companies responding through or into the area, bounded by 32nd St. to 36th St., from Market St. to Spring Garden St., that sirens are not to be used.

AVAILABLE EQUIPMENT

Engine 116 750 G.P.M.
Engine 134 750 G.P.M.
Engine 153 1000 G.P.M.
Engine 157 750 G.P.M.
Engine 143 750 G.P.M.

Giant Deluge

Rescue 1M

F-200

Light Wagon (will be supplied upon request by Commanding Officer on scene as required by Police)

GENERAL

The Commanding Officer will obtain from the officer he is relieving, a current list of all equipment in service.

A record of all activities will be maintained, in addition to a roll call for each shift.

All members will be cautioned not to wander into sterile areas as designated by the Police Department.

The Assistant Chief, FFF, will provide the Police Command Post with a list of Deputy Chiefs assigned to each shift of the detail up to 6:00 p.m., Monday, March 20, 1978, when a re-evaluation will be made of the situation with the Police Department to determine if a further commitment is required.

MEMORANDUM

FIRE DEPARTMENT
CITY OF PHILADELPH

TO : Joseph R. Rizzo, Fire Commissioner
FROM : [REDACTED] A.C., Staff Services
SUBJECT: OPERATION "MOVE"

DATE March 22, 1978

b6
b7C

As per the meeting of March 22, 1978, at 9:00 a.m. in the Commissioner's Office, attended by Deputy Commissioner [REDACTED] Assistant Chief [REDACTED] Deputy Chief [REDACTED] and Deputy Chief [REDACTED] the following actions have been taken regarding Operation "Move".

b6
b7C

1. Driver Training College and Refresher Training have been cancelled for Friday, March 24, 1978. Personnel from the Fire Training College will be utilized to supplement the detail, with the exception of Deputy Chief [REDACTED] who will be detailed to Division 2, and Lt. Britt, who will remain at Fire Training College. Other activities requiring manpower on this date will be reviewed by Chief [REDACTED] to determine if cancellation is necessary to obtain necessary manpower. *3/22/78
Branch informed*
2. The Fire Communications Center has been advised that the Operation "Move" plan, as outlined in the March 16, 1978 memo, will be in effect from 8:00 a.m., Friday, March 24th, to 12:00 midnight, Sunday, March 26th. At this time they will be informed by the working Assistant Chief, FFF, as to whether the full detail will continue or whether the pumpers will be removed, and notification will be required via phone to the assigned companies to return them to the scene in the event of Code "Red" as per memo dated March 20th. *3/22/78
Fire information
ok out to
12 machines
of plan*
3. Inspector [REDACTED] has been contacted and has assured us that he will arrange for police wagons to be at Engine 44 at 8:00 a.m. and 8:00 p.m. to insure that the detail is transported as required.

b6
b7C

Chief [REDACTED] will inform commanding officers to pay particular attention to this and to work out any problem directly with the police commander on the scene prior to each change of shift.

b6
b7C

4. Chief [REDACTED] will arrange to have additional Deluge guns and hose line available on the scene in the event that the police commander requests additional lines to be set-up.

SUBJECT: OPERATION "MOVE"

DATE March 20, 19

b6
b7C

In the event the Fire Communications Center receives an "Operation Red" from F-200 on the scene, the Operations Officer will take the action and make the notifications outlined in this memo.

1. All notifications and dispatches will be made by direct phone call. F-1 or the P.A. system will not be used.
2. Units to be dispatched:
 - a. Assistant Chief, F.F.F.
 - b. Deputy Chief, Div. 12
 - c. B.C. 11 and B.C. 5
 - d. Engines 44, 5, 43, 4 and 16.3M
 - e. Giant Deluge (housed in Engine 44).

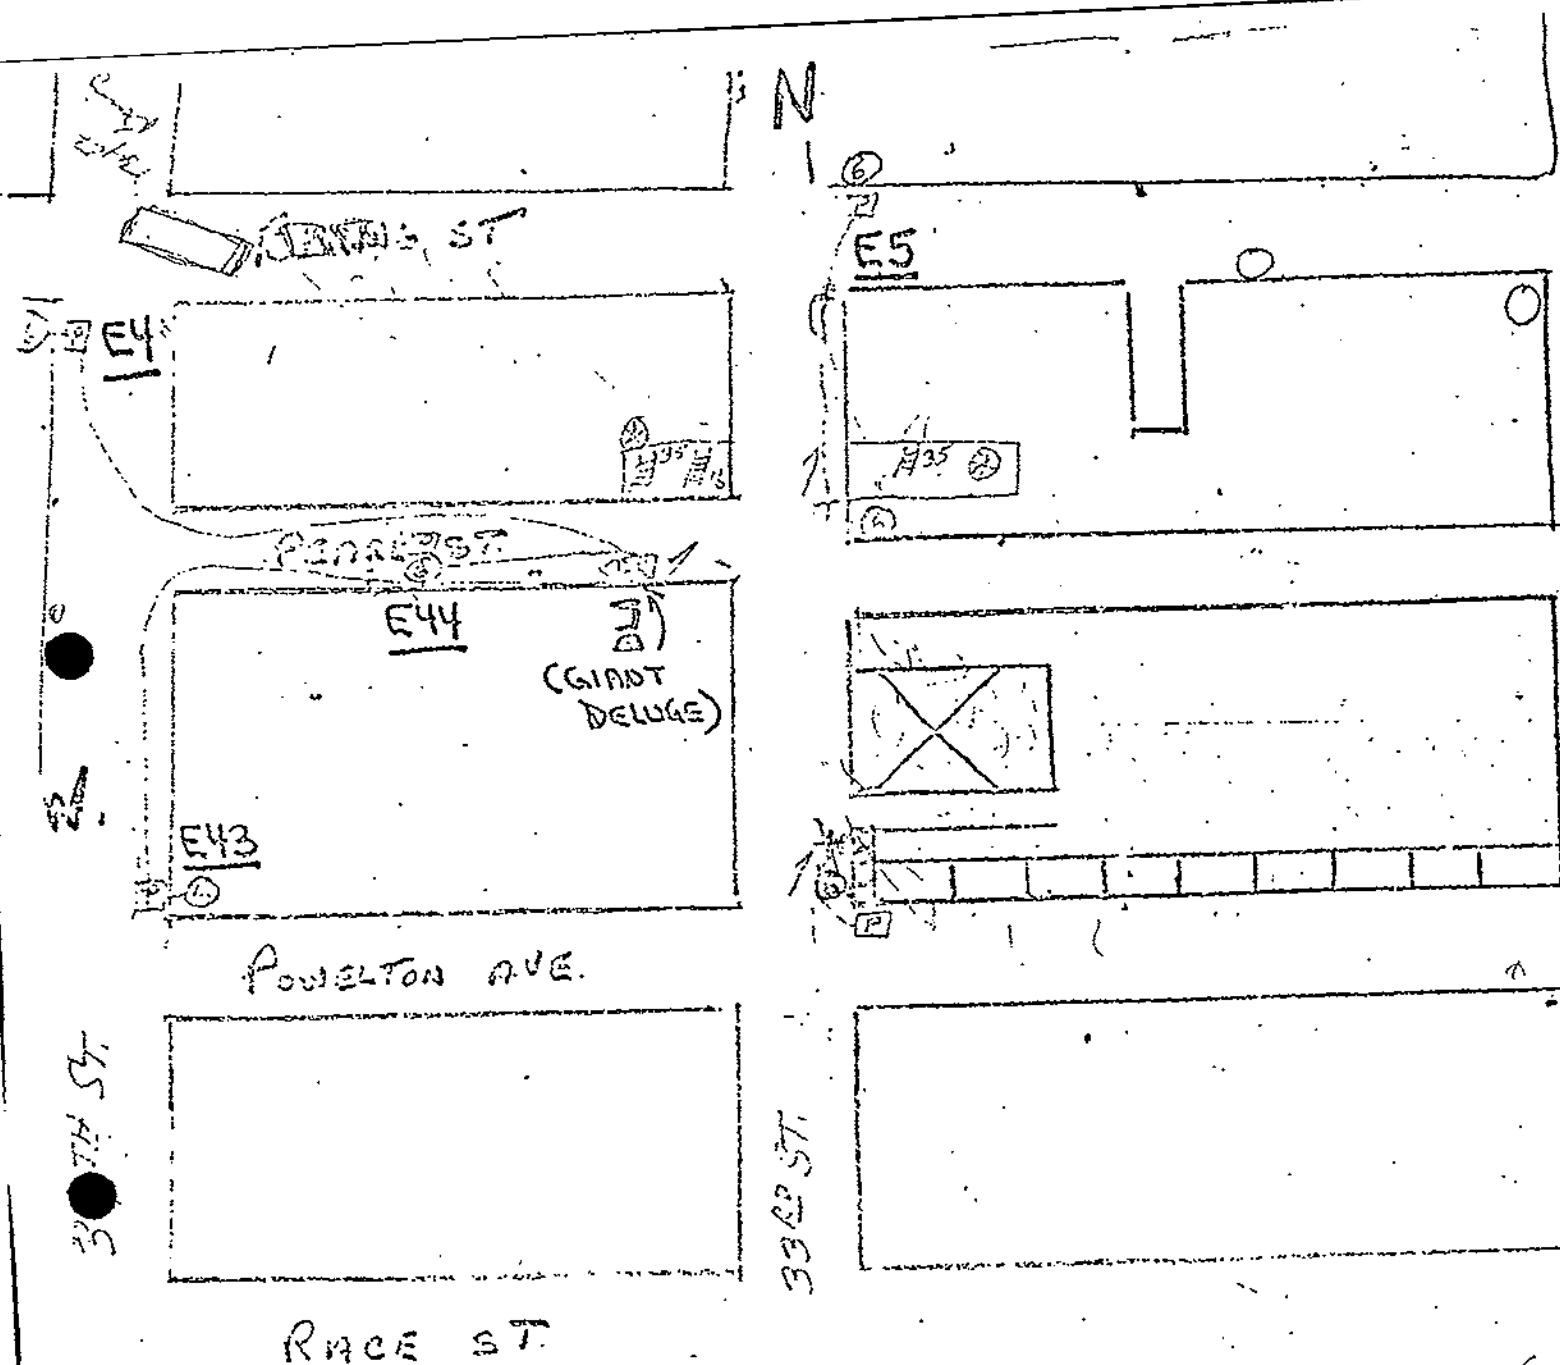

(MICU member present) [REDACTED]

NOTE: If any of these units are out, they will be covered by the next nearest unit and specific instructions as to hydrant locations to be taken will be given to cover-up units.

3. When dispatches are made, engines and the Giant Deluge will take the positions indicated on the attached map.
4. "Operation Red" notification:
 - a. Commissioner
 - b. Deputy Commissioner, F.F.F.
 - c. Deputy Commissioner, F.P.

MEMORANDUM

FIRE DEPARTMENT

CITY OF PHILADELPHIA

TO : Deputies 1, 2 & 3

DATE 3-22-78 ^{b6}
^{b7C}

FROM : Acting Assistant Chief [REDACTED]

SUBJECT: FIRE DEPARTMENT PARTICIPATION IN "OPERATION MOVE"

Effective 8:00 A.M., Friday, March 24, 1978, the detail to "Operation MOVE" will be upgraded to the following:

- (1) Battalion Chief
- (1) Officer and (2) men on each of the (5) Pumpers
- (1) Officer and (1) man for the Giant Deluge
- (2) EMT's for R.1M
- (1) Operator for F200

Division 1 will supply a Battalion Chief, the Officer and (2) men for E.116, the Officer and (1) man for DL1 and the (2) EMT's for R.1M.

Division 2 will supply the Officer and (2) men for E.143 and E.134.

Division 3 will supply the operator for F200 and the Officer and (2) men for E.103 and E.157.

During the course of the expanded detail, members will report to and will be relieved at E.44.

This arrangement will last until midnight Sunday, March 26, 1978, at which time the Police Command will make a decision whether to continue or revert back to the smaller detail.

At 6:00 A.M. on Friday, March 24, 1978, Deputy 1 will see that E.116 is moved to the hydrant in the 3300 block of Pearl Street, E.157 is placed on the hydrant at the NEC of 33rd & Baring Sts., E.103 to the hydrant at the NEC of 34th & Powelton and R.1M is located at the NWC of 33rd & Baring Sts. *DL1 from E44 to 3300 Baring St. Pearl St.*

Deputy 2 will ensure that E.134 is placed on the hydrant at the SWC of 34th & Baring Sts. This will allow enough time for the drivers of this apparatus to return to their companies by 8:00 A.M.

NOTE: The detail on Friday, March 24, 8:00 A.M., has been partially filled with members from the Fire Training College and Fire Prevention Division. Therefore, Deputy 1 will supply (1) man for E.116 and (2) EMT's. Deputy 2 will supply (1) man for E.143 and (1) man for E.134. Deputy 3 will supply (1) man for F200 and (1) man for E.103.

[REDACTED] Ast. Asst. Chief

FIRE DEPARTMENT
CITY OF PHILADELPHIA

TO : [REDACTED] Assistant Chief
FROM : [REDACTED] Deputy Chief WR
SUBJECT: MOVE

DATE 8-4-78

b6
b7c

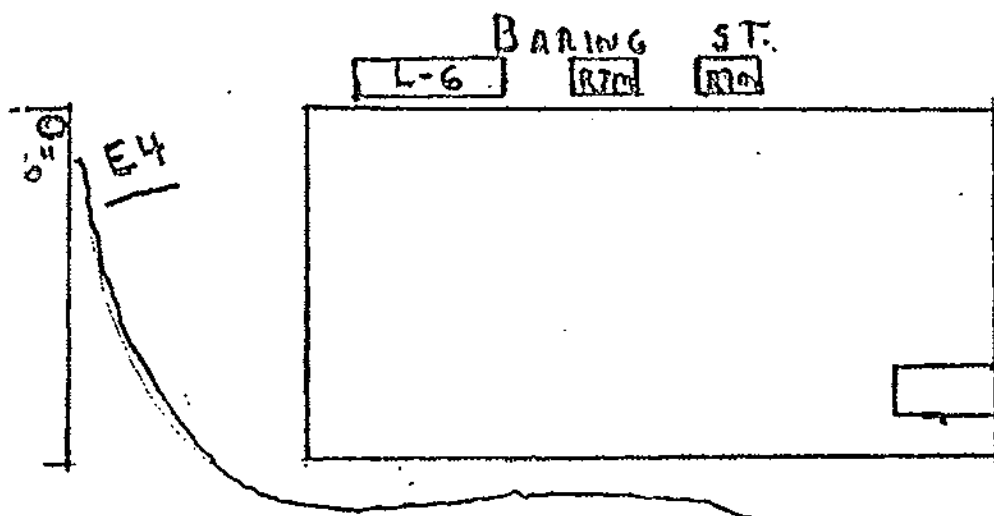

1. The Assistant Chief, FFF will meet Inspector [REDACTED] Police Department, at 34th and Baring Streets, 4:30 AM, on date to be scheduled. When the operation is to begin the Assistant Chief, FFF will notify the Fire Communications Center to dispatch the companies via fire phone. (PA and F-1 is not to be used.)
2. The following units will be utilized for this operation:

Engine 44	Ladder 6
Engine 5	Rescue 7M
Engine 43	Rescue 9M
Engine 4	DL-1
Engine 16	Battalion 11
	Battalion 5

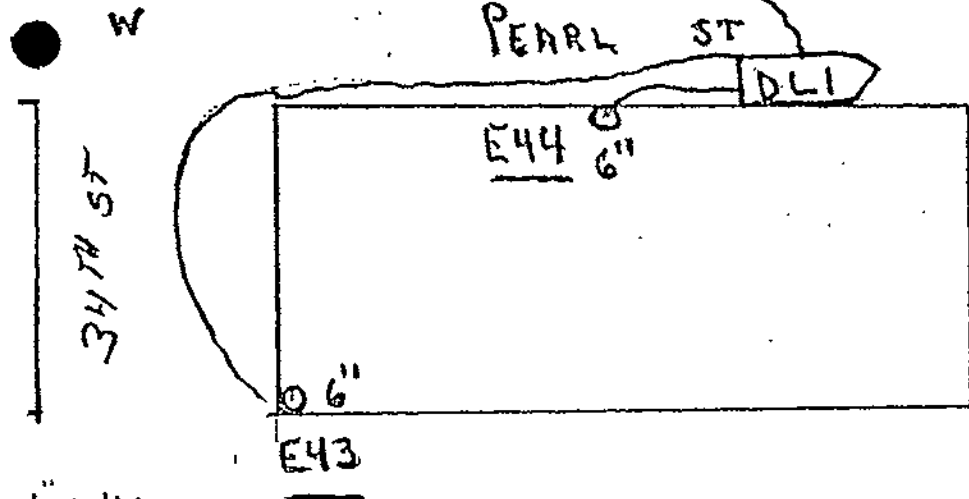

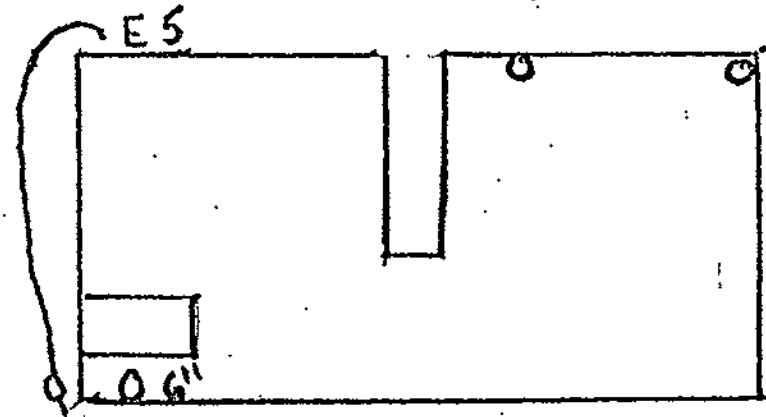

When notified they will proceed to location, 34th and Baring Streets, using no lights or sirens. Specific assignments will be given to them at that time by the Assistant Chief, FFF.

3. Ladder 6 will have four (4) extinguishers, in addition to their own, on board upon arrival. They will also have one set of hose bridges aboard.
4. The FCC will inform any units, other than those assigned to this operation that may respond in the area to use no lights and sirens.
5. The Assistant Chief, FFF will coordinate change of shift activities, if necessary, with Police Inspector [REDACTED] who will have police vehicles on the scene for this purpose. b6 b7c
6. On-site communications will be on the fireground frequency. BC 11 will use "X11" and BC 5 will use "X5".
7. Cover ups during this operation will be coordinated by the Assistant Chief, FFF and Deputy 1.

MOVE

August 14, 1978

Dear Comm. Rizzo,

Enclosed is a copy of an article that I wrote in response to an article that appeared in this morning's Phil. Inquirer. ~~to~~

As a result of the press strike in NYC, our newsdealer has substituted the Phil. Inquirer. Since this was my first contact with the Inquirer but not my first contact with Philadelphia, I found myself surprised and confused by a glaring discrepancy. I had to ask "Which Philadelphia are they talking about?" The image the paper projects and the way I see Philadelphia, as a tourist and through the eyes of other Philadelphians I know are two separate images.

While we in New York are suffering from no press, you in Phil. are suffering from a worse affliction - bad press.

I doubt if my article to the Inquirer will be published, since even faint praise of public officials is not a noticeable preoccupation of the public press. Nevertheless I would like you to know that speaking for myself and for those with whom I have discussed even casually the MOVE incident, the only regrets anyone feels are for the loss of the police officer. The fact remains that a large part of the public knows that police and firefighters are the most high risk - low reward peacetime jobs going. And the only recognition they receive is usually in the form of public recrimination.

I would suggest that if you and the City have no PR firm that you get one. And if you do already have a PR firm - then change it. And start an "I am Proud of Philly" campaign. While you're not the greatest, New York is, - you are a beautiful City and have much to be proud of.

The worst thing about Philadelphia is its own unjustifiably bad publicity.

Sincerely,

[Redacted Signature]

[Redacted] New York.

P.S. I'm sending this letter and the enclosed to you since I don't know the names of any other relevant City officials.

b6
b7C

Believing Bad Publicity

"If we could see ourselves as others see us", applies not only to individuals but to a city as well. Right now it applies directly to Philadelphia. The police action directed at MOVE has put Philadelphia on the front pages. Nothing that Philadelphia has done within the past five years has brought it so much attention, commentary, interest and opinion.

The renaissance and positive improvements that are evident to its citizens and tourist alike, have become obliterated by the reaction to this move against MOVE.

What was an action against an obvious public menace has developed into a reaction of "racism". This reaction has been aided by the apologetic officials and the silence of the public agencies. To many observers the only "racial" factor was that had it been a group of white people the official action would have been swifter, received no publicity and been attributed to a spaced-out, anti-social bunch of groupies.

The media showed "police brutality" - not the dead policeman or the wounded officers who were acting to clean up what literally and figuratively constituted a health hazard to the neighborhood and to the children who were the innocent and unwitting inhabitants of the house.

The results of the action attendant on this scene is viewed by the general public from the perspective of either a "racist" issue or a responsible action. The bad publicity is a consequence of misguided and inappropriate emotion rather than factual and realistic logic.

Nothing better demonstrates the irresponsibility and inaccuracy of emotion than an "issue oriented" article in the 8/14/78 OP-ed page of the Inquirer. Entitled, "Residents now feel sad...", by C. Adcock. In the article the writer states "It does not matter who the victims were." Somehow this is only said when the victims are the Police. The only dead person was a policeman and it does matter to a great many people. The victim was an innocent person killed in the line of duty which to a great many people still means the public protection. It is a gross insult to both the police and the public to state "It does not matter who the victims were."

The writer goes on to say, "Move was like the shed out back where you keep the garden tools or the unfinished attic you keep meaning to fix up." The article writer is described as a "free lance writer" and based on the above quote one would suspect that she is a free lance writer of fiction rather than fact. That address was not a mere physical structure of harmless existence but a stronghold of a group of people with an arsenal of weapons who repeatedly threatened to ~~annihilate~~ annihilate any intruder if they were not allowed to destroy by their presence. Somehow the "tool shed" and "unfinished attic" innocence that seeks to stir our sympathy does not coincide with the facts.

The writer goes on to say, "MOVE was a sign that there was something wrong in our society." How easy it is to put the blame of responsibility on society. Everyone, according to the article writer has, regardless of their degree of anti-social behavior, has rights but only society has responsibility. So-

ciety has through history always had ills. The mechanisms for correction have never been more prevalent than they are at present nor more criticized than they are by the irresponsible "issuists". MOVE was not a symptom of a "sick society" but merely a symptom of a sick group of anti-social individuals.

The writer goes on to say, "Yet black Poweltonians do not seem to have a clear sense of what to do, either. Being angry at police, at high prices and the scarcity of jobs, is about as far as it goes. MOVE was a symbol, an expression of that rage." The reader has to question the reliability of the writer's statements. Her all-inclusive spokesmanship does not carry the weight of authenticity or statistifal investigation. It appears to be her personal opinion projected unquestioningly to a multitude. MOVE was a symbol of a specific group for reasons of their own. The writer appears to speak not only for the general population of Powelton but for MOVE as well. Such self-declared omniscience is not only presumptuous it is insulting to the majority of the residents of ~~residents~~ Powelton and the residents of any community. The "rage" that people feel with authority, high prices and scarcity of jobs is not confined to Powelton. The frustration, disappointments and fear that the majority of people experience does not become manifested in a self-destructive and anti-social "rage". To justify such behavior is the ultimate insult to the injury that human beings everywhere feel and cope with in the context of decent behavior.

"A sense of muted frustration seems to run through Powelton among black and white alike. Good will and endless efforts to

reach a peaceful compromise did not work." At no time does the author indicate that the fact is that the "efforts" were unilateral. To many these one-sided efforts on the behalf of the public agencies were unnecessarily prolonged, indulgent and incomprehensible.

The writer concludes, "We have been kicked out of the Never-Never Land of Good Intentions. But where shall we go and how shall we travel there?" The truth is that we haven't been "kicked out" of anywhere. The "Never-Never Land" of which the writer speaks is the dwelling place of dreamers who preclude reality for anyone. It denigrates all human beings to the low estate of frustration, failure and fear for all time. The "all or nothing" extreme of "all good" or "all bad" blinds itself to reality by placing the blame on the social order that exposes and deals with the bad intentions of some who live in the real world. The anger and frustration of having to face some unpleasant facts of life about "some" people becomes directed at "all" people. Individual rights and public responsibility are not mutually exclusive. You can't separate and direct the anger and blame at "society" and the agencies of society and simultaneously excuse and justify any and all anti-social actions of the individual. That is not only misplaced sympathy but directed anarchy.

What happened in Powelton happens every day all over America. Appropriate agencies to protect and enforce certain basic rules of decency and public safety work daily, quietly without the distortion and notoriety that "issuists" have attached to this incident.

The appropriate agencies and the general public of Philadelphia haven't done anything wrong except perhaps to momentarily believe their own bad publicity created not by the facts but by the emotionality of the "issuists".

JOSEPH R. RIZZO
Commissioner

August 23, 1978

Ms. [REDACTED]
[REDACTED]
New York [REDACTED]
Dear Ms. [REDACTED]

b6
b7C

I would like to take this opportunity to extend to you my personal thanks for your support. It was indeed encouraging to read your letter and article outlining your position on the MOVE incident and the reporting of same by the news media.

Your willingness to state publicly your views and to risk ridicule by some members of the press constitute a type of moral courage which in many cases is hard to find today.

I have forwarded copies of both your letter and article to Mayor Rizzo, who I am certain will be most pleased with your actions. On behalf of Mayor Rizzo, members of his cabinet, Police Commissioner O'Neill, the men and women of the Philadelphia Police and Fire Departments and their families, I offer you our heartfelt gratitude.

Sincerely,

Joseph R. Rizzo
Fire Commissioner

JRR:fp

MEMORANDUM

FIRE DEPARTMENT
CITY OF PHILADELPHIA

TO : Deputy Commissioner [redacted]
FROM : Assistant Chief [redacted]
SUBJECT: "MERIT AWARDS"

DATE 8-13-78 b6
b7C

On the morning of August 8, 1978, I was in charge of the fire-ground at 33rd & Pearl Sts. During this period of fireground activities, I believe all members of Platoon "A" and some early arriving members of Platoon "D", detailed to the fireground, should be entitled to Unit Citations.

I further believe that some members should be cited for individual acts of heroism, but I cannot single out these people because of my own activities during this critical period.

It is my fervent recommendation that the Department conduct interviews of all Fire Personnel on the fireground during the period of approximately 8:00 A.M. until 8:20 A.M. on the date of the fire-ground activities, to ascertain exactly who did what. In my 27 years in the Fire Department, 23 as an Officer, I have never seen a better display of group and individual heroics than I did on that fateful morning. A display of morale where personnel were willing to work with no compensation so they could see this historic occasion through to the end.

I am writing this recommendation on the morning of August 13, 5 full days after that eventful morning. I have had ample time to reflect on, and discuss, these heroics. I have never filed "Merit Award" papers before, but I am convinced there has never been a more valid request.

I spent one year in the U.S. Navy after the war and have never seen any type action, but after discussion with a friend of mine, a two war combat veteran, I am convinced that these men are not only fireground veterans, but combat battleground veterans as well. As brave at the Police were, I must say our personnel, with no experience or means of defending themselves in this type situation, were at least as brave.

There is no doubt that many of our members on this morning encountered the "Grim Reaper" in an eyeball to eyeball confrontation and stared him down.

In fairness to our men, the only way to bring out all heroic acts would be by department interviews.

GENERAL MEMORANDUM #78-99

TO: All Members
REF/AUTHORITY: Fire Commissioner
SUBJECT: MESSAGE FROM THE COMMISSIONER

Attached is a self-explanatory letter from Police Commissioner Joseph F. O'Neill.

The Merit Board is presently in the process of evaluating the actions of various individuals and companies involved in the M.O.V.E. incident and citations will be awarded in the near future.

JOSEPH R. RIZZO, FIRE COMMISSIONER

[redacted]

b6
b7C

CITY OF PHILADELPHIA

MENT
HEADQUARTERS, FRANKLIN SQUARE
PHILADELPHIA, PENNSYLVANIA 19106

JOSEPH F. O'NEILL
Commissioner

August 9, 1978

Commissioner Joseph Rizzo
Philadelphia Fire Department
Fire Headquarters
3rd & Spring Garden Streets
Philadelphia, Pennsylvania 19123

Dear Commissioner Rizzo:

I want to take this opportunity to express both my sincere appreciation and personal commendation to those members of the Philadelphia Fire Department who participated in the recent court mandated police action against the M.O.V.E. organization.

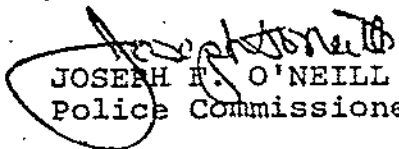

In particular my sentiments are directed to, Assistant Fire Chief [redacted] Fireman [redacted] [redacted], Engine 5; Fireman [redacted] Engine 5; Fireman [redacted] Engine 5; Fireman [redacted] Engine 43 and Fireman [redacted] Engine 43, whose individual acts of bravery and dedication exemplify the high character and courage of the members of the Fire Department, which the public they serve have come to take for granted. It is fervently hoped that their injuries will heal quickly and leave no scars visible or otherwise.

b6
b7C

I am sure that I speak for all the police personnel who witnessed and were part of the incident referred to when I say that it was an honor to serve beside them.

It is tragically unfortunate that the day's events ended as they did. On the other hand, it is just such tragic situations that prove the mettle of the men who so honorably serve the City of Philadelphia in jobs fraught with danger. They are a credit to their profession.

Sincerely,

JOSEPH F. O'NEILL
Police Commissioner

MEMORANDUM

FIRE DEPARTMENT
CITY OF PHILADELPHIA

TO : Deputy Commissioner [redacted]
FROM : Deputy Chief [redacted] Division 1
SUBJECT: MOVE

DATE 8-08-84

b6
b7C

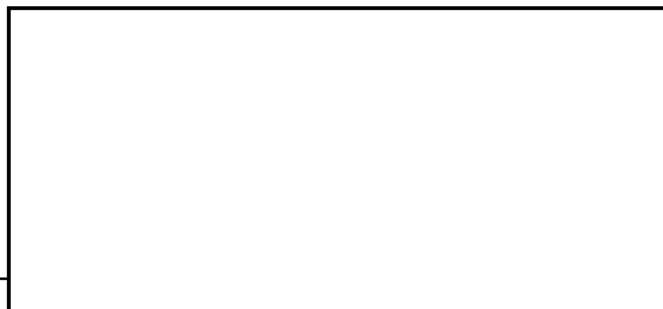

I suggest we cut assignment down to a single Task Force, which will comprise a Battalion Chief, E.43, L.2 and a Paramedic rescue squad (R.9M). This unit will be dedicated to the assignment at 62nd & Osage and quartered at E.57 station.

In the event of an assignment into the area at 62nd & Osage, the Task Force will respond to 62nd & Pine and meet Police Command personnel. Communications will come from Police to the F.C.C. for request of our equipment.

Any additional runs received in the immediate area either rescue or fire-related will be evaluated by Bn. 7 before response of companies to that area. - 6100 and 6200 blocks of Osage, 6100 and 6200 blocks of Addison and 6100 and 6200 blocks of Pine St.

I suggest that we disband E.68 and L.24, Bn.11 and R.19M at 1800 hours on 8/8/84. At that time, E.43, L.2, R.9M and Bn. 7 will relocate to E.57 station and relief will be handled at that location for the "C" Platoon tonite.

As I understand, Police commitment to this assignment will be completed at 0600 hours on Thursday, 8/9/84.

ADMINISTRATIVE BUREAU (continued)

S.P.C.A. truck will report to Staging Area at 0800 hours.

Shall be prepared to transport forty (40), thirty (30) pound bags of sand from Garage to Detail Area should there be a need.

Chief Inspector
Patrol Bureau

b6
b7C

RJM:hj

TRAINING BUREAU

Shall provide six (6) K-9 Units with Supervisor who will report to the Geriatric Center, 63rd and Walnut, in the Parking Lot to Inspector [] at 0600 hours.

b6
b7C

Shall provide Range Supervisor and six (6) Range Officers who will operate two Riot Trucks. These trucks will report to Staging Area, the Geriatric Center, 63rd and Walnut. Supervisor will report to Inspector [] at 0600 hours.

b6
b7C

STAFF SERVICES BUREAU

Shall have R-2 Report at 0600 hours to 6118 Osage Avenue, the Command Center. Should carry approximately fifteen (15) extra Walki-Talkies.

Set up Emergency Reporting Center at 0600 hours and maintain a log of all MOVE operation-related communication.

Shall have Audio Visual Crew report at 0600 hours to Command Center, 6118 Osage Avenue, with equipment to take still and video photographs.

CIVIL AFFAIRS BUREAU

Shall set up a Surveillance, starting at 1600 hours, August 7, 1984, at 6221 Osage Avenue, 5108-10 Pentridge Street and 1630 South 56th Street. Shall be assisted by Detective Bureau.

Shall set up Surveillances at all alleyways, driveways and streets in the immediate area of 6221 Osage Avenue.

ADMINISTRATIVE BUREAU

Shall provide the following equipment which will report at 0600 hours to Staging Area, the Geriatric Center, 63rd and Walnut, to Inspector []

b6
b7C

- 2 - Barricade Trucks (50 barricades each)
- 4 - Step Vans
- 2 - Tow Trucks
- 1 - Mechanical Service Truck
- 5 - J.A.D. Vans

All of above equipment will be operated by personnel assigned to Police Garage.

SPECIAL PATROL BUREAU

TACTICAL DIVISION

Shall designate Special Teams to specific assignments.

Shall arrange for adequate supervision for all Special Teams.

Shall insure that communications are established and operable between Teams and Command committed to mutual tactical assignments.

Arrange for State Police Helicopter to be available should need arise.

TRAFFIC DIVISION

Provide a Detail with supervision to set up a Perimeter Security Force. Sufficient manpower should be deployed to this assignment to insure re-routing of traffic flow away from Security Area and to prohibit any unauthorized entry when Police Commissioner gives order. Foot Traffic personnel will report to Staging Area, the Geriatric Center, 63rd and Walnut, at 0600 hours, to Inspector [REDACTED]

b6
b7C

DETECTIVE BUREAU

Shall assist Civil Affairs Bureau by providing personnel to work with Civil Affairs in maintaining a surveillance detail in areas of 6200 Osage Avenue, 5108-10 Pentridge Street and 1630 South 56th Street. This detail will start at 1600 hours, Tuesday, 8-7-84.

Shall set up a Prisoner Processing Detail at Police Administration Building.

Shall assign a female Sergeant and six (6) female Police Officers from Juvenile Aid Division to report at 0600 hours to Inspector [REDACTED] at the Geriatric and Medical Center, 63rd and Walnut Street, in the Parking Lot.

b6
b7C

Shall arrange to provide to Police Garage four (4), fifteen (15) passenger vans which shall be used to transport police officers from Staging Area to locations within Security Zone.

PHILADELPHIA POLICE DEPARTMENT

OPERATIONS ORDER - M.O.V.E.

WEDNESDAY, 8-8-84

I. COMMAND STRUCTURE

Field Operations Commander - Police Commissioner Gregore Sambor

Assistant Field Commander - Chief Inspector [REDACTED]

Tactical Bureau Commander - Inspector [REDACTED]

Patrol Bureau Commander - Inspector [REDACTED]

b6
b7C

II. GENERAL INFORMATION

Uniform Of Day - All personnel on this operation will have a body armor vest and helmet. All plainclothes personnel will wear an arm band. Lieutenants and above will wear either a blue uniform shirt or wear a dark blue jacket over white shirt.

Reporting Time - 0600 Hours

Communication - This operation will operate on M-Band and 150's, including Traffic Detail.

Staging Area - The Geriatric Center, SEC 63rd and Walnut Street.

Command Center - 6118 Osage Avenue.

D.A.R. Code - Overtime Code 46 to be used; MOVE to be written in the remarks column.

III. RESPONSIBILITIES

PATROL BUREAU

Shall provide fifteen (15) EPW's which shall be used for transportation of prisoners and/or hospital cases. Provide command, supervisors and police officers for a Mobile Reserve Force. All personnel and equipment assigned to this operation will report at 0600 hours to the Geriatric Center, 63rd and Walnut Street. Supervisors will report to Inspector [REDACTED]

CIVIL RIGHTS (A)
OO:PHILADELPHIA

TO: SAC (44A-4393)

On 8/23/85 Assistant Special Agent In Charge (ASAC) [REDACTED] BUREAU OF ALCOHOL, TOBACCO, AND FIREARMS (ATF), Philadelphia, PA, advised their testing of the explosive device used by the PHILADELPHIA POLICE DEPARTMENT (PHPD) in the MOVE incident had determined that the TOVEX component was of the same date shift code as that seized by ATF at JENNINGS LAKE in Evesham Township, NJ, in March, 1985.

b6
b7C

ASAC [REDACTED] also advised he had prepared a written summary of their participation in the MOVE incident. ASAC [REDACTED] stated it had been sent to their headquarters for approval and upon receipt of it, he would provide this document to the FBI...

SUBJECT: PHILADELPHIA SPECIAL INVESTIGATION COMMISSION
SUBPOENA MATTER

Enclosed for FBIHQ is one copy of the Commission's
8/21/85 letter to PH.

The USA, EDPa is being contacted in order to obtain
authorization for the SAs to testify regarding the May 9th
meeting at PHPD Headquarters. This authorization is expected
to be forthcoming.

FBIHQ is requested to consider the new request of the
Commission that SA [REDACTED] be permitted to testify regarding
explosives training.

Mr. John L. Hogan
Special Agent in Charge
Federal Bureau of Investigation
U. S. Department of Justice
Eighth Floor
Federal Office Building
600 Arch Street
Philadelphia, PA 19106

Dear Mr. Hogan:

This is in response to your letter of August 13, 1985, in which you informed me that our request to interview Special Agents [redacted] [redacted] has been approved in principle. You requested that we submit a summary of the testimony sought pursuant to Title 28, Code of Federal Regulations, Section 16.22(c). Please accept this letter as our request for purposes of satisfying the above-mentioned CFR Section.

b6
b7C

As you know, this Commission is investigating the events leading up to and surrounding the May 13, 1985 confrontation between members of the MOVE organization at 6221 Osage Avenue and Philadelphia Police Department personnel. In the course of that investigation, we have learned that representatives of the FBI attended a meeting which we believe occurred on May 9, 1985, conducted by members of the Philadelphia Police Department, at which the plans for the May 13, 1985 confrontation were discussed. We specifically want to interview those Agents present at that meeting concerning their recollection of what was discussed. In addition, we understand that Special Agent [redacted] has participated in various training sessions with members of the Bomb Disposal Unit of the Philadelphia Police Department, most recently the week of May 13, 1985. We would also like to interview Special Agent Macys concerning his contacts with and training of members of the Philadelphia Police Department in the identification and handling of explosives.

Dear Mr. [redacted]

Enclosed is the Philadelphia Special Investigative Commission's (PSIC) request for oral testimony by three Special Agents (SAs). Kindly advise if per 28 CFR, they have your office's authority to testify regarding the May 9th meeting at Philadelphia Police Department Headquarters.

As to the testimony of SA [redacted] regarding explosives training, we are seeking guidance currently from our headquarters.

b6
b7C

Please advise when authorization for the three SAs is granted so we may schedule interviews with the PSIC.

Very truly yours,

MOVE INVESTIGATION

SAC

ATTENTION: ASAC [REDACTED]

b6
b7C

[REDACTED] This memo is submitted at the request of ASAC [REDACTED]

I am a Special Agent [REDACTED] having been designated as such following my training at Redstone Arsenal, Huntsville, Ala., in the [REDACTED]. In that capacity, I have attended innumerable in-services at Quantico related to explosives and I have taught at equally innumerable explosives, police schools in and around our Division and in the Eastern half of the United States.

b6
b7C

I am aware that two questions have arisen concerning explosives as they relate to the MOVE incident: the first is how the PHPD might have obtained the explosive, C4; the second is what training have members of the PHPD Bomb Squad received with respect to "explosive entry".

As to the first, I have had a long and friendly professional association with the PHPD Bomb Squad and in that capacity, I have made every effort to help them do their jobs more efficiently and at a decreased risk to themselves and the public. As an [REDACTED] [REDACTED] I have been involved in several police schools in the past few years as either an instructor or a participant. Obviously, these schools use live explosives as the core of their instruction and upon the conclusion of these schools, which are a week in length, there are always quantities of explosives unused. It is the option of the Bureau personnel running the school to destroy the remaining explosives or give them to police departments that can make use of them. I have, on every available occasion, tried to give the PHPD Bomb Squad whatever explosives I could obtain. I have done this because I know that they have a great deal of difficulty obtaining explosives for use in their work through City of Philadelphia purchasing system and they need the explosives for training and for use in rendering safe suspect or actual explosive devices.

b6
b7C

1-SAC
MEM/vsd
(1)

44A-4393-34
Searched

PH

I would point out; however, that I would never give explosives to a department that I did not know could safely and legally care for them and I would only give them to fully qualified Bomb Technicians who have graduated from the FBI's Bomb Technician School at Huntsville, Ala.,

I have given the PHPD electric and non-electric blasting caps, Tovex, C-4, and detonating cord. I do not recall in what quantities or on what dates I gave them the material, nor did I feel obligated to keep track of the exchanges since it seems logical to give it to them rather than just destroy it. I liken it now to giving them ammunition or tactical support or allowing them to use our electronic equipment, or whatever else we do to help them perform their law enforcement function. The only instance in which I kept specific track of a material exchange was the so-called "Bucks County job" involving NYROB subjects [redacted]. A judge in the matter ordered the explosives to be disposed of. Under the authority of that order, the PHPD and I destroyed the unstable dynamite seized in that search and I gave the blasting caps, detonating cord and Tovex to them for disposal as they saw fit. This material was in perfectly good condition, there was no need to destroy it, and I was aware that the Bomb Squad needed it. However, since it was evidence as opposed to left over material from a police school, I prepared an FD 302 on the action and this is contained in the NYROB file. b6 b7C

As to the second question, I am aware that at least four representatives of the PHPD Bomb Squad attended a one week bomb technician's seminar (school) May 7-11, 1984, at Pomona, NJ. I ran the school and the Bureau's Bomb Data Center did the instructing. Included in that seminar was a series of presentations on explosive entry and explosive breaching. In addition, there was much discussion between all of the officers and Agents present during the week on the explosive entry concept, a newly developing law enforcement tool heavily researched and depended on by the FBI. I am also aware that LIEUTENANT [redacted] attended a [redacted] seminar for a week at Quantico during early 1984 where similar topics were presented at length. b6 b7C

I would also point out here that the bomb disposal community is very close knit. Accordingly, I have had general discussions with LIEUTENANT [redacted] and others on his squad over the last 18 months about explosive entry and breaching and I have helped wherever I could. I have also referred him to other recognized experts in the field, including FBIHQ, for added input. I do not mean to imply, however, that I participated in planning the MOVE assault. To the contrary, b6 b7C

PH

just before the incident, the plan was complete and I had no substantive input. I would also point out here that at no time was I ever requested to supply explosives for the MOVE assault. Nor did I knowingly do so. In fact, at the time of the assault I was again giving a Bureau Bomb Technicians Seminar in Pomona, NJ.

The Philadelphia Office of the Federal Bureau of Investigation (FBI) has been ordered by William Bradford Reynolds, Assistant Attorney General, Civil Rights Division, United States Department of Justice, Washington, DC, to expeditiously conduct a limited civil rights investigation surrounding the eviction of MOVE members from the 6200 block of Osage Avenue, Philadelphia, PA, on May 13, 1985.

So that our office may comply with this direct order, you are requested to provide all reports and documents related to this incident. Assistant Attorney General Reynolds requested the documents be provided to him by August 21, 1985 through the Philadelphia Office of the FBI.

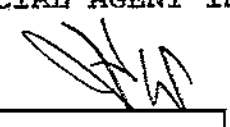

Your cooperation with this request is greatly appreciated.

Please direct all communications in this matter to the attention of Special Agent (SA)

MOVE INVESTIGATION

Examination requested by: Addressee

Reference: Letter dated August 16, 1985

Examination requested: Metallurgy - Mineralogy

Specimens personally delivered by Detective [Redacted]
on September 6, 1985:

Q1 Piece of metal

Q2 Unknown material

Result of examination:

Metallurgical examination of specimen Q1 revealed it to be a fractured, cylindrical portion of a component and is comprised of a plain carbon steel. Characteristics exhibited by the specimen suggest that it was subjected to conditions of high temperature service and that it might have had a layer(s) of reddish primer and/or coating of paint.

Page 1

(over)

This examination has been made with the understanding that the evidence is connected with an official investigation of a criminal matter and that the Laboratory report will be used for official purposes only, related to the investigation or a subsequent criminal prosecution. Authorization cannot be granted for the use of the Laboratory report in connection with a civil proceeding.

WAT:dsd #53 (4)

44A-4393-40

SEARCHED	INDEXED
SERIALIZED	FILED
FBI - PHILADELPHIA	
FBI/DOJ	

It was additionally concluded that specimen Q1 is not a bullet or portion of a bullet. The Laboratory has no information as to the identity of the item which was the source of specimen Q1.

Specimen Q2 is a fragment of a reddish-yellow brick. The circumstances relating to formation of the fractures exhibited by both the brick fragment and the cylindrical piece of metal, and the cause(s) for their presence in the victim, cannot be determined by Laboratory examination of the fragment.

Specimens Q1 and Q2 will be returned to you under separate cover by registered mail.

SAC, (44A-4393)(SQ11)(P)

The Philadelphia Special Investigative Commission hired by Philadelphia Mayor Wilson Goode initiated their televised public hearings concerning the Move incident this date. Philadelphia FBI is unable to video tape these proceedings because of technical problems associated with the Federal building antenna.

SAC, Philadelphia requested Bureau approval for the expenditure of \$1,400 for complete video taping of the Move hearings. Bureau authority was granted per telcall between Philadelphia SSA [REDACTED] and SSA [REDACTED]

b6
b7C

Arrangements have been made with Channel 12 in Philadelphia to provide color, audio and video coverage of the entire hearings which may run for several months.

It is requested that initially \$700 be taken from the case fund allotment to pay Channel 12 and that the remaining \$700 balance be taken out upon completion of the video taping.

It is recommended that payment be authorized as set forth below:

Period Covered:
Services: \$700.00
Expenses: -0-

Amount remaining in account after payment ^{\$}4300.00

IN THE UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF PENNSYLVANIA

FRATERNAL ORDER OF POLICE	:	CIVIL ACTION
LODGE NO. 5, et al.	:	
	:	
v.	:	
	:	
CITY OF PHILADELPHIA, et al.	:	NO. 85-6073

O R D E R

AND NOW, this 23rd day of October, 1985, upon consideration of plaintiffs' motion for preliminary injunction and upon consideration of arguments presented in chambers by counsel, and on the basis of reasons articulated in chambers and preserved on the record, it is ORDERED that the plaintiffs' motion for preliminary injunction is GRANTED to the following extent:

1. Where a witness has the intention of invoking his or her right against self-incrimination, pursuant to the fifth amendment of the United States Constitution, when called to the hearings of the defendant Philadelphia Special Investigation Commission ("MOVE Commission"), and where that intention has been communicated to the MOVE Commission by the witness or by the witness' attorney, the witness shall not be required to appear before the MOVE Commission in a public forum before live television cameras or radio microphones to assert his/her fifth amendment rights. However, the MOVE Commission may note for the record that the witness was called to appear, and either personally or through counsel indicated an intention to invoke his/her constitutional

44A-4393-46

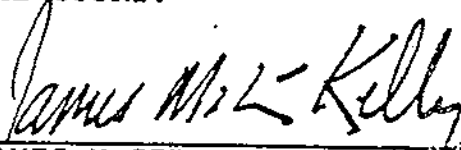

rights against self-incrimination in response to questioning by the MOVE Commission.

2. Nothing in this Order shall be construed as a limitation on the MOVE Commission's authority to call a witness who has indicated an intention to invoke fifth amendment rights before the Commission in a private, nonpublic forum, for the purposes of giving testimony or correcting or amplifying prior testimony.

3. Upon discussion, the parties have clarified the proper nature and scope of the role of witness' attorneys. The parties are bound by their agreement.

4. The parties have agreed that the arguments of counsel and the decision of this court shall constitute a full and final determination of the plaintiffs' motion for a preliminary injunction.

REPLY TO: SAs WAYNE G. DAVIS
ATTN OF: WGD

SUBJECT: MOVE COMMISSION

TO: File (44A-4393)

At approximately 10:00 a.m. this date, 10/24/85, I received authorization telephonically from FBIHQ Supervisor [redacted] to allow SAs [redacted] to testify before the Philadelphia Special Investigation Commission established to investigate the "MOVE" incident.

b6
b7C

This conversation was in response to a telephone call and teletype of yesterday, 10/23/85, in which FBIHQ was advised that the Commission, through the office of the USA, EDPA, had requested the two aforementioned agents and SA [redacted] to testify. Supervisor [redacted] advised that because of other unresolved considerations SA [redacted] is not authorized to testify at this time.

b6
b7C

Supervisor [redacted] advised he would follow up with a written communication confirming this conversation.

I discussed the matter with Principal Legal Advisor [redacted] and at approximately 10:55 a.m. telephonically contacted AUSA [redacted] and advised him of the above. I additionally indicated to [redacted] that it was my understanding and certainly my desire that agents appearing before the Commission be legally represented by staff members of the USA's office. AUSA [redacted] agreed, indicated that he believed USA DENNIS was of the same mind, but that USA DENNIS was out of town at present and this could not be confirmed with him until he returned.

b6
b7C

Above for information.

Attention: [redacted]
Assistant U. S. Attorney

Dear Mr. Dennis:

b6
b7C

The purpose of this communication is to confirm my conversation this date, October 24, 1985, with Assistant U. S. Attorney [redacted], during which I advised him that authority had been granted for Special Agents [redacted] and [redacted] to testify before the Philadelphia Special Investigation Commission. Because of other yet unresolved considerations, no authority has been granted for Special Agent [redacted] to testify.

I also advised Mr. [redacted] that it is my belief and desire that the FBI agents offering testimony should be accompanied and represented by staff members from the U. S. Attorney's Office. Mr. [redacted] agreed, indicated he believed this was your position also, but would confirm this with you upon your return to Philadelphia. I advised Mr. [redacted] that absent information from him or you to the contrary, we would proceed believing appropriate representation will be made available.

Sincerely yours,

WGD

PHILADELPHIA SPECIAL INVESTIGATION COMMISSION

Date of transcription August 6, 1985

At approximately 2:32 p.m. on August 2, 1985, [redacted] Special Investigator of the Philadelphia Special Investigation Commission interviewed Sgt. [redacted] Badge no. [redacted] A [redacted]

Address: [redacted] Phila., PA and telephone: [redacted]

Sgt. [redacted] appeared at 11:00 a.m. for his appointment to be interviewed on the 39th Fl. of 1600 Market. At this time, [redacted] notified this interviewer that Sgt. [redacted] wanted a stenographer or recording of the interview done. This request was relayed to Chief Investigator [redacted] and was taken before the Chairman of the Commission for appropriate action. At approximately 1:06 p.m., Sgt. [redacted] indicated before his attorney that he wished to be interviewed by this interviewer. At this time we went to Rm. 37B where we attempted to conduct the interview. The FOP attorney at this time called and told Sgt. [redacted] not to be interviewed, to hold off for a few minutes, that a discussion was taking place with the Commissioners. Consequently, this interview was also delayed and at 2:32 p.m., the interview was conducted in the presence of the FOP attorney [redacted] an attorney for FOP Lodge 5.

Sgt. [redacted] reports to the [redacted] on a daily basis and that is at [redacted] Phila., PA. His commanding officer is Lt. [redacted]. The Sgt's responsibility at [redacted] is to conduct training of new recruits, in-service training and training of Stakeout personnel for qualification. This is all in the line of firearms training. He also indicated for the record that he is not a certified firearms instructor. He is waiting to be sent to a NRA, National Rifle Association, training school for police firearms instructors.

Sgt. [redacted] stated that on April 30, 1985 he was requested by Commissioner Sabor to attend a meeting at the Police Commissioner's Conference Room in the "Roundhouse". At that meeting, Commissioner Gregory J. Sabor was present along with Deputy Police Commissioner [redacted] Deputy Police Commissioner [redacted] Chief Inspector [redacted] Detective Bureau, Chief Inspector [redacted] Special Patrol; Inspector [redacted] Tactical; Captain [redacted] Major Investigation Division; Captain [redacted] Civil Affairs Unit; Captain [redacted] Stakeout Unit; Lt. [redacted] Stakeout Unit; Detective [redacted] and Detective [redacted] Major Investigation Division Intelligence. Commission Sabor, who chaired the meeting, assigned Sgt. [redacted] to check on the feasibility of the plan that was to be considered in August of 1984 at the MOVE compound, 6221 Osage Avenue. Also assigned to

August 2, 1985

1600 Market St., Phila., PA

August 5, 1985

Date dictated

-2-

the planning to assist Sgt. [] were Lt. [] and Officer []

On May 1, the three officers got together at [] and discussed the 1984 plan. They were unable to find the written operation plans but did find some photographs and some charts of the MOVE compound. They felt at this time that this plan was inoperable and would not suit the compound as it was today, fortified with the bunkers on the roof. The original planner for the operation in 1984 was Sgt. []. He was a sergeant assigned to [] and has since retired.

b6
b7C

On May 2, 1985 at approximately 1400 hours, a meeting was held at the []. The following personnel were in attendance: Inspector [] Tactical Unit; Capt. [] from the Police Academy; Capt. [] from the Stakeout Unit; Lt. [] from the Stakeout Unit; Lt. [] from Major Investigations Division; Sgt. [] from the Police Academy Range; Detectives [] and [] Major Investigations Divisions; Officer [] Bomb Disposal Unit; Officer [] Bomb Disposal Unit; Officer [] and Officer [] Stakeout Unit. The meeting was chaired by Sgt. [] along with Lt. [] and Officer []. Sgt. [] stated that Lt. [] and Officer [] handled the majority of the meeting. They discussed the 1984 plan as they knew it and decided that it was no longer feasible to do this due to the fortification of the MOVE compound, the additional bunkers on the roof and that more additional intelligence and photographs would be needed before any decision could be made on an operational plan.

b6
b7C

On May 3, 1985, Sgt. [], Lt. [] and Officer [] checked the 6200 block of Osage Avenue, especially 6221 Osage the MOVE compound. They stayed in the area for approximately 3 hours at which time they entered 6229 Osage where they were able to go to the second floor and observe the bunkers at a closer view. There were no photographs taken by these men at this time. This was only an intelligence tour of the area. Sgt. [] then stated that he RETURNED TO THE RANGE, AT WHICH TIME HE HANDED OUT SOME WEAPONS and some assignments for weapons to Range personnel. Weapons assigned were uzzi submachine guns, 9 millimeter, Winchester 12 gauge shotguns, M-16 automatic rifle, Thompson submachine gun, 45 caliber, several 30-06 scoped rifles and the two assignments for the 30 caliber, one for the machine gun, tripod mount and the other one a single shot rifle. Sgt. [] was also assigned a 223 rifle with a suppression barrel along with Officer []. THIS WEAPON HAS A SUPPRESSOR WHICH MUFFLES THE SOUND OF THE SHOT IN SOME CASES MAY BE CONSIDERED A SILENCER TYPE WEAPON. SGT. [] STATED THAT THIS WEAPON IS BASICALLY USED TO SHOOT OUT STREET LIGHTS or any other type of clandestine operation that may be needed to be carried out in a silent manner not to disturb or not to alert the individuals inside the building.

b6
b7C

Sgt. [] said that for the next several days he, [] and Officer [] met and discussed the plans for operation MOVE. Some of the plans that they discussed were the use of an armored vehicle. This was rejected because the 223 ammo could pierce the armored vehicle that they have at the Academy. The 223 ammo was used in the 1978 CONFRONTATION IN WHICH MOVE

b6
b7C

members fired a Reuger 14 automatic rifle which fires the 223 ammo. They also discussed placing tear gas chemicals on the roof, being dumped there either by a helicopter or by a crane of some type. This was also found not to be feasible or cost effective. Another consideration was the use of a core drill. This is a large drill that would be used to drill through the front of the building or the walls to make entry into the building. This, again, was turned down because of the equipment being so large and unable to get it down the street for this operation. Sgt. [] said at this time the two plans that they had were (1) the shape charges. These were charges that would be placed on the walls in certain locations on the 2nd floor and basement to the two houses adjoining 6221. They would blow a small hole into the wall and enable the Stakeout officers to use the pepper fog machine. This would pump CS gas into the hole into the building of 6221. The (2) alternative plan was a crane, a large industrial crane which could be maneuvered onto the street with a wrecking ball and either knock the front of the building down or drop the ball into the roof section of the building.

b6
b7C

The interviewer then questioned Sgt. [] in reference to the guidelines that were being set up for this operation. Concerning the training of the response team and the selection of the officers who were going to be placed in the assault teams, he stated that the guidelines were being taken on a training manual set up by the Phila. Police Dept. The title of this manual is "High Risk Patrol Techniques" and they were also taking their guidelines from a direction No. 111 and that is on barricaded persons. Sgt. [] felt that the manual and the directive covered both the hostage situation and the barricaded person in being that the children could become hostages in this confrontation and, of course, there were going to be barricaded persons inside the house. He felt that both of these would be covered in his operational plan. He further stated that no Police Dept. negotiators were ever advised of the plan or requested to submit any ideas they may have to himself or Lt. Powell or Turali to be placed into the operational plan of MOVE. This interviewer informed Sgt. [] that there were 11 certified hostage negotiators who have attended FBI training seminars available within the Police Dept. His statement was that he did not know that and they were not part of the operational plan at all.

b6
b7C

Note: 3:25 p.m., [] the attorney, requested a 10 minute break while he was relieved by attorney [] from his firm.

b6
b7C

At 3:33 p.m., Sgt. [] was accompanied by attorney [] to the interview room where the interview was resumed.

On May 7, 1985 a meeting was held at approximately 1400 hours at the [] Personnel in attendance were: Inspector [], Tactical Unit; Captain [], Stakeout Unit; Lt. [], Major Investigation Division; Sgt. [], Police Academy; Detectives [], Major Investigations Division; Officer [], Bomb Disposal Unit; Officer [], Bomb Disposal Unit; Officer [], Bomb Disposal Unit; Officer [], Stakeout Unit. Chairing the meeting was Sgt. [] along with Lt. [], Bomb Squad and Officer [], Bomb Squad.

b6
b7C

Sgt. [] said the meeting was mostly conducted by [] and [] They discussed the use of explosives, namely shape charges.

These charges would be placed on adjoining walls to the MOVE compound. At that time, gas would be introduced into the building by the use of a federal fogger and that the Fire Dept. would place high pressure squirt guns to place water on the bunkers on the roof. A conversation was also held in reference to using a crane for this operation. This was being taken under advisement and still an option to be used before the final plan. He further stated at this time that none of the other commanding officers who were at the meeting interjected any new ideas or if they disliked the plan at all. They thought the plan on its merits was good.

Sgt. Revel also indicated at this time that even though he was appointed by the Commissioner to head up this planning team that Lt. [] and Officer [] did most of the communications to the other officers at the meetings and they also communicated with Commissioner Sambor on a daily basis about the progress of the operation. Sgt. [] states that he did not contact the Commissioner at all, it was all done through []

He also indicated that no written plans were ever produced or issued to the commanding officers or to the Commissioner at this time. As to the training of the personnel and the selection of the personnel, this was left up to Inspector [] and Captain [] of the Tactical and Stakeout Units and to Lt. [] of the Bomb Disposal Unit. They would pick the men and the assignments they would do and also see that the training was done. This was not part of the operational plan at this time. Although the Sgt. says that they had a 2 week training period at the Academy in which all the members of the entry teams "A" and "B" were up there training in weapons and explosives and offensive and defensive tactics.

Sgt. [] indicated as to the ammunition that was used that day on May 13, the inventory was done by Sgt. [] at the Academy. A running inventory was taken of the ammunition and then later was placed in truck 110 and truck 111 and was taken to the scene on the 13th to be handed out to Stakeout and Range personnel that day. Their records indicate that there were 9,370 rounds of ammunition fired. Their records also indicate that 3,500 rounds of 223 ammo was destroyed in property at 6218 and 6211 during the fire and a case of 9 millimeter jacketed bullets 2,000 rounds were destroyed in 6217. Sgt. [] also indicated that it is possible that some of the ammunition was not returned by the officers or that more of it was lost during THE FIRE. THIS WOULD, OF COURSE, ALTER THE FIGURE OF 9,370 TO A MUCH LOWER figure.

May 8, 1985 Sgt. [] Lt. [] and Officer [] met with Special Agents [] members of the Federal Bureau of Investigation SWAT team out of Philadelphia. The meeting which lasted approximately 40 minutes, the operational plan for the MOVE operation was shown to them and they felt it was a sound plan. After the meeting, Sgt. [] Lt. [] and Officer [] then visited the 6200 block of Osage again for more intelligence information. They stayed there for approximately 3 hours.

On May 9, 1985 a meeting was held at 0900 HOURS at the POLICE COMMISSIONER'S Conference Room in the "Roundhouse", Police Administration Building. In attendance was Police Commissioner Gregore Sambor, Deputy Police Commissioner [] Fire Commissioner William Richmond, Deputy Fire Commissioner [] Inspector [] of the Tactical Unit, Inspector [] of Southwest Police Division, Captain [] of the []

-5-

Captain [], Stakeout Squad; Captain [] Major Investigations; Captain [], Civil Affairs Unit; Detectives [] Major Investigations Division; Special Agents [] FBI SWAT team. Also at the meeting were the members of the planning committee which were Sgt. [] Lt. [] and Officer [].

b6
b7C

There the discussion was held on the evacuation of the people from the area and some of the auxiliary services that would have to be done that day. The crane was at that time found to be an unfeasible operation because the crane could not get down the street, the boom was not big enough to come over the top of Pine Street houses so at this time the crane option was disregarded. Fire Commissioner Richardson stressed that he was not able to use the large deluge gun as preplan, the gun was out of service, that two squirt guns would be used from an extended aerial ladders over the top of the buildings. Fire Commissioner Richardson also stated at that time that he believed that he would be unable to knock the bunkers off the roof as preplanned for three reasons: (1) because of the water pressure in the area, (2) he felt that the bunkers were bolted down and were too heavy for the squirt guns to knock off; and (3) they were too far away from the aerial trucks. He further stated that he felt that the water being played on the roof from the squirt guns would stop any action or would keep any people from coming up on the roof in a defensive position but he stressed to both the commanding officers that were present and to Commissioner Sambor that no firemen will be placed in the line of fire at any time. [] stated at this time the Police Commissioner suggested that bullet proof vests be issued to the firemen that were going to be on the lines near Osage Avenue. The Fire Commissioner declined that stating that his men would not need them because they were not going to be in the line of fire and he wanted it strictly understood.

b6
b7C

The interviewer then asked Sgt. [] if any explosive devices were discussed during that planning session on May 9, 1985. His reply was only the entry teams' shape charges were discussed that they were going to place against the walls on the second floor and the basement of the two adjoining houses to blow small holes into the walls so that the pepper fogger could be placed in there to put CS gas into the top floors and into the basement forcing the occupants of 6221 to the first floor and then to exit the building. He wanted to express at this time that at no time was there any discussion on any explosives being used on the roof or was there any discussion on any explosives being dropped from a helicopter.

b6
b7C

The interviewer then asked if any of the entry teams had in their possession any other type of explosive devices that were going to be used. Sgt. [] stated that the only thing that he knew of were some type of device that they could use to blow out the wall so they could escape if they got trapped in a building and also that he believed that Sgt. [] had stun grenades in his possession. I asked him who manufactured the stun grenades or who made them. He did not know that and said that the Bomb Squad had the responsibility for those pieces of equipment and he had no expertise in that area at all. That would come under Lt. [] jurisdiction.

b6
b7C

Sgt. [] stated that after the conclusion of the meeting, the Commissioner asked all the Deputy Commissioners, the Fire Commissioner and all the commanding officers present if they had any ideas or any reservations at all about the plan and they all stated no, no one had any other ideas or no input into the plan.

-6-

On May 9, 1985 1100 hours, a meeting was held in the Police Commissioner's Conference Room, 8th and Race, Phila. Personnel in attendance: Inspector [redacted] Tactical Unit; Captain [redacted] Stakeout Unit; Sgt. [redacted] Lt. [redacted] Officer [redacted] met with the Police Commissioner, Gregory Sambor. Conversation at this meeting was the positioning of Stakeout teams, the makeup of "A" and "B" entry teams, the type of weapons and explosives that were going to be used and the tactical operational plan. Again, Sgt. [redacted] wanted to indicate that only explosives that were mentioned at any of these meetings or were involved in any of his planning was that of the Bomb Disposal Unit shape charges to be used to blow a small hole in the walls adjoining to 6221 Oage. No other explosives were ever discussed in his presence at any of these meetings or were in his original plan for operation MOVE.

b6
b7C

On Saturday, May 11, 1985, 0800 hours at the Police Commissioner's Conference Room, 8th and Race Streets, Phila., PA. Personnel in attendance: Police Commissioner Sambor, Deputy Police Commissioner [redacted] Deputy Police Commissioner [redacted] Fire Commissioner William Richmond, Deputy Fire Commissioner [redacted] Deputy Fire Chief [redacted] Chief Inspector [redacted] - Special Patrol, Chief Inspector [redacted] - Community Relations Unit, Chief Inspector [redacted] - Training Bureau, Chief Inspector [redacted] - Staff Services, Inspector [redacted] - Tactical Unit, Inspector [redacted] - Detective Bureau, Captain [redacted] - Civil Affairs Unit, Captain [redacted] - Major Investigations Division, Captain [redacted] Stakeout Unit, Lt. [redacted] - Stakeout Unit, Lt. [redacted] - Major Investigations Division, Sgt. [redacted] - Bomb Disposal Unit, Detectives [redacted] and Detective [redacted] - Major Investigations Division, Sgt. [redacted] and Lt. [redacted] and Officer [redacted] were the three planners in attendance to present the final plan to the commanding officers above.

b6
b7C

At this time the plan was put into effect that the evacuation would be completed by 0300 hours on Monday, May 13, 1985. Sgt. [redacted] said that the plan was presented by Lt. [redacted] and Officer [redacted] outlining the water towers to be used onto the bunkers, the tear gas to be used, the shape charges to be placed against the walls of adjoining buildings to introduce gas into the buildings and underlined is under no circumstances were police to assault the MOVE compound. This was repeated several times by [redacted] as well as the Commissioner. Safety of the personnel was first in the Commissioner's mind. All firing of weapons would be directed by Lt. [redacted] from Post 1. No officers will be permitted to fire their weapon at will. Radio communications must be maintained at all times with all posts. This was an order directly stated by the Commissioner. At the end of the meeting, the Commissioner gave his final approval that the plan would then go into effect on Sunday, May 12 and continue into May 13 at which time he would present a statement himself to the MOVE compound for the arrest of the MOVE members.

b6
b7C

On May 12 at 11:00 p.m., Sgt. [redacted] reported for duty at [redacted] where he met with Lt. [redacted] and Officer [redacted] At that time, a briefing was held for all members of the "A" and "B" teams and the Stakeout personnel on the MOVE operation. He then stated they loaded up the trucks T-110 and T-111 along with other Stakeout vehicles and drove to 63rd and Walnut to the Walnut Plaza where he along with Lt. [redacted] and Officer [redacted] met with the Commissioner

b6
b7C

and other command officers inside the location. Officer [REDACTED] stated he was dressed in his dark blue overalls, no insignia or no patch on the rear stating any names, a baseball cap, he was armed with his Smith & Wesson Model 19 4" barrel, 357 magnum, he had 18 rounds of ammunition, 38 police special +p. He was also issued a 222 rifle with suppressor barrel. Sgt. [REDACTED] said after the meeting he was dispatched to 62nd and Pine where he took up his location there in the rear alley behind 6220 Osage.

At this time he had a 150 radio and was able to hear the transmissions that the Commissioner was about to give his ultimatum to the MOVE members. He could hear the Commissioner speaking; he did not know word for word what the statement was. He, at the time, was busy looking down the back alley and on the rooftops for any snipers or any MOVE members who may be in the area moving around. A period of time went by and then he said the water hoses started squirting on the building trying to knock the bunker off of 6221. Within a little while, he heard some shots being fired from the front. To him it sounded like a muffled shotgun. Within a few seconds he said police fire started on the orders of Lt. [REDACTED] of Post 1.

He at no time during this operation fired any weapon. He was a non-shooter. He said at this time tear gas and smoke grenades were tossed into the rear alley to protect the entry teams entering the houses next to the MOVE compound. A short time after that he did hear a 22 caliber firing from the MOVE area. It was a slow fire, probably single action. He was unable to see where it was coming from at this time.

The next thing he recalls is on the 150 radio, he heard [REDACTED] calling saying he was under fire and then a little later on, he was under heavy fire, an officer had been shot in the vest in the area of 6217 Osage in the basement. Sgt. [REDACTED] said that he does recall hearing several explosions in the area. He felt that that was the entry teams blowing holes into the walls to enter the pepper foggers.

The interviewer then asked a direct question if he was still in any supervisory capacity at this time as the planner of the operation. Sgt. [REDACTED] stated that at this time he was not. Once the plan was finalized, his responsibility to that was done. He believes the responsible persons for the operation then became Inspector [REDACTED] and Captain [REDACTED] and lower subordinates in the Stakeout and Bomb Units. He was at no time that day asked for any advice concerning the operations of the MOVE operation. Again he wanted to express that he had no prior knowledge of any explosives that were going to be used in the roof or he dropped from a helicopter for any entry device. It was not in the final adoption of his plan on May 11 or did he hear anything about it on May 12 or 13th up until 5:00 p.m.

Sgt. [REDACTED] then related that around 3:00 p.m. he was at 6200 Pine when Fire Commissioner Richardson approached and told him that a percussion device was going to be dropped onto the roof sometime in the next half hour and it's already been approved.

At this time Sgt. [REDACTED] left 62nd and Pine and walked to the rear alley behind 62nd and Osage. At this time he could see the helicopter flying over and the satchel dropped. There was a very loud explosion. He could see no

fire, very little smoke at this time. Sgt. [] further stated that there was definitely a little confusion at this time. A lot of firemen and policemen were running for cover. He and several other officers were standing by looking to see if anyone would come out of the rear of 6221 Osage. No one appeared. About 15 minutes or 20 minutes went by when they could start seeing heavier smoke and then a little time past that, the fire started on top of the roof.

Note: The time was 4:55 p.m. We took a break for 10 minutes.

At 5:10 p.m. we returned to the interview. Attorney [] Sgt. [] and int he interviewer.

Sgt. [] stated that the next thing he recalls is around 7:30 p.m. he heard Sgt. [] on the radio stating that some MOVE members were coming out of the house into the rear alley. He then heard maybe 4 or 5 members coming out. At this time he was in front of 6222 Pine Street. Sgt. [] said then he heard 3 to 4 shots, sounded like a 22 caliber coming from the alley behind the MOVE compound. At the same time he heard Sgt. [] on the radio saying his Post was under fire and that he also could see one female and [] coming into the driveway. Smoke was thick but he could see several others in the yard. He was unable to give a description of them on the radio. Sgt. [] also wanted to explain that this same time as all this was going on and when the shots were heard in the back alley, that he notified a Fire Lieutenant that was on the street in front of 6222 Pine that he better get his firemen out of the houses that there were shots being fired into them. He said the Lt. went in and withdrew the firemen from the houses at this time. He said he did not see any other officers firing their weapons at this time or did he heard any other weapons fired. He said that he did see Birdie Africa about 15 minutes later coming up the street in a patrol car with JAD officers. He did not see [] at all. He stayed on that Post of 62nd Pine or in that area assisting firemen to evacuate the houses across the street.

In closing remarks, Sgt. [] also stated that in 1978 he was a member of the canine unit and had no contact at all with the Fowelson Village incident. He would like to say at this time that he thought that the plan they put together was a good plan and it would be executed correctly. The only way that they could see to evacuate these people from the MOVE compound was by the use of tear gas. The fortification that they had done to 6221, the only way that could be done was by blowing the small holes in the walls and inserting the federal foggers in to introduce tear gas to the inside of the building. At no time in the planning or in the discussion of the planning was there any discussion about using explosives on the roof or using explosives in any other way other than to blow the shape charges on the wall.

The interviewer then asked Sgt. [] if any of the plans for the 1985 MOVE operation on May 13 were in writing. He stated no. At the time of the operation it was not in writing. It was all verbal and the use of photographs and charts to instruct the officers in their locations and the fortification of the MOVE compound. He said that later, approximately around May 30, Memorial Day, he, Lt. [] and Officer [] sat down and made up the plan in writing as it is today. He said this plan should be available through the Commissioner's office.

-9-

The interviewer also questioned him about the intelligence information that was gathered by the Civil Affairs and the MID Unit. Did he feel this was sufficient intelligence and did they give him complete surveillance reports on who was in the house in the area and what type of equipment or items that were taken into 6221 Osage. The Sgt. said that he did get some photographs which he showed me at this time of large blown up area of the compound, rear and front. He did get some surveillance information. He felt that there was a problem in the communications of this but he would not like to discuss it at this time. He thought that that would be a subject to be handled by the commanding officers of that unit.

This led the interviewer to believe that the communications between MID and Civil Affairs were not being funneled in the correct manner to the planners of this operation. I believe there may be a little rivalry going on between Civil Affairs and MID and the correct surveillance information was not forwarded to the planners of this operation.

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 10/29/85

Special Agent (SA) [] Philadelphia Office of the Federal Bureau of Investigation (FBI) was interviewed regarding any contact he had with Philadelphia, PA, Police Department (PHPD) personnel concerning the MOVE incident other than an official meeting on May 9, 1985.

b6
b7C

SA [] advised that to the best of his recollection and review of available records for that date, he did not have a meeting or conversation on May 8, 1985 with either Sergeant [] Lieutenant [] or Officer [] of the PHPD.

b6
b7C

SA [] advised that to the best of his recollection on May 6, 1985 he attended a regularly scheduled FBI firearms training session at the PHPD range. As SA [] was about to depart the rang, at the conclusion of training, for the day, he was approached by either Officer [] or possibly Lieutenant [] This improptu contact may have been initiated because they probably knew him to be an FBI firearms instructor. One or both of them conveyed words to the effect of, did he (SA []) have a few minutes to discuss a matter with them. No other FBI personnel were there at this contact but there may have been other police personnel. SA [] indicated he had a few minutes and they proceeded to tell him that they were drawing up a plan to evict the occupants of the MOVE house.

b6
b7C

They went inside a range office and displayed several aerial photographs of the MOVE house. SA [] does not remember if an comprehensive tactical plan was explained or visually portrayed. SA [] was advised that the PHPD was planning to make holes in the walls to introduce tear gas as well as placing powdered tear gas on the roof. SA [] told them that he did not think powdered tear gas was a viable option to achieve the results desired by the PHPD. SA [] suggested that using a drill and hole saw would be a method of introducing the tear gas into the house, as an alternative to using any sort of explosive charge to make the hole or holes.

b6
b7C

To the best of SA [] memory no further

details of the PHPD's plan were discussed and no additional comments or suggestions were made by him.

There was no mention of any other explosive devices. This impromptu contact lasted approximately ten minutes and was conducted while the participants stood around a desk.

SA [REDACTED] advised that he cannot recall any conversation with PHPD personnel about the MOVE incident where all three agents, [REDACTED] or himself, were present other than the official meeting on May 9, 1985.

SA [REDACTED] advised that other than the official meeting on May 9, 1985 and this improptu contact on May 6, 1985 he has never had any contact, discussion, or meetings with any PHPD personnel prior to the MOVE incident on May 13, 1985.

b6
b7C

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 10/29/85

Special Agent (SA) [redacted] of Philadelphia Office of the Federal Bureau of Investigation (FBI) was interviewed regarding contact he had with Philadelphia, PA, Police Department (PHPD) personnel concerning the MOVE house, other than the official meeting he attended May 9, 1985.

b6
b7C

He stated there was none.

Specificly, he never attended a meeting May 8, 1985. Anyone who said he did is mistaken and must have been referring to the May 9th meeting.

SA [redacted] stated the May 9th meeting was his only connection with anything relating to PHPD and the MOVE house.

SA [redacted] was not at the PHPD Firearms Range in May until May 15 or May 16, 1985 which was after the May 13th MOVE incident. In the first week of April, 1985 he was involved in SWAT Training at Ft. Indiantown Gap, PA. Members of the PHPD Stakeout Unit were there. The MOVE house was never discussed.

Re Bufacsimile 10/25/85 and Butel call 10/28/85.

Attached are FD 302s reflecting interview of
 SAs [REDACTED] 10/28/85.

The Bureau will note that the Philadelphia Special Investigation Commission's (PSIC) initial interview request letter to SAC, Philadelphia, dated 8/6/85 specifically limited its scope to interviews of SAs as to the 5/9/85 PHPD meeting. The 8/12/85 Butel to Philadelphia authorized interviews of the SAs, limiting their testimony to "their attendance at the meeting of 5/9/85." The issue of other planning meetings, either formal or informal, did not arise until the interviews of SAs [REDACTED] on 9/6/85. The day following these interviews SA [REDACTED] Principal Legal Advisor, contacted PSIC'S chief investigator. [REDACTED] stated that, were SA [REDACTED] authorized per The Code of Federal Regulations, he would, stated that he had participated in one other short discussion regarding MOVE at the PHPD firing range prior to 5/9/85.

Title: UNKNOWN SUBJECTS;
PHILADELPHIA POLICE AND FIRE
DEPARTMENT;
PHILADELPHIA, PA;
MOVE MEMBERS-VICTIMS

Character: CIVIL RIGHTS (A)

Synopsis:

On 10/21/85 [REDACTED] PHILADELPHIA MEDICAL EXAMINERS OFFICE, made available their autopsy report. Judge JAMES MCGIRR KELLY, Eastern District of Pennsylvania (EDPA), Philadelphia, PA, issued an order on 10/23/85 that granted witnesses before the PSIC hearings the right to invoke their Fifth Amendment right against self-incrimination. A copy of that order was retrieved. On 10/25/85 a copy of a letter from [REDACTED] PSIC to Assistant United States Attorney (AUSA) [REDACTED] was forwarded to the Philadelphia Office of the Federal Bureau of Investigation (FBI). Enclosed were the PSIC interviews of FBI Special Agent (SA) [REDACTED]. On 10/28/85 SA [REDACTED] was interviewed and advised he was contacted by Philadelphia Police Department (PHPD) officers on 5/6/85 upon his departure from their range and asked to discuss a matter. At this impromptu contact it was explained to him several aspects of a MOVE eviction plan. SA [REDACTED] made several suggestions. This contact lasted only approximately ten minutes. On 10/28/85 and 10/31/85 SA [REDACTED] was interviewed and advised he has had no conversations with any PHPD personnel concerning the MOVE incident other than the 5/9/85 official meeting. On 10/30/85 SA [REDACTED] Boston Division, was interviewed at FBIHQ and advised he was requested by SA [REDACTED] to provide him with explosives to be given to the PHPD for training purposes. SA [REDACTED] stated he had the authority to do so and gave [REDACTED] approximately 25-40 pounds of C-4. MOVE was not mentioned in the conversation. On 10/31/85 (AUSA) [REDACTED], EDPA, advised no PHPD reports have been received yet and his efforts to retrieve them will continue.

Dear Mr. [redacted]

Request is hereby made to receive testimony from
Special Agents [redacted] of the
Federal Bureau of Investigation at our public hearings.
We anticipate their testimony sometime during the week
of October 28, 1985.

b6
b7C

Our examination of them would concern only those
facts in their possession regarding their participation
in, or attendance at, any meetings, formal or informal,
with members of the Philadelphia Police Department con-
cerning any discussion about, or planning of, the police
department's action at 6221 Osage Avenue, Philadelphia, Pa.,
on May 13, 1985.

Sincerely yours,

[redacted signature box]

PHILADELPHIA SPECIAL INVESTIGATION COMMISSION

Date of transcription September 11, 1985

On September 6, 1985, Chief Investigator [] interviewed [] Special Agent, Federal Bureau of Investigation, at the office of the FBI at 600 Arch Street, who furnished the following information.

b6
b7C

Special Agent ("SA") [] advised that he has been a special agent of the FBI since [] and currently holds the position of []. On May 9, 1985, he was directed by his supervisor, [] to attend a meeting at the Philadelphia Police Headquarters concerning the plan by the Philadelphia Police Department to deal with the MOVE organization, which was occupying a house at 6221 Osage Avenue. He advised that this meeting was held sometime on the morning of May 9, 1985, in a conference room at the Round House on Race Street. There were about 15 people plus or minus 3, present at this meeting. He stated that among the members present was Commissioner Sambor, Lt. [] and Officer [] as those known to him prior to the meeting. The remainder of the people present at this meeting were unknown to him.

b6
b7C

SA [] advised that Commissioner Sambor opened the meeting by stating in general terms that the City of Philadelphia was going to make an effort to serve eviction notices to those people occupying 6221 Osage Avenue and to remove them from that home. He stated that they had legal warrants and that they were going to notify the occupants of this house of their warrants with the expectation that they would come out of the house and surrender.

b6
b7C

Officer [] then explained the general provisions of his plan. During his explanation, he had a drawing of the area and some aerial photographs. He did not have any handout material for those present. [] stressed that the major consideration in the plan was for safety. He explained that they did not want any policemen or firemen injured in this operation, nor did they want any innocent citizens harmed. They talked at length about an evacuation plan which was to take place the day before where they would clear the neighbors from the area prior to any police action. He stated that they mentioned that they would be ready to go by Monday May 13, 1985, but they would not state that that was going to be the specific date of this operation.

b6
b7C

Officer [] during his presentation, covered the construction of the bunker which had been built on the roof and noted for everyone present that during the 1978 confrontation with MOVE they had chain link fencing over the windows and covered that with wooden barricades. He noted that they could anticipate

b6
b7C

Investigation on 9/6/85 at FBI 600 Arch Street

File # 8-1-2

this type of construction on this occasion. He talked of the bunker occupying the high ground on the building and knew that that was an advantage for the MOVE organization. During this presentation, he talked about the disposition and location of the men involved in the operation, but he could not remember exactly what he said other than to note that what he said was logical and made sense to him.

[REDACTED] stated during his presentation that if there was no compliance after the announcement was made, they would attempt to evict them. When discussing the manner of this eviction, Tursi stated that they intended to penetrate one of the walls in an adjacent house and introduce pepper foggers through the holes they would make in the walls. He stated that this discussion concerned only one of the party walls in the house explaining that they felt that one house on the east side of the MOVE house had been unoccupied and they did not know whether MOVE had taken over possession of this house in addition to 6221. He noted that [REDACTED] spoke of introducing gas into the house and also to simultaneously pump large amounts of water on the roof of 6221 stating that the water would neutralize the bunker and would also confuse the occupants of the house. He described the delivery system by which the water was to be delivered as a snorkel truck.

b6
b7C

SA [REDACTED] in response to a direct question, stated that he did not know how they intended to get holes in the walls and recalled Officer [REDACTED] using a term which at the time he did not know what it meant. He also recalled that [REDACTED] spoke of providing an avenue of egress for the people in the house but doesn't remember exactly what he said concerning that.

b6
b7C

SA [REDACTED] stated that at the conclusion of [REDACTED] presentation, Com. Sambor advised that they would all meet again on the following Saturday. There was some general discussion following this meeting with people offering opinions and suggestions, but that he nor the other members from the FBI were not asked to pronounce approval for the plan nor did they give any.

b6
b7C

PHILADELPHIA SPECIAL INVESTIGATION COMMISSION

Date of transcription September 10, 1985

On September 6, 1985, Chief Investigator [redacted] interviewed [redacted] Special Agent, Federal Bureau of Investigation, at the FBI Office at 600 Arch Street, Philadelphia, PA who furnished the following information.

b6
b7C

Special Agent ("SA") [redacted] was asked to furnish his recollections of a meeting that he attended at the Philadelphia Police Department Headquarters on May 9, 1985. His recollections were as follows.

On Thursday, May 9, 1985, SA [redacted] along with SA [redacted] and SA [redacted] were directed by their supervisor, SA [redacted] to attend a meeting at Police Headquarters, which meeting was to finalize plans for a police department action which was to be taken against the MOVE organization. [redacted] advised that when he went to the Round House to attend this meeting, he knew that the meeting was about MOVE. Upon arrival, he observed that there was about 20 people present. He recognized Commissioner Sambor from photographs that he had seen in the newspaper. Aside from Commissioner Sambor, he knew Police-man [redacted] from having dealt with him before. There were one or two other people in the room that he recognized as being Philadelphia Police Department Range Personnel, but the other people present in the room were unknown to him. At the beginning of this meeting, FBI personnel present in the room, were introduced to the other people present at the meeting as members of the FBI SWAT Team, who were going to be present at the meeting to make observations and offer assistance. The Commissioner of the Philadelphia Police Department chaired the meeting and for the first 15 minutes or so, he explained that the Phila. Police Department was going to serve eviction notices on the group of MOVE people who had occupied 6221 Osage Avenue.

b6
b7C

When Commissioner Sambor finished his opening comments, the rest of the meeting was taken up by Officer [redacted] who explained the basic elements of their plan of attack. Officer [redacted] had aerial photographs available which he used in his presentation. SA [redacted] recollection of the presentation made by [redacted] was to the effect that the basic plan was to use high pressure water nozzles to neutralize the bunker on the roof of 6221 Osage. The Commissioner of the Philadelphia Police Department was going to read a statement over the loud-speaker to the members inside the house at 6221 Osage, to advise them of their intention and the legal ramifications involved in this eviction.

b6
b7C

Investigation on 9/6/85 at FBI 600 Arch Street File # 8-1-1

by [redacted]

112

Date dictated

9/6/85

b6
b7C

Another element of the plan as presented by [] was that the Philadelphia Police Department was going to make small holes on either side of the common wall of 6221 Osage Avenue, through which they would administer pepper fogger gas which they expected to cause the members of the MOVE organization inside the house to leave the building. It was explained that the pepper foggers available to the Police Department had been fitted with special nozzles to deliver gas and smoke. [] recalled that they stated that they intended to use shaped charges against the walls in order to make the holes in the walls through which they intended to introduce gas.

b6
b7C

According to [] Officer [] spoke of having someone in the house next door at the present time or that they intended to have a person in the house next door on the following day. He recalls that they spoke of using explosive charges under the stairwell of the house next door to minimize the blast effect caused by these explosions. There was discussion concerning the safety of the occupants of the house and, of course, the general safety factor was discussed regarding the fact that they did not want any harm to either policemen, firemen, or innocent people as a result of this tactical exercise.

b6
b7C

[] explanation of his plan took about 5 or 10 minutes. At the conclusion of his presentation, the floor was opened for comments and suggestions by other members present. [] recalled that someone brought up the practicality of using a heavy crane in order to penetrate the fortifications at the MOVE house and there was some discussion about the lack of feasibility for this plan because the streets were too narrow and they did not have a crane available that was built with protective devices to protect the operator.

b6
b7C

In response to a direct question SA [] stated that when asked for his comment, he remembered requesting where the water nozzles would be placed in order to attempt to remove the bunker with high pressure water hoses.

b6
b7C

SA [] stated that Commissioner Richmond of the Fire Department was not present at this meeting but Commissioner Sambor had indicated that there was another meeting to be held on Saturday and that Commissioner Richmond of the Fire Department was going to be present at this meeting. At the conclusion of this meeting, Commissioner Sambor requested that everybody be back on Saturday for another meeting. SA [] noted that although members of the FBI were asked whether they had any comments concerning the plan, they were not asked to give their approval of their plan nor did they give any such approval.

Title: UNKNOWN SUBJECTS;
PHILADELPHIA POLICE AND FIRE
DEPARTMENT;
PHILADELPHIA, PA;
MOVE MEMBERS-VICTIMS

Character: CIVIL RIGHTS (A)

Synopsis:

On 10/21/85 [REDACTED] PHILADELPHIA MEDICAL EXAMINERS OFFICE, made available their autopsy report. Judge JAMES MCGIRR KELLY, Eastern District of Pennsylvania (EDPA), Philadelphia, PA, issued an order on 10/23/85 that granted witnesses before the PSIC hearings the right to invoke their Fifth Amendment right against self-incrimination. A copy of that order was retrieved. On 10/25/85 a copy of a letter from [REDACTED] PSIC to Assistant United States Attorney (AUSA) [REDACTED] was forwarded to the Philadelphia Office of the Federal Bureau of Investigation (FBI). Enclosed were the PSIC interviews of FBI Special Agent (SA) [REDACTED]. On 10/28/85 SA [REDACTED] was interviewed and advised he was contacted by Philadelphia Police Department (PHPD) officers on 5/6/85 upon his departure from their range and asked to discuss a matter. At this impromptu contact it was explained to him several aspects of a MOVE eviction plan. SA [REDACTED] made several suggestions. This contact lasted only approximately ten minutes. On 10/28/85 and 10/31/85 SA [REDACTED] was interviewed and advised he has had no conversations with any PHPD personnel concerning the MOVE incident other than the 5/9/85 official meeting. On 10/30/85 SA [REDACTED] Boston Division, was interviewed at FBIHQ and advised he was requested by SA [REDACTED] to provide him with explosives to be given to the PHPD for training purposes. SA [REDACTED] stated he had the authority to do so and gave [REDACTED] approximately 25-40 pounds of C-4. MOVE was not mentioned in the conversation. On 10/31/85 (AUSA) [REDACTED], EDPA, advised no PHPD reports have been received yet and his efforts to retrieve them will continue.

The body is that of a well developed, well nourished boy appearing approximately 8 years of age. The body measures 3 feet 9 inches in height and weighs 42 pounds as received with clothing.

CLOTHING: The body is viewed wrapped in a yellow plastic and white paper emergency blanket. Attached to the left ankle is a small plastic bag labeled "footprint-left foot". Attached to the right great toe is a small plastic bag labeled "foot print-right foot".

Lying at the foot of the tray is a pair of pale yellow, zipper front shorts. The shorts are extensively stained with gray to black fire debris, particularly on the back. There is also a burn defect of the fabric in the back of the shorts.

BODY: The body has been previously opened. The lips are sewn together. There is a postmortem incision beneath the chin and across the neck. The head has been disarticulated as has the left shoulder. The chest cage is open. The thoracic organs have been previously removed. There is an incision through the anterior abdominal wall.

The least injured areas of skin, on the anterior abdomen and anterior right thigh, are pale pink-tan. The head is of appropriate size. The loosely wavy medium brown hair is up to 10 inches in length. It is somewhat unkempt and shows evidence of braiding. The right eye is sunken. The left eye is absent. The ears are shrunken by heat. The nose is of average width, and somewhat less prominent than usual. No gross abnormalities of the chest or anterior abdominal wall are appreciated. The genitalia are immature and circumcised. The lower extremities and feet show normal development and no evidence of disease. The back has a normal contour. The upper extremities and hands show no gross evidence of old injury or disease.

IDENTIFYING MARKS AND SCARS

None seen.

EXTERNAL EVIDENCE OF INJURY AND THERAPY

There are thermal burns without evidence of reaction involving the face, anterior chest, posterior chest, legs and arms. There is more black soot on the back of the legs and back of the chest than on the front. Several skin splits are appreciated on the back of the thighs. On the front of the body, multiple areas of red to yellow, almost shiney, postmortem skin slip are appreciated.

There is partial disruption of the scalp with no apparent disruption of the underlying skull. Focally, a thin layer of heat coagulated red blood is present between the skull and scalp.

No clear evidence of ante-mortem injury is seen. No stab wounds or gunshot perforations are appreciated.

INTERNAL EXAMINATION

The muscle of the body is largely pink-tan, firm and cooked. There is an abdominal fat pad averaging 0.3 cm. The ribcage and sternum show no evidence of injury or disease during life.

INTERNAL EVIDENCE OF INJURY AND THERAPY

The organs of the body in general are firm and cooked. The trachea and major bronchi are carefully examined. The trachea has been previously opened. No soot is appreciated.

HEART: The 90 gram red heart has a grossly normal contour. The epicardial surface is smooth. The myocardium is red-tan. The endocardium is smooth. There is coagulated blood present within the atria and aorta. The cardiac valves are grossly unremarkable.

LUNGS: The right lung weighs 95 grams; the left lung weighs 40 grams. They are soft and dark red. The cut surface is dark red. There are no focal lesions seen. The major bronchi show normal development and no evidence of disease.

LIVER: The 410 gram yellow to yellow-pink firm liver has a thin capsule. The cut surface is yellow to yellow-pink. The biliary tree is not dilated. No evidence of old injury or disease is seen.

GALLBLADDER: The thin walled gallbladder contains approximately 5 ml of tan bile. There are no concretions or other lesions.

SPLEEN: The 40 gram light brown spleen has a thin capsule. The cut surface is red and somewhat congested.

PANCREAS: Not identified.

ADRENALS: One adrenal gland has a generally yellow color. Identifiable cortex and medulla is present.

GENITOURINARY TRACT: Each kidney weighs 20 grams. The capsules are thin and strip with ease. The subcapsular surfaces are very finely granular, yellow-pink. The cut surface is yellow to yellow-pink. The cortical medullary ratio is 1 to 3. The medullary rays are preserved. The renal pelvises and ureters are not dilated. The urinary bladder and prostate are not grossly enlarged.

NECK ORGANS: Not identified

GASTROINTESTINAL TRACT: The stomach, small bowel and large intestines are grossly unremarkable on external surface. The stomach is empty.

BRAIN: The brain weighs 1190 grams. At 9:20 A.M., 5/22/85, the skull is viewed. The calvarium is intact. It is carefully washed. No evidence of injury or disease is seen. The dura is shrunk to allow approximately 4 cm between the inner table and the dura. This space is filled with malodorous off-white pasty cooked brain tissue. The dura contains the remaining brain. No gross evidence of malformation, disease or injury is seen. Small, dark red accumulations of coagulated blood are present. They are suggestive of postmortem change. The vascular pattern of the base of the brain is unremarkable. The advanced state of autolysis and heat coagulation precludes more detailed examination.

RADIOGRAPHS: Radiographs are taken. No bullets are seen. No gross evidence of prior injury, disease or malformation is seen.

PHOTOGRAPHS: None additional

SPECIMENS: Tissue specimens are preserved in 10% formalin solution. Specimens of blood, spleen, liver, kidney, bile and muscle are submitted for toxicologic examination.

b7C

MICROSCOPIC EXAMINATION:

Lung sections show alveoli, bronchi and vessels.
Some tissue margins have marked autolysis and
bacterial overgrowth.

No significant soot is seen. Bacterial clumps are
present focally.

No gross evidence of prior injury or disease is seen.

REPORT OF TOXICOLOGIST

#2493

CITY OF PHILADELPHIA
OFFICE OF THE MEDICAL EXAMINER
DEPARTMENT OF PUBLIC HEALTH

Specimens received: 35 gm. LUNG, 22 gm. BLOOD, 90 gm. MUSCLE, 30 gm. SPLEEN,
80 gm. LIVER, 3 ml. BILE, and 40 gm. KIDNEY.

Carbon monoxide (CO) is present in the BLOOD. Quantitation indicates that 3 microliters of CO are present per gram of BLOOD (0.3 ml. CO per 100 gm. of BLOOD).

Cyanide in an amount too low to confirm or quantitate (under 0.01 mg. per 100 gram) was also seen in the BLOOD.

Results of analyses for volatile, extractable, and unextracted organic agents were not remarkable.

No alcohols or opiates were detected.

b6
b7C

Results of carboxyhemoglobin (COHb) analyses from Dr. [REDACTED] laboratory (CHOP) and of CO, iron, COHb, accelerant, nicotine, and cotinine analyses from National Medical Services (NMS) are attached.

The finding by NMS of 4 ppb toluene in the BLOOD is consistent with our (OME) detection limit of 2500 ppb toluene at maximum sensitivity of our procedure and instrumentation.

The CO and COHb results reported by OME, NMS, and CHOP are inconsistent. CO gas was demonstrated when looked for (OME and NMS). COHb was found in one specimen (NMS), but not in another (CHOP).

Since heat has been shown to decrease, but not increase COHb concentrations, it is possible that the necessarily small specimen available to CHOP for analysis represented BLOOD that had entirely lost its CO. CO found by NMS and OME would not have to be bound to hemoglobin. It may have been trapped or adsorbed to nonspecific sites in the desiccated specimens available for analysis.

The quantitative CO gas measurements cannot be directly compared, since one is expressed as percent of specimen (OME) and the other as percent of hemoglobin as calculated from measured iron (NMS).

The results from all three laboratories are consistent with the presence of CO in the BLOOD at the time of death.

Dear [Redacted]:

Enclosed are the results of the hemoglobin (Hb) analysis that we have completed on the samples you recently referred to us. We were able to extract detectable amounts of Hb from all but two of the specimens. The extraction was done by gentle homogenization in 5 mM phosphate-0.5 mM EDTA buffer, pH 7.5. The homogenate was centrifuged and filtered several times to obtain a clear supernatant.

By examination of absorption spectra and careful calculations, we were able to determine the ligand states (CO, oxy, or met) of the original sample and calculate the relative percentages of each.

The results are listed in the attached table. Samples A, C, E, F, and G contained mixtures of CO and met-Hb, in which the heme iron is either in the carbonmonoxy form or the oxidized form. Samples B and III from the bone specimen contained oxy, CO, and met-Hb. Samples H, K, and II from the bone specimen contained predominately oxy-Hb. There was no Hb detected in samples D and I from the bone specimen.

As you can well understand, these samples required much more time, effort, and materials than that are normally expended for our routine Hb determinations. We would, therefore, request a fee of \$50.00 for each of the 12 samples for a total of \$600.00. This payment can be made to the Division of Hematology, The Children's Hospital of Philadelphia and sent to my attention.

We are happy to be of assistance in this matter or need further interpretation, answer any questions concerning these results. If we can be of any help in the future, please contact us at 596-9502.

Yours sincerely,

[Redacted Signature]

The specimens below were received in sealed and labelled head-space vials and were analyzed as follows:

1. Carbon monoxide by headspace gas chromatography/multiple ion monitoring, electron capture mass spectrometry.
2. Iron content by atomic absorption
3. Carboxyhemoglobin (COHb) (qualitative) by derivative spectrophotometry of Wolffbuffer/DMSO extracts
4. Volatile organics ("accelerants") by sparge/trap/purge/gas chromatography/mass spectrometry.
5. Nicotine and cotinine by capillary gas chromatography and by gas chromatography/total ion current mass spectrometry of derivatized, pH controlled extracts.

RESULTS:

Specimen	Amount Received	% COHb (based on iron content)	Toluene(ppb)	Other Alkyl benzenes(ppb)	COHb (qualitative)
6 "Blank" Bloods		2.7 ± 1.6	1.8 ± 0.7	Negative	Negative
A Blood	2486 9.5	17	9	+	Questionable
A Lung	2486 9.1	11	3	+	Questionable
G Blood	2492 1.8	0.6	14	Negative	Negative
I Lung	2485 9.6	Negative	3	Negative	Questionable
E Blood	2488 0.3	33	58	Negative	Positive
A Blood	2487 9.4	8	7	Negative	Negative
A Muscle	2490 9.7	6	3	Negative	Negative

A Fat	2599 9.2	Negative("-3")	1	Negative	Negative
E Blood	2489 9.6	28	12	+	Positive
F Spleen	2491 1.3	3	5	Negative	Questionable
K Blood	2493 3.9	62	4	Negative	Positive
E Blood	2473 10.8	17	5	Negative	Questionable
Marrow from bone					

By nitrogen selective detection, gas chromatographic peaks with the correct retention time of nicotine were found in several specimens. However, capillary gas chromatography/selected ion monitoring mass spectrometry showed that these peaks were not nicotine.

Cotinine was not detected, with a detection limit of 7 nanograms/g for the "blood" specimens and 12 ng/g for the solid tissue specimens.

Other than toluene and other mixed alkyl benzenes, no hydrocarbon-, ester-, ether-, alcohol- or ketone- "accelerants" with boiling points up to 180°C and no decalin were detected with detection limits of 0.3 to 2.5 ppb.

The specimens were received by the specimen custodian, [redacted] kept frozen when not in process in a deep-freeze and analyzed under the direction and by the undersigned and by [redacted]

b6
b7C

The original specimen containers, with such small amounts, if any of unused specimen are being retained in deep-freeze, with a scheduled discard date of December 25, 1985.

Sincerely yours,

[redacted]

Theresa Brooks

The body is that of a well developed, well nourished female. The remains are estimated to have an in-life weight of 150 pounds and an in-life height of 5 feet 5 inches per [REDACTED]

b6
b7c

CLOTHING: The body is received wrapped in several yellow plastic and white paper emergency blankets. Also present on the tray are several plastic bags containing body fragments.

CLOTHING: The clothing is extensively burned and wet with water. It smells strongly of smoke. There is a sleeveless white blouse with a draw string. There is a pair of blue denim shorts. The shorts and blouse are more extensively burned in the back than in the front. There is an intact left shoe. It has a rubber sole and a cloth top. There is a half burned similar right shoe. Beneath the torn lining of the left shoe is chinese lettering. There are dark irregular stripe on light colored panties.

BODY: The least burned skin of the body is present on the anterior right thigh and anterior abdomen. It appears to have a medium brown color. The natural anterior teeth are in fairly good repair. The head is largely disrupted. The breasts are of average size. The abdomen is slightly rounded. The genitalia are mature. No gross evidence of disease is seen on the lower extremities. The back has a normal contour.

IDENTIFYING MARKS AND SCARS

None seen

EXTERNAL EVIDENCE OF INJURY AND THERAPY

The body is extensively covered with gray-black granular fire debris. There is burning involving the head, most of the skull and the complete cranial contents are lost. The head is disrupted. The right shoulder and right side of the back of the chest are disrupted. Fragments of right humerus are preserved.

Separately recovered is a burned right hand. Also present is a burned section of right arm, including the elbow. The left arm is entirely absent beginning at

the shoulder. The left thigh has extensively disrupted soft tissue and the left hip is disarticulated. There are extensive thermal burns of the left lower leg. The right calf is missing. Partially burned fragments of the right foot are present. There are extensive burns of the right side of the back demonstrating broken burned ribs and charred lung in the depths of the burn. There is extensive tissue shredding at the base of the neck and on the left side of the upper chest in the back. No clear evidence of ante-mortem injury is seen. No stab wounds or gunshot perforations are appreciated.

INTERNAL EXAMINATION

The muscle and tissues of the body are firm; they are cooked. No significant free fluid is appreciated in the pleural, peritoneal or pericardial cavities. The organs of the thoracic and abdominal cavities are in the usual anatomic locations. The musculoskeletal system is unremarkable except for evidence of injury and therapy.

INTERNAL EVIDENCE OF INJURY AND THERAPY

None additional

HEART: The 215 gram red-tan heart shows no gross abnormality. It is weighed with contained clotted blood. The coronary arteries have a normal pattern. The myocardium is pink-tan. No gross abnormalities of the cardiac valves are appreciated.

LUNGS: The right lung weighs 255 grams; the left lung weighs 195 grams. The lungs are hard and dark red. They are much smaller than their respective pleural cavities. No pleural adhesions are identified. The cut surface of each lung is dark red. In the right chest in the area of chest wall injury, the lung is dark, red-brown. No focal lesions are appreciated. The pulmonary vasculature is full of post-mortem clotted blood. The major bronchi show normal development. They have thin mucosa. They contain a thin loosely adherent proteinaceous covering. No soot is appreciated, although it is carefully looked for with a hand lens.

LIVER: The 550 gram pink and yellow-pink liver is stoney hard. The cut surface is pink and yellow-pink.

The biliary tree is not dilated. No focal lesions are identified.

GALLBLADDER: The thin walled gallbladder contains less than 1 ml of thick brown bile. There are no concretions or other lesions.

SPLEEN: The 40 gram dark red spleen is stony hard. The cut surface is dark red. No evidence of old injury or disease is seen.

PANCREAS: Not identified

ADRENALS: Not identified

GENITOURINARY TRACT: The right kidney weighs 60 grams; the left kidney weighs 75 grams. The capsules are thin and strip with ease. The subcapsular surfaces are very finely granular, pink. The cut surface is pink. The cortex is distinct from and lighter than the medulla. The cortical medullary ratio is 1 to 3. The medullary rays are preserved. The renal pelvises and ureters are not dilated. The urinary bladder contains approximately 5 ml of pink urine. The only soft (not cooked) tissue in the body is found deep in the pelvis and includes the urinary bladder, uterus and vagina. The vagina, uterus, fallopian tubes and ovaries are mature and unremarkable. The cervical os is small as is the body of the uterus.

NECK ORGANS: The larynx, and trachea show normal development and no evidence of disease. They are filled with coagulated protein.

GASTROINTESTINAL TRACT: The stomach is not identified. The small bowel, appendix and colon show no gross evidence of injury or disease.

BRAIN: Not identified

SPECIMENS: Tissue specimens are preserved in 10% formalin solution. Specimens of bile, urine, liver, blood, muscle and spleen are submitted for toxicological examination.

PJH:mok 5/20/85
per mok 6/17/85

Assistant Medical Examiner

b6
b7c

MICROSCOPIC EXAMINATION:

Lung sections show cooked lung. The alveoli are expanded. Most alveoli contain pink amorphous material. Some bronchi contain similar material. No gross evidence of prior injury or disease is seen.

RADIOGRAPHS:

Radiographs are taken. No bullets are seen. No gross evidence of prior injury, disease or malformation is seen.

REPORT OF TOXICOLOGIST

#2487

CITY OF PHILADELPHIA
OFFICE OF THE MEDICAL EXAMINER
DEPARTMENT OF PUBLIC HEALTH

Specimens received: 100 gm. BLOOD, 80 gm. SPLEEN, 100 gm. MUSCLE,
80 gm. LIVER, 1 ml. BILE, and 2 ml.
URINARY BLADDER WASH.

Carbon monoxide (CO) is present in the BLOOD. Quantitation indicates that 15 microliters of CO are present per gram of BLOOD (1.5 ml. CO per 100 gm. BLOOD).

No cyanide was found in the BLOOD.

Results of analyses for volatile, extractable, and unextracted organic agents were not remarkable.

No alcohols or opiates were detected.

Results of carboxyhemoglobin (COHb) analyses from Dr. laboratory (CHOP) and of CO, iron, COHb, accelerant, nicotine, and cotinine analyses from National Medical Services (NMS) are attached.

b6
b7C

The finding by NMS of 7 ppb toluene in the BLOOD is consistent with our (OME) detection limit of 2500 ppb toluene at maximum sensitivity of our procedure and instrumentation.

The CO and COHb results reported by OME, NMS, and CHOP are inconsistent. CO gas was demonstrated when looked for (OME and NMS). COHb was detected by CHOP, but not by NMS. The quantitative CO measurements cannot be directly compared, since one is expressed as percent of specimen (OME) and the other as percent of hemoglobin as calculated from measured iron (NMS).

The results from all three laboratories confirm the presence of CO.

The specimens below were received in sealed and labelled head-space vials and were analyzed as follows:

1. Carbon monoxide by headspace gas chromatography/multiple ion monitoring, electron capture mass spectrometry.
2. Iron content by atomic absorption
3. Carboxyhemoglobin (CoHb) (qualitative) by derivative spectrophotometry of Wolffbuffer/DMSO extracts
4. Volatile organics ("accelerants") by sparge/trap/purge/gas chromatography/mass spectrometry.
5. Nicotine and cotinine by capillary gas chromatography and by gas chromatography/total ion current mass spectrometry of derivatized, pH controlled extracts.

RESULTS:

Specimen	Amount Received	% COHb (based on iron content)	Toluene(ppb)	Other Alkyl benzenes(ppb)	COHb (qualitative)
6 "Blank" Bloods		2.7 ± 1.6	1.8 ± 0.7	Negative	Negative
A α Blood 2484	9.5	17	9	+	Questionab
A α Lung 2486	9.1	11	3	+	Questionab
G β Blood 2492	1.8	0.6	14	Negative	Negative
I δ Lung 2485	9.6	Negative	3	Negative	Questionab
E x Blood 2488	0.3	33	58	Negative	Positive
B Δ Blood 2487	9.4	8	7	Negative	Negative
D Δ Muscle 2490	9.7	6	3	Negative	Negative
B-λ Muscle 2599	9.7	5	2	Negative	Negative
B-λ Fat 2599	9.2	Negative("-3")	1	Negative	Negative
C E Blood 2489	9.6	28	12	+	Positive
F η Spleen 2491	1.3	3	5	Negative	Questionab
H K Blood 2493	3.9	62	4	Negative	Positive
K-Z Blood 2473	10.8	17	5	Negative	Questionab
Marrow from bone delivered by Dr. Fillinger	1.2	Negative	24 34	Negative	

By nitrogen selective detection, gas chromatographic peaks with the correct retention time of nicotine were found in several specimens. However, capillary gas chromatography/selected ion monitoring mass spectrometry showed that these peaks were not nicotine.

Cotinine was not detected, with a detection limit of 7 nanograms/g for the "blood" specimens and 12 ng/g for the solid tissue specimens.

Other than toluene and other mixed alkyl benzenes, no hydrocarbon-, ester-, ether-, alcohol- or ketone- "accelerants" with boiling points up to 180°C and no decalin were detected with detection limits of 0.3 to 2.5 ppb.

The specimens were received by the specimen custodian, [redacted] kept frozen when not in process in a deep-freeze and analyzed under the direction and by the undersigned and by [redacted]

b6
b7C

The original specimen containers, with such small amounts, if any of unused specimen are being retained in deep-freeze, with a scheduled discard date of December 25, 1985.

Sincerely yours,

[redacted]

REPORT OF TOXICOLOGIST

#2488

CITY OF PHILADELPHIA
OFFICE OF THE MEDICAL EXAMINER
DEPARTMENT OF PUBLIC HEALTH

Specimens received: 2 grams BLOOD from RIGHT ATRIUM.

Carbon monoxide was found in the BLOOD. Quantitation indicates that 20 microliters of carbon monoxide are present per gram of BLOOD (2 ml. CO per 100 gm. BLOOD). Cyanide in an amount too low to confirm or quantitate (under 0.01 mg. per 100 gram) was also seen in the BLOOD.

Results of analyses for volatile and extractable organic agents were not remarkable.

No alcohols or opiates were detected.

Results of carboxyhemoglobin (COHb) analyses from Dr. laboratory (CHOP) and of CO, iron, COHb, accelerant, nicotine, and cotinine analyses from National Medical Services (NMS) are attached. The finding by NMS of 58 ppb toluene in the BLOOD is consistent with our (CME) detection limit of 2500 ppb toluene at maximum sensitivity of our procedure and instrumentation.

The CO and COHb results reported by CME, NMS, and CHOP are consistent because they measure different substances different ways. CO gas was demonstrated when looked for (CME and NMS). COHb was demonstrated when looked for (CHOP and NMS). The quantitative CO gas measurements cannot be directly compared, since one is expressed as percent of specimen (CME) and the other as percent of hemoglobin as calculated from measured iron (NMS).

The results from all three laboratories confirm the presence of COHb in an amount consistent with smoke exposure during a fire.

M.D.

The body of an adult Negro male.

The body is viewed curled into a tight curled position with the knees drawn up against the chest and the heels against the buttock. The arms, neck and head are missing as is the entire posterior aspect of the trunk. The skin over the abdomen and inferior thorax is preserved and a pronounced keloid type hyperpigmented longitudinal scar of the right lower quadrant of the abdomen lies just to the right of the umbilicus and extends inferiorly from that level. The external genitalia are normal, uncircumcised male. The lower extremities show pronounced skin slip. The body is clad in the remains of dark corduroy trousers with a brown belt and a "U" shaped buckle. There is pronounced "washer women" change of the plantar surfaces of the feet.

The internal examination discloses the absence of the appendix. The liver, lungs and heart are "baked". The abdominal viscera are otherwise intact. The posterior aspect of the rib cage is somewhat charred although the vertebral column is readily identified.

EXTRANEOUS MATERIAL

GROUP 1 -A portion of a right foot with a well preserved great toe, 2nd toe and 3rd toe and a portion of the plantar surface and a portion of the dorsum of the foot, all reasonably well preserved.

GROUP 2 -A portion of a right foot containing the heel, plantar surface of the right foot, right and four of the toes including the great toe. The bones of the foot are also present although the dorsum is extensively burned.

GROUP 3 -Resembles the distal 1/2 of a humerus and the proximal 1/3 of a lower arm including the proximal 1/3 of the ulnar and a portion of the humerus with both the distal and proximal ends severely damaged.

GROUP 4 -Is a severely fire damaged remnant of a sneaker containing a portion of the plantar surface of a foot.

GROUP 5 -A series of four ribs.

GROUP 6 -Two small carpals.

GROUP 7 -Distal end of a humerus.

GROUP 8 -Two separated vertebrae are identified.

GROUP 9 -A portion of the right ramus of a mandible which is quite small but shows full dentition.

GROUP 10 -A portion of the left ramus of an human mandible consisting only of an angle of the jaw and the articulatory surfaces.

GROUP 11 -Four other miscellaneous osseous fragments.

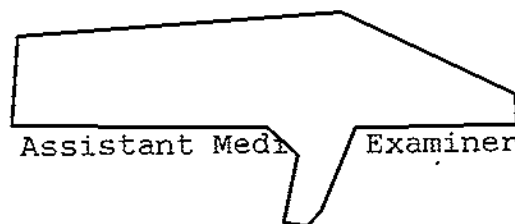

GROUP 12 -Another osseous fragment believed to be animal bone.

GROUP 13 -A dog's paw.

GROUP 14 -Two major fragments of skin.

NOTE: The foot in the sneaker is a left foot.
In addition in this group of material is a partially osseous and partially soft tissue muscular component of a dog's leg.

ADDENDUM: The two vertebrae's described above may well be lumbar vertebraes.

REPORT OF TOXICOLOGIST

#2489

CITY OF PHILADELPHIA
OFFICE OF THE MEDICAL EXAMINER
DEPARTMENT OF PUBLIC HEALTH

Specimens received: 70 grams STOMACH WALL, 100 grams BLOOD, 100 grams LIVER, and 15 grams GALL BLADDER.

Carbon monoxide is present in the BLOOD. Quantitation indicates that 20 microliters of carbon monoxide are present per gram of BLOOD (2 ml. CO per 100 gram BLOOD).

A low level of cyanide (under 0.01 mg. per 100 grams) was found in the BLOOD.

Results of analyses for volatile and extractable organic agents were not remarkable.

No alcohols or opiates were detected.

Results of carboxyhemoglobin (COHb) analyses from Dr. laboratory (CHOP) and of CO, iron, carboxyhemoglobin (COHb), accelerant, nicotine, and cotinine analyses from National Medical Services (NMS) are attached.

b6
b7C

The finding by NMS of 12 ppb toluene and of other alkylbenzenes in the BLOOD is consistent with our (OME) detection limits of 2500 ppb toluene and 3500 ppb xylene at maximum sensitivity of our procedure and instrumentation.

The CO and COHb results reported by OME, NMS, and CHOP are consistent because they measure different substances different ways. CO gas was demonstrated when looked for (OME and NMS). COHb was also demonstrated when looked for (CHOP and NMS). The quantitative differences reflect different assumptions regarding the calculations.

All quantitative procedures indicate exposure of the BLOOD to CO consistent with smoke exposure during a fire.

POSTMORTEM REPORT

CITY OF PHILADELPHIA
OFFICE OF THE MEDICAL EXAMINER
DEPARTMENT OF PUBLIC HEALTH

CASE NO.
2489-(C)

PAGE
1

This unit consists of the following: The anterior aspect of the torso of a young Negro male child extending from the clavicular area inferiorly including the skin across the chest and abdomen as well as a portion of the right pubic area, right hypogastrium, right thigh, right lower leg and disarticulated but still acherent right foot. In addition a second segment of a left thigh is recovered with the body. Along with this segment is a child's kidney and a child's left lung as well as two ribs. Submitted in this group of material but possibly unrelated to this torso is a portion of the face, right frontal area, right parietal and right temporal area including the right ear, the right portion of the scalp, a flattened nose, the orbital areas and the jaws with teeth. Examination of these jaws from the inferior surface discloses the presence of what appear to be uninterrupted third molars. There is further submitted in this group a portion of spinal column, two upper arms, essentially denuded of soft tissue, two lower arms which have approximately 3/4 or 4/5 of soft tissue present, one of these have no hands, the other has a hand present with denudation and charring of the dorsal surface. There is further noted within this group a right hand and a portion of a small hand which may well be a child's right hand and a portion of a wrist with partial charring of the soft tissues of the dorsum of this hand. There is further submitted in this group the remains of a scapula and what appears to be the head of an adult fibula, numerous ribs with other unidentified long bone fragments, another portion of scapula that appears adult in size and a single isolated vertebra. There is further noted a large quantity of charred skeletal muscle and other charred soft tissue.

ADDENDUM TO EXAMINATION OF MOVE C

As previously noted this specimen consist of a portion of a right leg, a portion of the pelvis and a portion of a fairly well preserved right foot as well as a portion of left knee and left lower leg which is detached from the main specimen. The main specimen however, consist of a series of loops of intestine, the pelvis, an uncircumcised immature penis, a portion of the right chest, right flank, right shoulder, vertebral column and neck structures including the tongue and the glottis as well as the trachea. Examining the posterior surface of the torso which is extensively destroyed, the liver is identified as is the right lung and the heart, the trachea is opened. The tongue is split longitudinally. The pharynx, larynx and the trachea show traces of greyish-black deposits. The heart is removed in enbloc and the atria are strikingly distended with brick red baked blood. The right lung is likewise identified and it also has a crumbling baked red appearance. The liver has a yellow clear crumbling consistency. Multiple loops of small bowel are identified as well as the right ileum and the stomach. The stomach is submitted intact for toxicology examination as are specimens of blood from the atria. Portions of the crumbling baked liver are submitted as well as the gallbladder with its content. The right foot is noted to be relatively intact. The plantar surfaces of the great toe, 2nd 3rd and 4th toes are identified.

The specimen consists of a portion of identifiable human tissue measuring 16 inches in length by approximately 6 inches in diameter. The specimen consists of a recognizable portion of the right side of the pelvis and a proximal portion of right femur imbedded in a mass of burned and charred muscle which is covered on one surface by skin and has some black curly hair at one edge consistent with pubic hair. There are two (?) fractures of the pelvis and the femur is fractured at approximately its mid shaft. The estimated age is 20 and the sex is female. On the specimen is a portion of cutoff blue faded dungaree pants having a measurable distance from mid back to mid front of 14 inches giving a waist of approximately 28 inches. The inside portion of the right side pocket appears to have been hand sewn repaired. A portion of muscle and a portion of fat will be taken for toxicologic analysis.

Specimens are preserved in formalin.

REPORT OF TOXICOLOGIST

#2599

CITY OF PHILADELPHIA
OFFICE OF THE MEDICAL EXAMINER
DEPARTMENT OF PUBLIC HEALTH

Specimens received: 75 gm. MUSCLE and 90 gm. FAT.

No carbon monoxide or cyanide was detected in the MUSCLE.

Results of analyses for volatile, extractable, and unextractable organic agents were not remarkable.

No alcohols or opiates were detected.

Results of CO, iron, COHb, accelerant, nicotine, and cotinine analyses from National Medical Services (NMS) are attached.

The finding by NMS of 1 ppb toluene in the MUSCLE is consistent with our (CME) detection limit of 2500 ppb toluene at maximum sensitivity of our procedure and instrumentation.

DEPARTMENT OF PUBLIC HEALTH

Specimens received: 100 gm. LUNG, 50 gm. BLOOD, 60 gm. HEART, 80 gm. BRAIN, 60 gm. LIVER, and 100 gm. KIDNEY.

Carbon monoxide (CO) is present in the BLOOD specimen and in the LUNG specimen. Quantitation indicates that 5 microliters of CO are present per gram of BLOOD specimen (0.5 ml. CO per 100 gram BLOOD). Cyanide in an amount too low to confirm (under 0.01 mg. per 100 gram) was found in the BLOOD.

Results of analyses for volatile, extractable and unextracted organic agents were not remarkable.

No alcohols or opiates were found.

Results of carboxyhemoglobin (COHb) analyses from Dr. [REDACTED] laboratory (CHOP) and of CO, iron, COHb, accelerant, nicotine, and cotinine analyses from National Medical Services (NMS) are attached.

The finding by NMS of 5 ppb toluene in the BLOOD is consistent with our (OME) detection limit of 2500 ppb toluene at maximum sensitivity of our procedure and instrumentation.

The CO and COHb results reported by OME, NMS, and CHOP are inconsistent with each other. CO gas was demonstrated when looked for (OME and NMS). COHb was absent or its presence questionable when it was looked for (CHOP and NMS).

Since heat has been shown to decrease, but not increase COHb concentrations, it is possible that the necessarily small specimen available to CHOP for analysis represented BLOOD that had entirely lost its CO. CO found by NMS and OME would not have to be bound to hemoglobin. It may have been trapped or adsorbed to nonspecific sites in the desiccated specimens available for analysis.

The quantitative CO gas measurements cannot be directly compared, since one is expressed as percent of specimen (OME) and the other as percent of hemoglobin as calculated from measured iron (NMS).

The results from all three laboratories are consistent with the presence of CO in the BLOOD at the time of death.

MANNER OF DEATH									
POSTMORTEM EXAMINATION BY									

The body is that of an extensively burned and charred circumcised adult male measuring 6 ft in length and weighing an estimated 142 pounds with clothing.

The clothing on the body consist of burned and charred cutoff dungaree pants which appear to be blue in color. There are no identifying marks or labels on the pants. Tears and irregularities are noted on the pants. There are no evidences of bullet holes or stab holes in the pants. Received on the feet are soot and debris soiled torn and burned ankle high boots with heavy laces. No distinguishing characteristic features are noted except that the soles of each are partially torn from the bottoms of the boots.

The major portion of the top of the head is devoid of flesh. A portion of scalp is tucked under the back of the head and some short black curly hair is noted which is tied in dread locks. Both ears are present and shrunk. Both eyes are absent. The maxilla and mandible are present, intact and unremarkable with a fairly complete set of upper and lower teeth present. Refer to the dental records for further description. Careful examination of the face and head fails to demonstrate any evidences of injury except as related to the fire. The anterior portion of the neck and upper portion of the thorax has been burned thru. An examination of the structures in this area make evaluation of the larynx and trachea unrewarding because of the extensive heat damage. Portions of the lower abdomen, left groin, and the upper thighs anteriorly are burned thru the skin showing muscle and abdominal viscerae. The lower extremities are intact as is the right arm and hand. The left arm has been amputated at the shoulder and all of the tissues forming the left shoulder region are cooked, burned, and charred. The amputation at the shoulder is infact a complete disarticulation of the humerus. There is no evidence of fracturing or other trauma to the structures that remain. The chest plate is examined. The sternum is fractured 2 1/4 inches below the top. Attached to this is the 1st rib on each side and each clavicle. The ribs and clavicle are intact, not fractured and unremarkable. The sternum is fractured near the distal end. Multiple cartilaginous ends of ribs as well as broken rib ends with burning are present. There is adherent to the undersurface of the sternum red-brown coagulated blood. The umbilicus is identified on a portion of reasonably intact skin over the abdomen. Just to the left of it is an obliquely positioned 3-5/8 x 1/2 inch laceration of the skin penetrating into the subcutaneous tissues. Soot and debris is present in the depths of the injury. An incision across

the injury fails to demonstrate any evidences of hemorrhage or vital reaction. There is no hemorrhagic staining in the area. A section is retained. There is a linear lacerated defect in the skin beginning at the lower thoracic margin in the anterior axillary line on the left side of the chest and extending downward toward the left flank measuring $5\frac{1}{2} \times 2$ inches. An incision across the distal end of this fails to demonstrate any evidences of hemorrhage or vital reaction. Lacerating and torn defects are present in the skin over the anterior aspect of the left thigh, knee and proximal shin. A similar defect is present on the right leg terminating above the knee. Soot and debris covers these areas. The body is opened by making the necessary incisions. Almost completely coagulated lung is present in each pleural cavity. They fall apart on handling. There is a suggestion of a small amount of coagulated blood in the thoracic cavities but this is difficult to evaluate. The heart is identified and appears intact. The upper vascular structures are burned away. Found free in the left upper quadrant is a disk shaped metallic object measuring $1\text{-}3/8$ inches in diameter with a center hub or axle which measures $\frac{1}{2}$ inch in diameter. This is preserved as evidence. The contents of the thoracic cavities are removed. Some coagulated blood is present in each cavity. The rib cage is intact laterally and posteriorly and evaluation of the cavities and ribs is done without difficulty. There is a fracture obliquely across one rib on the left laterally which is estimated to be the 4th rib. There is no burning of the margins of this rib. It is difficult to be certain whether there is any hemorrhage in the area. The remaining ribs both laterally and posteriorly are intact and there are no identifiable holes in the chest wall from approximately the 3rd rib down. Anteriorly evaluation of the cartilages is difficult if not impossible due to fire.

Received separately as specimen #3 is a left arm and hand which includes a reasonable intact hand, a complete humerus, a foreshortened forearm and some muscle surrounding the forearm and extending part way up the upper arm. There is practically no skin present from the wrist up. The humerus is intact. The head of the humerus is completely intact without fractures or injury. There are fractures of both the radius and ulna with burning of the fractured ends. Segments of bones from the fracture sites to the wrist are missing. Examination of the skin which is present shows some irregular defects but there are no evidences of anything that could be construed as a bullet hole. A bent nail is present with this material.

The abdominal viscerae are removed. Some portions of intestine and the kidneys are identified. There is a marked amount of completely burned soot and debris in the right upper quadrant of the abdomen. The left upper quadrant is reasonably intact. Careful examination of the skin over the legs and right arm show multiple burn defects but nothing that could be construed as an identifiable gunshot wound. A bent portion of brittle wire is found in the soft tissues of the right shoulder area. The right humerus is fractured 3-3/4 inches distal to the top. Examination of the fracture site shows no evidence of hemorrhage in the area. Only a small margin of the fractured site is lined. There is moderate irregularity to the fracture end. Examination of the back of the body shows a small amount of scalp over the base and back of the head with moderately long dread locks. The skin over the back of the neck is intact and free of injuries. The skin over the back of the chest, the small of the back, the buttocks, and the back of the entire right leg is intact and unremarkable with the exception of an oblique 2 1/2 x 1/2 inch laceration centered 2 1/2 inches above the small of the back on the left. An incision into the tissues in this area fail to demonstrate any evidences of hemorrhage. There is no burning of the buttocks in an almost circular 9 inch in diameter distribution. The margins of this non-burned area is pink and erythematous. Examination of the back of the left leg shows intact skin. No evidences of gunshot wounds, stab wound or other injuries of that nature can be identified in the back of the body. Examination of the structures on the anterior aspect of the neck shows a completely intact spine. The thoracic and lumbar spine is intact. No injuries are noted.

Examination of the internal organs indicates the heart weight of 470 grams; the liver weight at 1085 grams; and each kidney weighs 115 grams. No injuries to the ventricles, the pulmonary artery or the aorta at their attachment to the heart are noted. Three (3) cross sections demonstrate an intact myocardium, bright red-pink intraventricular blood and some pink-red color to the muscle. The liver is intact with a shrunken gallbladder. Sections across the liver show a coagulated pink-tan parenchyma without focal lesions. The cranial cavity is opened in the usual manner. Extensive amounts of tan coagulated brain are present filling the cranial cavity with a thin layer of hemorrhage adherent to the boney skull on the anterior surfaces of the frontal bones and on the inferior surfaces of the anterior cranial fossa. The brain is removed and portions are preserved for toxicologic analysis. Remaining is a 3 x 4 inch diameter ball of material which on examination is a shrunken dura. The dura is incised and the

contents are intact, otherwise unremarkable coagulated brain.
Examination of the bony skull fails to demonstrate any evidences
of injuries.

5/21/85, 2:50 p.m., one sealed envelope labeled 'evidence' was
released to Det. [REDACTED] of Homicide.

Assistant Medical Examiner

REPORT OF TOXICOLOGIST

#2485

5/15/85

CITY OF PHILADELPHIA
OFFICE OF THE MEDICAL EXAMINER
DEPARTMENT OF PUBLIC HEALTH

Specimens received: 40 gm. LUNG, 3 ml. BLOOD, 80 gm. BRAIN, 40 gm. SPLEEN, 60 gm. LIVER,
5 ml. BILE, and 75 gm. KIDNEY.

No carbon monoxide (CO) or cyanide was found.

Results of analyses for volatile, extractable, and unextracted organic agents were not remarkable.

No alcohols or opiates were found.

No BLOOD was available to submit to other laboratories for analysis.

Results of CO, iron, carboxyhemoglobin, accelerant, and nicotine and cotinine analyses from National Medical Services (NMS) are attached.

The finding by NMS of 3 ppb toluene in the LUNG is consistent with our detection limit of 2500 ppb toluene in the BLOOD at maximum sensitivity of our procedure and instrumentation.

MANNER OF DEATH				
POSTMORTEM EXAMINATION BY				

The body is that of a well developed, well nourished extensively burned and charred female measuring 5 ft 8 inches in length and weighing approximately 121 pounds.

On the body is a dirt soot soiled pair of blue dungaree cutoff pants with some irregular vertical tearing on each side of the front zipper and above the right front pocket. There is a safety pin on the left front belt loop. There is a manufacturers label on the right back pocket which is not legible. No defects such as bullet holes or knife holes are identified. No identification is observed. Also received is a dirt soiled sleeveless pullover type garment with some tears in it. There is no evidence of bullet holes or knife cuts. The garment appears to be dark gray or possibly blue in color. In addition there is a pair of blue 'Olympic' deck type sneakers with the left sneaker tip burned and torn away.

Examination of the body demonstrates extensive thermal burns of many areas with black discoloration and splitting of the skin over the shins, thighs, ankles, feet, thorax, abdomen and arms. The anterior portion of the face and right side of the head are in parts. There is scalp hair attached which has long dread locks. In the cranial cavity is burned rock hard brain. The margins of fracture of the bone show black burning and there is brown heat effect on the outer portions of the skull. The structures forming the anterior aspect of the neck are absent. There are no injuries to the spine consistent with gunshot wounds. The left arm is completely intact. The right arm is in pieces with the humerus as a separate but intact bone. The bones of the forearm are intact. There is marked flexion of the wrist with disarticulation. Each chest cavity contains yellow fatty liquid congeal material. The abdominal viscerae are intact and in place. The pelvic organs are those of a normal adult female with pubic hair. In a plastic bag are burnt portions of bony skull, maxilla, and mandible with teeth. There is much charring of the fracture sites. There is some attached soft tissue. Received with the body is a fecal soiled pair of completely intact underpants. Separate from the body is a portion of hard cook muscle tissue. Examination of the back demonstrates black charring over all portions. The skin is intact from the neck to the heels. There are no gunshot wounds, lacerations, stab wounds or other significant identifiable injuries. Examination of the cervical spine and thoracic spine fail to demonstrate any injuries. There is significant curvature of the thoracic spine. Previous examination of the larynx and bronchi demonstrate significant pulmonary edema with sooty material in the airway. The internal

examination is performed. The heart weighs 215 grams. The right lung weighs 185 grams; the left lung weighs 380 grams. The liver weighs 780 grams. The spleen weighs 145 grams. Each kidney weighs 65 grams. There are no traumatic injuries to any of these organs. There is heat effect to the liver, and it is hard like a rock. The brain tissue is white, granular and falls apart on handling. The skull is examined and no injuries or abnormalities other than as previously noted are found. Examination of the thorax after the viscerae and fluids are removed demonstrates intact ribs laterally and posteriorly without evidences of gunshot wounds, stab wounds, or other significant injuries. The teeth and the attached bone are retained for dental comparison. Specimens are preserved for toxicologic analysis. The gallbladder contains some green-yellow fluid.

CASE FOLDER

69

REPORT OF TOXICOLOGIST

#2486

CITY OF PHILADELPHIA
OFFICE OF THE MEDICAL EXAMINER
DEPARTMENT OF PUBLIC HEALTH

Specimens received: 295 gm. LUNG, 67 gm. BLOOD, 60 gm. HEART, 65 gm. SPLEEN, 60 gm. LIVER, and 70 gm. KIDNEY.

Carbon monoxide (CO) is present in the BLOOD. Quantitation indicates that 80 microliters of CO are present per gram of BLOOD specimen (8 ml. CO per 100 grams of BLOOD).

Results of analyses for volatile, extractable, and unextracted organic agents were not remarkable.

No alcohols or opiates were found.

b6
b7C

Results of carboxyhemoglobin (COHb) analyses from Dr. [REDACTED] laboratory (CHOP) and of CO, iron, COHb, accelerant, nicotine, and cotinine analyses from National Medical Services (NMS) are attached.

The finding by NMS of toluene (at concentrations of 9 ppb and 3 ppb respectively) and of other alkylbenzenes in BLOOD and LUNG is consistent with our (CME) detection limits of 2500 ppb toluene and 3500 ppb xylene isomers at maximum sensitivity of our procedure and instrumentation.

The CO and COHb results reported by CME, NMS, and CHOP are consistent because they measure different substances different ways. CO gas was demonstrated when looked for (CME and NMS). COHb was demonstrated by CHOP and its presence could not be ruled out by NMS. The quantitative CO measurements cannot be directly compared, since one is expressed as percent of specimen (CME) and the other as percent of hemoglobin as calculated from measured iron (NMS).

The results from all three laboratories confirm the presence of CO.

MANNER OF DEATH				
POSTMORTEM EXAMINATION BY				

The remains are in multiple pieces and have been previously examined. The large portion consists of a thorax, abdomen, pelvis and thighs measuring approximately 31½ inches in total length. Over the anterior aspect of the specimen is relatively intact burned and charred and soot soiled skin. The umbilicus is identified. Uncircumcised adult male genitalia with black curly pubic hair is present. A few gray strands are identified. No upper extremities or head are attached. The left lateral portion of the specimen to the pelvis is burned away and burned pelvis and rib ends are visible. The right lateral portion of the specimen is similarly burned away exposing rib ends and pelvis as well as muscle. The back of the specimen is almost completely devoid of muscle except over the lower left thorax in an area measuring 9 x 8½ inches. Extensive amounts of burned muscle and exposed burned bone are noted. Posteriorly on the left are multiple fractured ribs at or near the posterior angle. Some of these show burning while others show no evidence of burning. No evidence of hemorrhage can be identified at these locations. The ends of each femur are obliquely fractured and burned. The fractured margin is relatively clean. Each patella is present just below the fractured femoral shafts. In addition to the main torso are a number of other specimens including a portion of burned skin measuring 8 x 6 inches; a portion of thorax with attached lung and multiple loose ribs; a portion of flat bone consistent with a scapula; loose pieces of muscle; a portion of bone carrying a label 'male left clavicle' and being burned at one end and disarticulated at the other; another portion of muscle; a portion of burned bone labeled 'male left scapula'; a portion of muscle and flat bone consistent with scapula; a portion of muscle with attached ribs; a brown plastic bag with a tag #2 containing a portion of burned extremity; and a portion of animal bone as well as a few pieces of burned tissue and a plastic container carrying the designated labels 'A-maxilla-adult' - 'A-mandible-adult'. This is opened and a burned portion of identifiable maxilla and mandible are present having a number of teeth present in each. These are examined and described by the Forensic Odontologist. The internal organs and loose organs on the table are weighed and examined. There is an adult heart weighing 220 grams and a child's heart weighing 75 grams. A left lung weighs 375 grams; and the right lung weighs 455 grams. The liver weighs 530 grams. The left kidney weighs 70 grams; the right kidney weighs 55 grams. All of the various organs and tissues are hard due to heat effect. No injuries or natural disease are identified.

DEPARTMENT OF PUBLIC HEALTH

Specimens received: 95 gm. LUNG, 7 gm. BLOOD, 50 gm. HEART, 60 gm. SPLEEN,
60 gm. LIVER, and 75 gm. KIDNEY.

Carbon monoxide (CO) is present in the BLOOD. Quantitation indicates that 2 microliters of CO are present per gram of BLOOD specimen (0.2 ml. CO per 100 grams of BLOOD). A low level of cyanide (under 0.01 mg. per 100 ml.) was found in the LIVER, but no cyanide was found in the BLOOD.

Results of analyses for volatile, extractable, and unextracted organic agents were not remarkable.

No alcohols or opiates were detected.

Results of carboxyhemoglobin (COHb) analyses from Dr. [redacted] laboratory (CHOP) and of CO, iron, COHb, accelerant, nicotine, and cotinine analyses from National Medical Services (NMS) are attached.

b6
b7c

The finding by NMS of 5 ppb toluene in the SPLEEN is consistent with our detection limit of 2500 ppb toluene in the BLOOD at maximum sensitivity of our procedure and instrumentation.

The CO and COHb results reported by OME, NMS, and CHOP are consistent because they measure different substances different ways. CO gas was demonstrated when looked for (OME and NMS). COHb was demonstrated by CHOP and its presence could not be ruled out by NMS. The quantitative CO measurements cannot be directly compared, since one is expressed as percent of specimen (OME) and the other as percent of hemoglobin as calculated from measured iron (NMS).

The results from all three laboratories confirm the presence of CO.

MANNER OF DEATH				POSTMORTEM EXAMINATION BY [REDACTED]			

Received in a brown paper bag with the body is a tan and black waist length heavy zipper front jacket with a red lining. The garment is wet, partially burned, torn and otherwise unremarkable. It is returned to the brown paper bag in which it was received.

Received on the body is a cutoff pair of soiled torn and partially burned cutoff dungaree type pants with a label on the right back pocket that says 'Maverick'. In the left back pocket is a torn folded portion of yellow paper material consisting of a portion of an envelope. On it is written some information consistent with a cooking recipe. This is preserved as evidence. The waist of the garment is 34 inches in circumference. No other unusual features are identified and no gunshot holes or other similar defects are noted.

The specimen consists of a headless, armless, trunk disarticulated at the knees with the lower legs and feet separate. All of the material is extensively burned and charred. The external genitalia appears to be a circumcised adult male with dark curly pubic hair. The anterior aspect of the trunk is completely absent with the rib ends being charred and the organs of the thorax and abdomen that remain being completely burned, cooked, black and hard. Some patchy areas of residual intact burned skin are present over the pelvic area, on the lower extremities, and on the left side of the chest. The skin over the back of the chest, over the buttocks and over the back of the legs is intact. There are no injuries that might be associated with gunshot wounds or stab wounds. Laterally and posteriorly the ribs are intact. The organs are removed, identified and weighed. The heart weighs 210 grams; the right lung weighs 510 grams; the left lung weighs 520 grams; the liver weighs 560 grams; the spleen weighs 60 grams and the left kidney weighs 100 grams. The prostate and urinary bladder are identified as are some portions of small intestine. There are no injuries or disease processes identified in these cooked, shrunken, hard structures. Examination of the top of the cervical spine shows charring. Similar charring is present at the ends of each scapula. No clearly identifiable fractures other than the burned ends are noted. Portions of organs are preserved in formalin. Sections of materials are preserved for toxicologic analysis.

Assistant Medical Examiner

RJS/u
5/21/85

b6
b7c

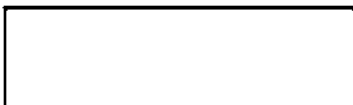

REMARKS: Examination x-rays taken of this material fails to demonstrate any bullets, prosthetic devices, striking congenital deformities, healed fractures or other unique identifying features.

MICROSCOPIC EXAMINATION

Sections of lungs are somewhat fragmented. The alveolae are over expanded and contain a large amount of pink granular amorphous material. There is some interstitial black granular material but a significant amount of this is not identified.

Sections of skin from the left thigh are not helpful in determining if this was a skin donor site.

IDENTIFICATION: No identification is established as of 6/17/85.

REPORT OF TOXICOLOGIST

#2492

CITY OF PHILADELPHIA
OFFICE OF THE MEDICAL EXAMINER
DEPARTMENT OF PUBLIC HEALTH

Specimens received. 45 gm. LUNG, 80 gm. BLOOD, 80 gm. HEART, 45 gm. BRAIN, 70 gm. LIVER, 1 ml. URINARY BLADDER WASHING, and 10 gm. UNIDENTIFIED SPECIMEN.

Cyanide (CN) is present in the BLOOD. Quantitation indicates that 3 microliters of CN are present per gram of BLOOD specimen. (0.8 ml. CN per 100 gm. of BLOOD).

Cyanide in an amount too low to confirm or quantitate (under 0.01 mg. per 100 gram) was also seen in the BLOOD.

Results of analyses for volatile and extractable organic agents were not remarkable.

No alcohols or opiates were found.

Results of carboxyhemoglobin (COHb) analyses from Dr. [REDACTED] laboratory (CHCP) and of CO, iron, COHb, accelerant, nicotine, and cotinine analyses from National Medical Services (NMS) are attached.

The finding by NMS of 14 ppb toluene in the BLOOD is consistent with our (CME) detection limit of 2500 ppb toluene at maximum sensitivity of our procedure and instrumentation.

The CO and COHb results reported by CME, NMS, and CHCP are inconsistent. CO gas was demonstrated when looked for (CME and NMS). COHb was found in one specimen (CHCP), but not in another (NMS).

The quantitative CO gas measurements cannot be directly compared, since one is expressed as percent of specimen (CME) and the other as percent of hemoglobin as calculated from measured iron (NMS).

The results from all three laboratories confirm the presence of CO.

The remains are that of an extensively burned and charred body clothed in a red pair of short pants and a pale tan or white colored undershirt with a label designation of 'Pelican' in it. No gunshot or stab holes are identified. The major portion of the specimen is approximately 2 1/2 ft. in total length and is extensively burned and charred. Identifiable within it are multiple ribs, portions of spine, portions of skull, some hair with medium long dread locks and burned and charred soft tissue. Each scapula is identified and the arms have been disarticulated at the shoulder. Some cooked congealed identifiable brain tissue is present as well as three portions of skull. The basilar portion of the skull is separated at the suture lines. The temporal portion is separated at the suture lines and the superior portion shows both separation at suture lines and burning along non-suture line areas. No gunshot holes or other injuries of that nature are identified in these specimens. Examination of the back of the specimen demonstrates a fairly intact skin with fire change. There is an obliquely positioned ragged, irregular defect on the lower left posterior thorax measuring 4 x 1 inch. Prior examination of these specimens demonstrated the presence of a urinary bladder and a small immature uterus, tubes and ovaries. On this tray with the specimen are multiple portions of various bones and tissues. There is marked curvature of the spine with areas of actual separation. No gunshot or stab wounds are identified. Multiple fragmented fractured bones are present. Some of the ends are burned.

SPECIMENS: Portions of organs and tissue are preserved in formalin. Portions of organs are submitted for toxicologic analysis.

REPORT OF TOXICOLOGIST

#0190

CITY OF PHILADELPHIA
OFFICE OF THE MEDICAL EXAMINER
DEPARTMENT OF PUBLIC HEALTH

Specimens received: 3 gm. BLOOD, 40 gm. LUNG, 125 gm. MUSCLE, and
2 pieces of BONE.

No carbon monoxide (CO) and no cyanide was detected by the CME
in the BLOOD or LUNG specimen, but carboxyhaemoglobin (COHb) was
found by Dr. [REDACTED] Laboratory (CHOP) in the MUSCLE attached to
BONE. (See attached report). In addition CO was detected in a
separate MUSCLE specimen by National Medical Services (NMS). (See
attached report).

b6
b7C

These results can be reconciled on the basis of the small
amounts of CO and COHb found as well as the different body sites
from which specimens were taken.

Results of analyses for volatile, extractable, and unextracted
organic agents were not remarkable.

No alcohols or opiates were found.

The finding by NMS of 3 ppb toluene in the BLOOD is consis-
tent with our (CME) detection limit of 2500 ppb toluene at maximum
sensitivity of our procedure and instrumentation.

This case consist of the following: There is the remains of a Negro female child of approximate pubertal age. This fragment measures in total 27" in length and is approximately 9½" in width. It consists of skin over the inferior thorax and anterior abdomen with prominent residual of pubic hair. The proximal 1/2 of the left thigh on the anterior surface is present with a portion of the right thigh, right knee and portion of the right lower leg also identified. When this specimen is rolled over, the pelvis is missing and a portion of the right femur is identified. The abdominal viscera are extensively charred and cannot be individually identified. The musculature of the right thigh and right lower leg is extensively charred as is the musculature of the left thigh.

OTHER MISCELLANEOUS FINDINGS:

A portion of the liver is identified with a portion of the kidney attached thereto and these structures are of a size consistent with the size of this child. In addition a piece of thoroughly cooked and somewhat charred reddish-black material resembling lung is also consistent with coming from this child. A portion of zygoma with a portion of the facial bones and a portion of the petrous portions of the bone is likewise identified. There is further submitted what appears to be the right wing of the ileum. A set of sacral bones is recovered together with 6 adult vertebrae and another small vertebra which may or may not be a portion of the other six. In addition, a miscellaneous group of small ribs and metacarpals are also recovered in this lot of material. There is further a mass of charred and cooked musculature which shows no other unique identifying features. Including with lot #D is what appears to be a charred remnant of a cloth garment resembling a white undershirt or "T" shirt.

On 10/18/85 [REDACTED] Channel 12, Philadelphia, PA, provided the first nine video tapes of the Philadelphia Special Investigative Commission hearings on the MOVE incident. The tapes covered the period 10/8/85 through 10/11/85 and 10/15/85 through 10/17/85.

b6
b7C

On 10/23/85 [REDACTED] stated one additional copy of each video tape could be provided, including the first nine already received. The cost would be \$700.00. FBIHQ has requested these tapes be expeditiously provided to them for review and dissemination to the USDOJ.

It is requested that initially \$350.00 be taken from the case fund allotment to pay Channel 12 and that the remaining \$350.00 balance be taken out upon completion of the video taping.

It is recommended that payment be authorized as set forth below:

Syllabus.

GARRITY ET AL. v. NEW JERSEY.

APPEAL FROM THE SUPREME COURT OF NEW JERSEY.

No. 13. Argued November 10, 1966.—Decided January 16, 1967.

Appellants, police officers in certain New Jersey boroughs, were questioned during the course of a state investigation concerning alleged traffic ticket "fixing." Each officer was first warned that: anything he said might be used against him in a state criminal proceeding; he could refuse to answer if the disclosure would tend to incriminate him; if he refused to answer he would be subject to removal from office. The officers' answers to the questions were used over their objections in subsequent prosecutions, which resulted in their convictions. The State Supreme Court on appeal upheld the convictions despite the claim that the statements of the officers were coerced by reason of the fact that if they refused to answer they could, under the New Jersey forfeiture-of-office statute, lose their positions. That statute provides that a public employee shall be removed from office if he refuses to testify or answer any material question before any commission or body which has the right to inquire about matters relating to his office or employment on the ground that his answer may incriminate him. On the ground that the only real issue in the case was the voluntariness of the statements, the State Supreme Court declined to pass upon the constitutionality of the statute, though the statute was considered relevant for the bearing it had on the voluntary character of the statements used to convict the officers. The officers appealed to this Court under 28 U. S. C. § 1257 (2) and the question of jurisdiction was postponed to a hearing on the merits. *Held*:

1. The forfeiture-of-office statute is too tangentially involved to satisfy the requirements of 28 U. S. C. § 1257 (2). The only bearing it had was whether, valid or not, the choice between being discharged under it for refusal to answer and self-incrimination rendered the statements products of coercion. The appeal is dismissed, the papers are treated as a petition for certiorari, and certiorari is granted. Pp. 495-496.

2. The threat of removal from public office under the forfeiture-of-office statute to induce the petitioners to forgo the privilege against self-incrimination secured by the Fourteenth Amendment rendered the resulting statements involuntary and therefore inadmissible in the state criminal proceedings. Pp. 496-500.

44A-4393-62

any officer, department, board, commission or body authorized to conduct any hearing or inquiry, or having appeared, shall refuse to testify or to answer any question relating to the affairs or government of the City or the conduct of any City officer or employe on the ground that his testimony or answers would tend to incriminate him, or shall refuse to waive immunity from prosecution on account of any matter about which he may be asked to testify before such court or at any such hearing or inquiry, he shall forfeit his office or position, and shall not be eligible thereafter for appointment to any position in the City service.

NOTES

Sources: Cf. Constitution of the Commonwealth of Pennsylvania, Article III, Section 32, Article VII., Section 1. A Model State Civil Service Law, Section 18.

Purposes: Neither the holding of a city office nor city employment are constitutionally guaranteed rights; they constitute privileges in return for which the City may exact reasonable obligations such as loyalty, trust and confidence. It would be incongruous to permit one holding a City office or position to obstruct any official inquiry, investigation or examination relating to the affairs of the City government or to the conduct of any City officer or employe on the ground of his personal right against self-incrimination. Under such circumstances the City cannot compel him to waive his constitutionally protected right but it may refuse him the privilege of holding office or employment under it.

Notes of Decisions

Since this regulation is an attempt to coerce a waiver of the right against self-incrimination, it is unconstitutional, and any statements made under threat of it are inadmissible. *DiCiacco v. Civil Service Commission of City of Philadelphia*, 37 Pa. Commw. Ct. 77 at 85, 389 A.2d 703 at 708 — 709 (1978).

§10.10-111 Discrimination.

(1) No person shall be appointed or promoted to, or demoted or dismissed from, any position in the civil service, or in any way favored or discriminated against with respect to employment in the civil service because of his race, color, religion, national origin, political opinions or labor union activity lawful for municipal employes.

(2) No officer or employe and no department, board or commission of the City shall in the exercise of his or its powers and the performance of his or its duties or in the granting of the use of City property discriminate against any person because of race, color, religion or national origin but this paragraph shall not prohibit the use of City property by any fraternal, religious or sectarian organization.

(a) The choice given petitioners either to forfeit their jobs or to incriminate themselves constituted coercion. Pp. 496-498.

(b) Whether there was a "waiver" is a federal question. P. 498.

(c) Where the choice is "between the rock and the whirlpool" (*Frost Trucking Co. v. Railroad Comm'n*, 271 U. S. 583, 593), the decision to "waive" one or the other is made under duress. P. 498. Appeal dismissed and certiorari granted; 44 N. J. 209, 207 A. 2d 689; 44 N. J. 259, 208 A. 2d 146, reversed.

Daniel L. O'Connor argued the cause for appellants. With him on the brief was *Eugene Gressman*.

Alan B. Handler, First Assistant Attorney General of New Jersey, argued the cause for appellee. With him on the brief were *Arthur J. Sills*, Attorney General, and *Norman Heine*.

MR. JUSTICE DOUGLAS delivered the opinion of the Court.

Appellants were police officers in certain New Jersey boroughs. The Supreme Court of New Jersey ordered that alleged irregularities in handling cases in the municipal courts of those boroughs be investigated by the Attorney General, invested him with broad powers of inquiry and investigation, and directed him to make a report to the court. The matters investigated concerned alleged fixing of traffic tickets.

Before being questioned, each appellant was warned (1) that anything he said might be used against him in any state criminal proceeding; (2) that he had the privilege to refuse to answer if the disclosure would tend to incriminate him; but (3) that if he refused to answer he would be subject to removal from office.¹

¹ "Any person holding or who has held any elective or appointive public office, position or employment (whether state, county or municipal), who refuses to testify upon matters relating to the office, position or employment in any criminal proceeding wherein he is a defendant or is called as a witness on behalf of the prosecution,

Appella granted, a these circ answers g conspiracy laws. Ap were susta were coer to answer departme 259, 208

We pos on the m ity was s § 1257 (2

upon the s compel his immunity willfully re body of ti matters re son or wh material c incriminat if holding moved the ployment granted to to a matt Any perso thereafter fice, posi § 2A:81-1

² At the to determ The State the state: hearing.

³ N. J.

Appellants answered the questions. No immunity was granted, as there is no immunity statute applicable in these circumstances. Over their objections, some of the answers given were used in subsequent prosecutions for conspiracy to obstruct the administration of the traffic laws. Appellants were convicted and their convictions were sustained over their protests that their statements were coerced,² by reason of the fact that, if they refused to answer, they could lose their positions with the police department. See 44 N. J. 209, 207 A. 2d 689, 44 N. J. 259, 208 A. 2d 146.

"We postponed the question of jurisdiction to a hearing on the merits. 383 U. S. 941. The statute whose validity was sought to be "drawn in question," 28 U. S. C. § 1257 (2), was the forfeiture statute.³ But the New

upon the ground that his answer may tend to incriminate him or compel him to be a witness against himself or refuses to waive immunity when called by a grand jury to testify thereon or who willfully refuses or fails to appear before any court, commission or body of this state which has the right to inquire under oath upon matters relating to the office, position or employment of such person or who, having been sworn, refuses to testify or to answer any material question upon the ground that his answer may tend to incriminate him or compel him to be a witness against himself, shall, if holding elective or public office, position or employment, be removed therefrom or shall thereby forfeit his office, position or employment and any vested or future right of tenure or pension granted to him by any law of this state provided the inquiry relates to a matter which occurred or arose within the preceding five years. Any person so forfeiting his office, position or employment shall not thereafter be eligible for election or appointment to any public office, position or employment in this state." N. J. Rev. Stat. § 2A:81-17.1 (Supp. 1965).

² At the trial the court excused the jury and conducted a hearing to determine whether, *inter alia*, the statements were voluntary. The State offered witnesses who testified as to the manner in which the statements were taken; the appellants did not testify at that hearing. The court held the statements to be voluntary.

³ N. 1, *supra*.

Jersey Supreme Court refused to reach that question (44 N. J., at 223, 207 A. 2d, at 697), deeming the voluntariness of the statements as the only issue presented. *Id.*, at 220-222, 207 A. 2d, at 695-696. The statute is therefore too tangentially involved to satisfy 28 U. S. C. § 1257 (2), for the only bearing it had was whether, valid or not, the fear of being discharged under it for refusal to answer on the one hand and the fear of self-incrimination on the other was "a choice between the rock and the whirlpool" * which made the statements products of coercion in violation of the Fourteenth Amendment. We therefore dismiss the appeal, treat the papers as a petition for certiorari (28 U. S. C. § 2103), grant the petition and proceed to the merits.

We agree with the New Jersey Supreme Court that the forfeiture-of-office statute is relevant here only for the bearing it has on the voluntary character of the statements used to convict petitioners in their criminal prosecutions.

The choice imposed on petitioners was one between self-incrimination or job forfeiture. Coercion that vitiates a confession under *Chambers v. Florida*, 309 U. S. 227, and related cases can be "mental as well as physical"; "the blood of the accused is not the only hallmark of an unconstitutional inquisition." *Blackburn v. Alabama*, 361 U. S. 199, 206. Subtle pressures (*Leyra v. Denno*, 347 U. S. 556; *Haynes v. Washington*, 373 U. S. 503) may be as telling as coarse and vulgar ones. The question is whether the accused was deprived of his "free choice to admit, to deny, or to refuse to answer." *Lisenba v. California*, 314 U. S. 219, 241.

We adhere to *Boyd v. United States*, 116 U. S. 616, a civil forfeiture action against property. A statute offered

* *Stevens v. Marks*, 383 U. S. 234, 243, quoting from *Frost Trucking Co. v. Railroad Comm'n*, 271 U. S. 583, 593.

the owner an election between producing a document or forfeiture of the goods at issue in the proceeding. This was held to be a form of compulsion in violation of both the Fifth Amendment and the Fourth Amendment. *Id.*, at 634-635. It is that principle that we adhere to and apply in *Spevack v. Klein*, post, p. 511.

The choice given petitioners was either to forfeit their jobs or to incriminate themselves. The option to lose their means of livelihood or to pay the penalty of self-incrimination is the antithesis of free choice to speak out or to remain silent. That practice, like interrogation practices we reviewed in *Miranda v. Arizona*, 384 U. S. 436, 464-465, is "likely to exert such pressure upon an individual as to disable him from making a free and rational choice." We think the statements were infected by the coercion⁵ inherent in this scheme of questioning

⁵ Cf. Lamm, *The 5th Amendment and Its Equivalent in Jewish Law*, 17 *Decalogue Jour.* 1 (Jan.-Feb. 1967):

"It should be pointed out, at the very outset, that the Halakhah does not distinguish between voluntary and forced confessions, for reasons which will be discussed later. And it is here that one of the basic differences between Constitutional and Talmudic Law arises. According to the Constitution, a man cannot be compelled to testify against himself. The provision against self-incrimination is a privilege of which a citizen may or may not avail himself, as he wishes. The Halakhah, however, does not permit self-incriminating testimony. It is inadmissible, even if voluntarily offered. Confession, in other than a religious context, or financial cases completely free from any traces of criminality, is simply not an instrument of the Law. The issue, then, is not compulsion, but the whole idea of legal confession.

"The Halakhah, then, is obviously concerned with protecting the confessant from his own aberrations which manifest themselves, either as completely fabricated confessions, or as exaggerations of the real facts. . . . While certainly not all, or even most criminal confessions are directly attributable, in whole or part, to the Death Instinct, the Halakhah is sufficiently concerned with the minority

and cannot be sustained as voluntary under our prior decisions.

It is said that there was a "waiver." That, however, is a federal question for us to decide. *Union Pac. R. R. Co. v. Pub. Service Comm.*, 248 U. S. 67, 69-70; *Stevens v. Marks*, 383 U. S. 234, 243-244. The Court in *Union Pac. R. R. Co. v. Pub. Service Comm.*, *supra*, in speaking of a certificate exacted under protest and in violation of the Commerce Clause, said:

"Were it otherwise, as conduct under duress involves a choice, it always would be possible for a State to impose an unconstitutional burden by the threat of penalties worse than it in case of a failure to accept it, and then to declare the acceptance voluntary . . ." *Id.*, at 70.

Where the choice is "between the rock and the whirlpool," duress is inherent in deciding to "waive" one or the other.

"It always is for the interest of a party under duress to choose the lesser of two evils. But the fact that a choice was made according to interest does not exclude duress. It is the characteristic of duress properly so called." *Ibid.*

of instances, where such is the case, to disqualify all criminal confessions and to discard confession as a legal instrument. Its function is to ensure the total victory of the Life Instinct over its omnipresent antagonist. Such are the conclusions to be drawn from Maimonides' interpretation of the Halakhah's equivalent of the Fifth Amendment.

"In summary, therefore, the Constitutional ruling on self-incrimination concerns only forced confessions, and its restricted character is a result of its historical evolution as a civilized protest against the use of torture in extorting confessions. The Halakhic ruling, however, is much broader and discards confessions in toto, and this because of its psychological insight and its concern for saving man from his own destructive inclinations." *Id.*, at 10, 12.

In that case cases also, though they preserved earliest possible information. 282 U. S. 765 ferent from the make a clean information.

Mr. Justice Mass. 216, 29-Jersey heavily

The question in those terms: to the requirement use the threatence against

We held in 551, that a person merely because privilege against a congressional

"The person reduced be taken

In that case appellant paid under protest. In these cases also, though petitioners succumbed to compulsion, they preserved their objections, raising them at the earliest possible point. Cf. *Abie State Bank v. Bryan*, 282 U. S. 765, 776. The cases are therefore quite different from the situation where one who is anxious to make a clean breast of the whole affair volunteers the information.

Mr. Justice Holmes in *McAuliffe v. New Bedford*, 155 Mass. 216, 29 N. E. 517, stated a dictum on which New Jersey heavily relies:

"The petitioner may have a constitutional right to talk politics, but he has no constitutional right to be a policeman. There are few employments for hire in which the servant does not agree to suspend his constitutional right of free speech, as well as of idleness, by the implied terms of his contract. The servant cannot complain, as he takes the employment on the terms which are offered him. On the same principle, the city may impose any reasonable condition upon holding offices within its control." *Id.*, at 220, 29 N. E., at 517-518.

The question in this case, however, is not cognizable in those terms. Our question is whether a State, contrary to the requirement of the Fourteenth Amendment, can use the threat of discharge to secure incriminatory evidence against an employee.

We held in *Slochower v. Board of Education*, 350 U. S. 551, that a public school teacher could not be discharged merely because he had invoked the Fifth Amendment privilege against self-incrimination when questioned by a congressional committee:

"The privilege against self-incrimination would be reduced to a hollow mockery if its exercise could be taken as equivalent either to a confession of

HARLAN, J., dissenting.

385 U.S.

guilt or a conclusive presumption of perjury. . . . The privilege serves to protect the innocent who otherwise might be ensnared by ambiguous circumstances." *Id.*, at 557-558.

We conclude that policemen, like teachers and lawyers, are not relegated to a watered-down version of constitutional rights.

There are rights of constitutional stature whose exercise a State may not condition by the exaction of a price. Engaging in interstate commerce is one. *Western Union Tel. Co. v. Kansas*, 216 U. S. 1. Resort to the federal courts in diversity of citizenship cases is another. *Terral v. Burke Constr. Co.*, 257 U. S. 529. Assertion of a First Amendment right is still another. *Lovell v. City of Griffin*, 303 U. S. 444; *Murdock v. Pennsylvania*, 319 U. S. 105; *Thomas v. Collins*, 323 U. S. 516; *Lamont v. Postmaster General*, 381 U. S. 301, 305-306. The imposition of a burden on the exercise of a Twenty-fourth Amendment right is also banned. *Harman v. Forssenius*, 380 U. S. 528. We now hold the protection of the individual under the Fourteenth Amendment against coerced statements prohibits use in subsequent criminal proceedings of statements obtained under threat of removal from office, and that it extends to all, whether they are policemen or other members of our body politic.

Reversed.

[For dissenting opinion of Mr. Justice WHITE, see *post*, p. 530.]

constitutional privilege against self-incrimination. I fear that these opinions will seriously and quite needlessly hinder the protection of other important public values. I must dissent here, as I do in *Spevack*.

The majority employs a curious mixture of doctrines to invalidate these convictions, and I confess to difficulty in perceiving the intended relationships among the various segments of its opinion. I gather that the majority believes that the possibility that these policemen might have been discharged had they refused to provide information pertinent to their public responsibilities is an impermissible "condition" imposed by New Jersey upon petitioners' privilege against self-incrimination. From this premise the majority draws the conclusion that the statements obtained from petitioners after a warning that discharge was possible were inadmissible. Evidently recognizing the weakness of its conclusion, the majority attempts to bring to its support illustrations from the lengthy series of cases in which this Court, in light of all the relevant circumstances, has adjudged the voluntariness *in fact* of statements obtained from accused persons.

The majority is apparently engaged in the delicate task of riding two unruly horses at once: it is presumably arguing simultaneously that the statements were involuntary as a matter of fact, in the same fashion that the statements in *Chambers v. Florida*, 309 U. S. 227, and *Haynes v. Washington*, 373 U. S. 503, were thought to be involuntary, and that the statements were inadmissible as a matter of law, on the premise that they were products of an impermissible condition imposed on the constitutional privilege. These are very different contentions and require separate replies, but in my opinion both contentions are plainly mistaken, for reasons that follow.

I.

I turn first to the suggestion that these statements were involuntary in fact. An assessment of the voluntariness of the various statements in issue here requires a more comprehensive examination of the pertinent circumstances than the majority has undertaken.

The petitioners were at all material times policemen in the boroughs of Bellmawr and Barrington, New Jersey. Garrity was Bellmawr's chief of police and Virtue one of its police officers; Holroyd, Elwell, and Murray were police officers in Barrington. Another defendant below, Mrs. Naglee, the clerk of Bellmawr's municipal court, has since died. In June 1961 the New Jersey Supreme Court *sua sponte* directed the State's Attorney General to investigate reports of traffic ticket fixing in Bellmawr and Barrington. Subsequent investigations produced evidence that the petitioners, in separate conspiracies, had falsified municipal court records, altered traffic tickets, and diverted moneys produced from bail and fines to unauthorized purposes. In the course of these investigations the State obtained two sworn statements from each of the petitioners; portions of those statements were admitted at trial. The petitioners were convicted in two separate trials of conspiracy to obstruct the proper administration of the state motor traffic laws, the cases being now consolidated for purposes of our review. The Supreme Court of New Jersey affirmed all the convictions.

The first statements were taken from the petitioners by the State's Deputy Attorney General in August and November 1961. All of the usual indicia of duress are wholly absent. As the state court noted, there was "no physical coercion, no overbearing tactics of psychological persuasion, no lengthy incommunicado detention, or efforts to humiliate or ridicule the defendants." 44 N. 209, 220, 207 A. 2d 689, 695. The state court found no evidence that any of the petitioners were reluctant to offer statements, and concluded that the interrogations were conducted with a "high degree of civility and restraint." *Ibid.*

These conclusions are fully substantiated by the record. The statements of the Bellmawr petitioners were taken in a room in the local firehouse, for which Chief Garrity himself had made arrangements. None of the petitioners were in custody before or after the depositions were taken; each apparently continued to pursue his ordinary duties as a public official of the community. The statements were recorded by a court stenographer, who testified that he witnessed no indications of unwillingness or even significant hesitation on the part of any of the petitioners. The Bellmawr petitioners did not have counsel present, but the Deputy Attorney General testified without contradiction that Garrity had informed him as they strolled between Garrity's office and the firehouse that he had arranged for counsel, but thought that none would be required at that stage. The interrogations were not excessively lengthy, and reasonable efforts were made to assure the physical comfort of the witnesses. Mrs. Naglee, the clerk of the Bellmawr municipal court, who was known to suffer from a heart ailment, was assured that questioning would cease if she felt any discomfort.

The circumstances in which the depositions of the Barrington petitioners were taken are less certain, for the New Jersey Supreme Court found that there was an informal agreement at the Barrington trial that the defendants would argue simply that the possibility of dismissal made the statements "involuntary as a matter of law." The defense did not contend that the statements were the result of physical or mental coercion, or that the wills of the Barrington petitioners were overborne. Accordingly, the State was never obliged to offer evidence

of the voluntariness in fact of the statements. We are, however, informed that the three Barrington petitioners had counsel present as their depositions were taken. Insofar as the majority suggests that the Barrington statements are involuntary in fact, in the fashion of *Chambers* or *Haynes*, it has introduced a factual contention never urged by the Barrington petitioners and never considered by the courts of New Jersey.

As interrogation commenced, each of the petitioners was sworn, carefully informed that he need not give any information, reminded that any information given might be used in a subsequent criminal prosecution, and warned that as a police officer he was subject to a proceeding to discharge him if he failed to provide information relevant to his public responsibilities. The cautionary statements varied slightly, but all, except that given to Mrs. Naglee, included each of the three warnings.¹ Mrs. Naglee was

¹ The warning given to Chief Garrity is typical. "I want to advise you that anything you say must be said of your own free will and accord without any threats or promises or coercion, and anything you say may be, of course, used against you or any other person in any subsequent criminal proceedings in the courts of our state.

"You do have, under our law, as you probably know, a privilege to refuse to make any disclosure which may tend to incriminate you. If you make a disclosure with knowledge of this right or privilege, voluntarily, you thereby waive that right or privilege in relation to any other questions which I might put to you relevant to such disclosure in this investigation.

"This right or privilege which you have is somewhat limited to the extent that you as a police officer under the laws of our state, may be subjected to a proceeding to have you removed from office if you refuse to answer a question put to you under oath pertaining to your office or your function within that office. It doesn't mean, however, you can't exercise the right. You do have the right."

A. "No, I will cooperate."

Q. "Understanding this, are you willing to proceed at this time and answer any questions?"

A. "Yes."

not told that she could be removed from her position at the court if she failed to give information pertinent to the discharge of her duties. All of the petitioners consented to give statements, none displayed any significant hesitation, and none suggested that the decision to offer information was motivated by the possibility of discharge.

A second statement was obtained from each of the petitioners in September and December 1962. These statements were not materially different in content or circumstances from the first. The only significant distinction was that the interrogator did not advert even obliquely to any possibility of dismissal. All the petitioners were cautioned that they were entitled to remain silent, and there was no evidence whatever of physical or mental coercion.

All of the petitioners testified at trial, and gave evidence essentially consistent with the statements taken from them. At a preliminary hearing conducted at the Bellmawr trial to determine the voluntariness of the statements, the Bellmawr petitioners offered no evidence beyond proof of the warning given them.

The standards employed by the Court to assess the voluntariness of an accused's statements have reflected a number of values, and thus have emphasized a variety of factual criteria. The criteria employed have included threats of imminent danger, *Payne v. Arkansas*, 356 U. S. 560, physical deprivations, *Reck v. Pate*, 367 U. S. 433, repeated or extended interrogation, *Chambers v. Florida*, 309 U. S. 227, limits on access to counsel or friends, *Crooker v. California*, 357 U. S. 433, length and illegality of detention under state law, *Haynes v. Washington*, 373 U. S. 503, individual weakness or incapacity, *Lynum v. Illinois*, 372 U. S. 528, and the adequacy of warnings of constitutional rights, *Davis v. North Carolina*, 384 U. S. 737. Whatever the criteria employed, the duty of the Court has been "to examine the entire

record," and thereby to determine whether the accused's will "was overborne by the sustained pressures upon him." *Davis v. North Carolina*, 384 U. S. 737, 741, 739.

It would be difficult to imagine interrogations to which these criteria of duress were more completely inapplicable, or in which the requirements which have subsequently been imposed by this Court on police questioning were more thoroughly satisfied. Each of the petitioners received a complete and explicit reminder of his constitutional privilege. Three of the petitioners had counsel present; at least a fourth had consulted counsel but freely determined that his presence was unnecessary. These petitioners were not in any fashion "swept from familiar surroundings into police custody, surrounded by antagonistic forces, and subjected to the techniques of persuasion" *Miranda v. Arizona*, 384 U. S. 436, 461. I think it manifest that, under the standards developed by this Court to assess voluntariness, there is no basis for saying that any of these statements were made involuntarily.

II.

The issue remaining is whether the statements were inadmissible because they were "involuntary as a matter of law," in that they were given after a warning that New Jersey policemen may be discharged for failure to provide information pertinent to their public responsibilities. What is really involved on this score, however, is not in truth a question of "voluntariness" at all, but rather whether the condition imposed by the State on the exercise of the privilege against self-incrimination, namely dismissal from office, in this instance serves in itself to render the statements inadmissible. Absent evidence of involuntariness in fact, the admissibility of these statements thus hinges on the validity of the consequence which the State acknowledged might have resulted if the statements had not been given. If the consequence is

constitutionally permissible, there can surely be no objection if the State cautions the witness that it may follow if he remains silent. If both the consequence and the warning are constitutionally permissible, a witness is obliged, in order to prevent the use of his statements against him in a criminal prosecution, to prove under the standards established since *Brown v. Mississippi*, 297 U. S. 278, that as a matter of fact the statements were involuntarily made. The central issues here are therefore identical to those presented in *Spevack v. Klein*, *supra*: whether consequences may properly be permitted to result to a claimant after his invocation of the constitutional privilege, and if so, whether the consequence in question is permissible. For reasons which I have stated in *Spevack v. Klein*, in my view nothing in the logic or purposes of the privilege demands that all consequences which may result from a witness' silence be forbidden merely because that silence is privileged. The validity of a consequence depends both upon the hazards, if any, it presents to the integrity of the privilege and upon the urgency of the public interests it is designed to protect.

It can hardly be denied that New Jersey is permitted by the Constitution to establish reasonable qualifications and standards of conduct for its public employees. Nor can it be said that it is arbitrary or unreasonable for New Jersey to insist that its employees furnish the appropriate authorities with information pertinent to their employment. Cf. *Beilan v. Board of Education*, 357 U. S. 399; *Slochower v. Board of Education*, 350 U. S. 551. Finally, it is surely plain that New Jersey may in particular require its employees to assist in the prevention and detection of unlawful activities by officers of the state government. The urgency of these requirements is the more obvious here, where the conduct in question is that of officials directly entrusted with the administration of justice. The importance for our systems of jus-

tice of the integrity of local police forces can scarcely be exaggerated. Thus, it need only be recalled that this Court itself has often intervened in state criminal prosecutions precisely on the ground that this might encourage high standards of police behavior. See, e. g., *Ashcraft v. Tennessee*, 322 U. S. 143; *Miranda v. Arizona*, *supra*. It must be concluded, therefore, that the sanction at issue here is reasonably calculated to serve the most basic interests of the citizens of New Jersey.

The final question is the hazard, if any, which this sanction presents to the constitutional privilege. The purposes for which, and the circumstances in which, an officer's discharge might be ordered under New Jersey law plainly may vary. It is of course possible that discharge might in a given case be predicated on an imputation of guilt drawn from the use of the privilege, as was thought by this Court to have occurred in *Slochower v. Board of Education*, *supra*. But from our vantage point, it would be quite improper to assume that New Jersey will employ these procedures for purposes other than to assess in good faith an employee's continued fitness for public employment. This Court, when a state procedure for investigating the loyalty and fitness of public employees might result either in the *Slochower* situation or in an assessment in good faith of an employee, has until today consistently paused to examine the actual circumstances of each case. *Beilan v. Board of Education*, *supra*; *Nelson v. Los Angeles County*, 362 U. S. 1. I am unable to see any justification for the majority's abandonment of that process; it is well calculated both to protect the essential purposes of the privilege and to guarantee the most generous opportunities for the pursuit of other public values. The majority's broad prohibition, on the other hand, extends the scope of the privilege beyond its essential purposes, and seriously hampers the protection of other important values. Despite the majority's

disclaimer, it is quite plain that the logic of its prohibitory rule would in this situation prevent the discharge of these policemen. It would therefore entirely forbid a sanction which presents, at least on its face, no hazard to the purposes of the constitutional privilege, and which may reasonably be expected to serve important public interests. We are not entitled to assume that discharges will be used either to vindicate impermissible inferences of guilt or to penalize privileged silence, but must instead presume that this procedure is only intended and will only be used to establish and enforce standards of conduct for public employees.² As such, it does not minimize or endanger the petitioners' constitutional privilege against self-incrimination.³

² The legislative history of N. J. Rev. Stat. 2A:81-17.1 provides nothing which clearly indicates the purposes of the statute, beyond what is to be inferred from its face. In any event, the New Jersey Supreme Court noted below that the State would be entitled, even without the statutory authorization, to discharge state employees who declined to provide information relevant to their official responsibilities. There is therefore nothing to which this Court could properly now look to forecast the purposes for which or circumstances in which New Jersey might discharge those who have invoked the constitutional privilege.

³ The late Judge Jerome Frank thus once noted, in the course of a spirited defense of the privilege, that it would be entirely permissible to discharge police officers who decline, on grounds of the privilege, to disclose information pertinent to their public responsibilities. Judge Frank quoted the following with approval:

"Duty required them to answer. Privilege permitted them to refuse to answer. They chose to exercise the privilege, but the exercise of such privilege was wholly inconsistent with their duty as police officers. They claim that they had a constitutional right to refuse to answer under the circumstances, but . . . they had no constitutional right to remain police officers in the face of their clear violation of the duty imposed upon them." Christal v. Police Commission of San Francisco. Citing 33 Cal. App. 2d 564, 92 P. 2d 416. (Emphasis added by Judge Frank.) *United States v. Field*, 193 F. 2d 92, 106 (separate opinion).

HARLAN, J., dissenting.

385 U.S.

I would therefore conclude that the sanction provided by the State is constitutionally permissible. From this, it surely follows that the warning given of the possibility of discharge is constitutionally unobjectionable. Given the constitutionality both of the sanction and of the warning of its application, the petitioners would be constitutionally entitled to exclude the use of their statements as evidence in a criminal prosecution against them only if it is found that the statements were, when given, involuntary in fact. For the reasons stated above, I cannot agree that these statements were involuntary in fact.

I would affirm the judgments of the Supreme Court of New Jersey.

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 11/7/85

Special Agent [redacted] was interviewed at Philadelphia FEDERAL BUREAU OF INVESTIGATION (FBI) Headquarters in the presence of his attorney, former Assistant United States Attorney (AUSA) [redacted]. He gave the following signed statement:

b6
b7C

"I, [redacted] having been duly sworn by [redacted] hereby make the following statement to [redacted] whom I know to be Special Agents of the FEDERAL BUREAU OF INVESTIGATION (FBI).

b6
b7C

I entered on duty with the FBI on [redacted] I am currently assigned as a Special Agent in the Philadelphia Division.

I understand this is a criminal inquiry and that I am being interviewed concerning my contacts with the PHILADELPHIA POLICE DEPARTMENT (PHPD) and the MOVE incident. I have been further advised of my rights and responsibilities in connection with this inquiry as set forth on a Warning and Assurance form (FD-644), which I have read and signed.

Since 1976 I have been a [redacted] for the Philadelphia FBI. Since the late 1970's I have been attending annual recertification In-Services for [redacted]

b6
b7C

[redacted] It is FBI policy that if there are any explosives left over from these schools they may be given to the police officers in attendance at the schools.

In May, 1984 I taught a [redacted] seminar at Pomona, NJ, which was attended by four PHPD officers, [redacted] and two others. Neither [redacted] were in attendance. At this school I taught that C-4 is the safest and best explosive to use in bomb disposal. The military also teaches that C-4 is the explosive to use in bomb disposal. C-4 is a military explosive. Military

regulation states that C-4 or any other military explosive cannot be given to local police departments by the military. The PHPD did not have C-4. I perceived a need their Bomb Disposal Unit had for C-4. I teach them to do their job with C-4. They cannot get C-4. They need it for their bomb disposal and training function. I teach that C-4 is the safest and best material to use for countercharging and other bomb disposal functions.

I do not believe there was any C-4 residue at the May, 1984 school. I perceived PHPD need for C-4 and planned to obtain some for them at the recertification session I was to attend at Quantico, VA in October 1984. Investigative constraints kept me from attending the October 1984 session. I was recertified at a school in Oklahoma City in November, 1984. The PHPD had not asked for the C-4 but I perceived the need on my own.

In January, 1985 I attended the annual [REDACTED] [REDACTED] at Quantico, VA. [REDACTED] who had heavily participated in the May, 1984 school was on the [REDACTED] at Quantico, VA at this time. I had asked him in May, 1984 if I could obtain C-4 for the PHPD and he told me that could be worked out. Thereafter [REDACTED] had been removed from the [REDACTED] [REDACTED] to his position as [REDACTED] although he remained a qualified [REDACTED] Wednesday or Thursday night of the Quantico School [REDACTED] to dinner at the GLOBE AND LAUREL in Quantico. We bought him dinner as a going away present [REDACTED] position. There was a fourth person at the dinner but I do not recall who it was. During dinner I asked [REDACTED] said alright and told me to see him Friday. This was handled casually because I thought similar things had been done many times before. I did not tell [REDACTED]

b6
b7C

I just asked [REDACTED]

Continuation of FD-302 of _____, On 11/6/85, Page 3

_____ I went to the _____ after the seminar was ended. It was late morning. We went to the _____ We picked up a shopping cart, went through two sets of locked doors and along a long concrete corridor to the explosives storage area. There were just the two of us. _____ unlocked the door. He had keys to all the doors. I assume he had authority for access to all these areas and had carried out whatever procedures are necessary to gain proper access.

b6
b7C

In the explosives storage area were numerous boxes and footlockers of explosives apparently haphazardly placed. I grabbed an empty cardboard box. _____ opened a footlocker with a combination lock and put approximately 30 pound and one-quarter blocks of C-4 into the box. Also in the same footlocker was some military TNT. _____

_____ The box was approximately 18 inches by 18 inches by six inches. It was full. It weighed fifty or sixty pounds. These military TNT and fuse lighters are also unavailable to the PHPD through normal channels. _____ relocked the doors as we returned. He had some difficulty accomplishing this. I carried the box from the anteroom where we left the cart to _____ He drove back to his parking spot _____

b6
b7C

I did not see _____ employ any inventory system or make any record of the explosives he gave me to take to the PHPD and do not know that he did so. I had previously put my personal effects in my _____ and was prepared to leave the Academy. I did so and proceeded home.

MOVE was never mentioned during my time at the January, 1985 school in Quantico. _____ knew I was going to give the explosives to the PHPD Bomb Disposal Unit for their Bomb Disposal Work. _____ never indicated he did not have the authority to do what he did. I thought this was the common practice.

b6
b7C

Four or five years earlier (in 1980 or 1981) I had brought four or five dozen nonelectric blasting caps from a Quantico, VA, recertification session. I had obtained these at the school, transported them to Philadelphia, PA, and given them to the PHPD Bomb Disposal Unit. I did this because they had none and needed them to do their job.

Continuation of FD-302 of [redacted]

, On 11/6/85 , Page 4

I drove the box of explosives from Quantico, VA, to my home in my [redacted]. My route was up Route 95, probably through the Baltimore Harbor Tunnel, up the Maryland and Delaware Turnpikes, across the Delaware Memorial Bridge and up Route 295 [redacted]. I would go through the Baltimore Harbor Tunnel unless traffic congestion indication taking the Beltway around Baltimore would be more expeditious.

b6
b7C

I parked my [redacted] in my locked garage and left it there for the weekend. On Monday, January 14, 1985, I went to work at Philadelphia FBI as usual. I was picked up for work by SA [redacted]. In mid-morning that day I returned to my home in a Bureau car and transferred [redacted] to the Bureau car. I drove them to the PHPD Bomb Disposal Unit. I do not recall the route from my home to the PHPD range. I took the box into the bomb unit's shed, set it on the table there and said: [redacted]. I was there a very short period of time because I had to get the Bureau car back to the office for a fellow squadmember to use. I was not there five minutes. I do not recall specifically any PHPD officer who was there. I think [redacted] and others were there. They thanked me profusely and told me they could really use the explosives. I told them to keep it quiet [redacted]. The sole reason I said that was so that word would not get back to the military and cause them to lessen the [redacted] (This would be injurious to every police department in the USA.)

b6
b7C

The members of the Bomb Disposal Unit did not say how they were going to use these explosives. MOVE was not mentioned at all at this January, 1985 occurrence. MOVE had not been mentioned at the May, 1984 school. To this time MOVE had only been mentioned to me once by PHPD Bomb Disposal persons. In May, 1984, shortly before or after the May, 1984 school and having no connection at all with it, I received a telephone call from Lt. [redacted]. He told me the PHPD was trying to get a plan together to take the MOVE house. This was the first time I had heard of the MOVE house. [redacted] said they wanted to go in through the roof and put gas down into the MOVE house. I told him that sounded like a job for a shaped charge. [redacted] asked where he could get one. I told him I did not know and had only read about it. I referred him to the Bomb Data Center in Washington, DC. The conversation only lasted two minutes. C-4 was never mentioned.

b6
b7C

Continuation of FD-302 of [REDACTED]

On 11/16/85, Page 5

b6
b7C

I had no further conversation with the PHPD regarding MOVE until May 9, 1985. Between January 14, 1985 and May 9, 1985 I had no contact with the PHPD at all regarding MOVE or the explosives I had dropped off to them. Neither were ever alluded to. I had conversations with the Bomb Disposal Unit regarding the upcoming May 13, 1985 school in Pomona, New Jersey but neither MOVE nor the explosives I dropped off were mentioned.

The May 9, 1985 meeting is fully described in the Interview Report Form (FD-302) dated 8/16/85 concerning it. It is true, correct and complete. No C-4 or any other explosives except shaped charges were referred to at the meeting.

Between May 9 and May 13, I had no contact with the PHPD regarding MOVE or the explosives I had provided to the PHPD.

On May 13, 1985, a Regional Bomb Technicians Seminar was held at Pomona, NJ. A dozen police departments were scheduled to be represented. This included four officers from the PHPD. None came 5/13/85. May 14, 1985

[REDACTED] of the PHPD Bomb Squad attended. May 15, 1985 [REDACTED] attended. On the last two days only [REDACTED] and [REDACTED] attended. Officer [REDACTED] had been scheduled but he had hyperventilated during the MOVE incident and never attended.

b6
b7C

During this school May 13, 1985 to May 17, 1985 MOVE was discussed. It was brought up in general terms. It was spoken of as a great tragedy and questions concerning injury to persons were asked. No details regarding tactics or explosives were asked or discussed.

On May 14, 1985, I gave two tubes of TOVEX to the PHPD Bomb Squad members in attendance. They did not ask for it, but from reading the newspaper I gave it to them thinking they would need it to recreate the explosive device used at MOVE. These were the last two tubes of TOVEX we had and were the only explosives I handed out at the school. The military man in charge of explosives for the school was very tight with them. He only handed out a limited amount to the instructors and we were short ourselves. [REDACTED] did not participate in this school.

b6
b7C

Continuation of FD-302 of [redacted]

, On 11/16/85 , Page 6

b6
b7C

From May 17, 1985 when the school ended until now I have had contacts with PHPD officers regarding MOVE. In the NYROB case explosives were recovered May 24, 1985. From then through June 1 or 2, 1985, I had a great deal of contact with the Bomb Disposal Unit. I was inventorying the explosives and handling their disposal. Sometime during this period I asked Lieutenant [redacted] what had happened to the explosives I had given to his unit. [redacted] told me: "Don't worry. That was gone a long time ago." No one else was there to hear the conversation. It was short in duration. Lt. [redacted] did not elaborate as to how the explosives had been disposed of. He conveyed to me the impression they had long since been used up. He did not mention it in any context with MOVE. I did not question him any further about it.

b6
b7C

From May 30 until now, I have had three or four casual contacts with PHPD Bomb Squad members regarding MOVE. I knew they were being interviewed by the MOVE Commission and had retained attorneys. Therefore, the conversations were general. Tactics, specifics and the explosives I had furnished were not mentioned at all.

There have been no contacts since and including May 13, 1985 when the PHPD asked me for explosives. I furnished them explosives from Quantico, VA, in 1980 or 1981 as mentioned earlier (blasting caps), January, 1985 (the box of explosives) and in early June, 1985 when I was ordered by the court to dispose of the explosives seized in the NYROB case. Seventy five percent of those NYROB explosives were unusable and, therefore, destroyed. Twenty five percent were usable and were given to the PHPD to dispose of as they saw fit. I turned these over to PHPD Bomb Disposal Unit Commander [redacted] and documented it. These explosives were TOVEX, detonating cord and electric blasting caps. These are the only occasions I ever gave explosives to the PHPD except as residue at a school I was teaching. I would not give explosives ever to anyone unless he had been trained in their handling at the Redstone Arsenal and had proper storage facilities. At schools this residue is given to police officers who then put it in their personal cars and drive away with it. This has been the practice so long as I have been teaching bomb schools. I go to three to four bomb schools per year. Normally there is less than a full box of residue. The schools to which

b6
b7C

Continuation of FD-302 of [redacted]

11/6/85

7

, On [redacted], Page [redacted]

b6
b7C

Bureau instructors can drive from Quantico, VA usually have residue. The residue varies from fifty pounds on down. In the May, 1984 and May, 1985 schools at Pomona, NJ there was no residue that I recall.

January, 1985 I had planned to obtain C-4 for PHPD and Allentown PD. I did not give Allentown PD any because the 30 blocks I had obtained were not that many and were not enough to split.

When I was questioned by the MOVE Commission it was obvious they did not understand explosive use or the terms concerning explosive use. I recommended they hire an independent expert. One of the persons I recommended was [redacted] whom they later selected. Two or three weeks later, the day [redacted] hiring was announced, I contacted [redacted] of the PHPD Bomb Disposal Unit when I saw him stopped at a red light at 5th and Market Streets in a PHPD vehicle. I asked how [redacted] was. He said he was going to pick [redacted] up at the Police Administration Building (PAB). I asked to go along with him to see [redacted] and tell him I had recommended [redacted] retention. We were sitting in the parking lot waiting for [redacted] and conversing when [redacted] asked me: "Is it all right with you, if that stuff is still around because I think I saw it up there (at the Bomb Disposal area of the PHPD range)." I was shocked and angry because I had been told the explosives to which [redacted] was referring had been long since used up and I had kept quiet about them. [redacted] could see that his question had greatly disconcerted me. We left the PAB lot and drove to a payphone. [redacted] made a call while I waited in his vehicle. He then came back and said, "Don't worry. It's long gone." I never did see Lt. [redacted] but at that time I exited the vehicle and went about my business. MOVE was never mentioned, just the explosives.

b6
b7C

That evening I telephoned Lt. [redacted] at his home. I told Lt. [redacted] about [redacted] I asked Lt. [redacted] if he had talked to [redacted] told me he had. I told Lt. [redacted] "If that stuff is still around, I can't stand the heat. It was supposed to have been gone." [redacted] "Don't worry. It was gone a long time ago." We had no other conversation.

b6
b7C

Continuation of FD-302 of [REDACTED], On 11/6/85, Page 8

After the letter to the MOVE Commission regarding the C-4 in October, 1985, [REDACTED] called me and said he was sorry to hear I was having problems concerning [REDACTED]. I expressed similar concerns to him. It was a personal call to me at home. No mention of MOVE tactics was made.

b6
b7C

I did not attend a meeting May 8th with PHPD officers with other FBI personnel or any other time except the May 9th meeting.

I tried on January 18, 1985 to give the PHPD Bomb Disposal Unit the explosives they needed based on my perception in May, 1984 that they needed C-4 to handle their Bomb Disposal mission. I knew and taught that it was the best material for their use. I knew they did not have it and could not get it.

During the afternoon and evening hours of 11/6/85, I have participated in the preparation of a signed sworn statement relating the facts surrounding my involvement in the MOVE incident. As I reread the statement, I realize that is very difficult to completely understand the process involved in teaching police officers in bomb disposal schools and it may be difficult to understand how I could diagnose and attempt to fill a need for a particular explosive. I only ask that anyone who considers this statement realize that I believed and believe now that C-4 is an important tool in the inventory of a bomb disposal officer. I saw a need at Philadelphia and attempted to satisfy it, hoping to at least help a policeman do his job better and, at most, maybe to save a life. I gave this material to them to use in bomb disposal work, with no consideration whatsoever to MOVE or any other non-bomb disposal activity. I believed that what I did was within the normal function of the FBI's explosives program and I wish to state that what I did was done, not with any personal gain in mind, but in an effort to help some policemen do their jobs.

I have read this statement consisting of this and 17 other pages. I sign it because it is true and correct and complete to the best of my recollection.

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 10/28/85

On October 28, 1985, the writer assumed custody of certain explosives that were being stored in one of the explosives bunkers located at the PHILADELPHIA POLICE ACADEMY. Accompanying the writer was [redacted] Investigator, PHILADELPHIA SPECIAL INVESTIGATION COMMISSION, and [redacted] Photographic Technician, FEDERAL BUREAU OF INVESTIGATION, (FBI).

b6
b7C

Prior to appearing at the PHILADELPHIA POLICE ACADEMY, the writer had a telephone conversation with Officer [redacted] of the PHILADELPHIA POLICE DEPARTMENT BOMB DISPOSAL UNIT, (PPDBDU). [redacted] was advised that the writer wished to assume custody of all remnants of explosives furnished the PPDBDU in the past, by representatives of the FBI, specifically to include composition 4 (C-4) and TNT. [redacted] advised that the request would be honored. Another telephone conversation took place with PPDBDU Officer [redacted]. He was informed that the writer wanted to obtain the remainder of all C-4 and TNT furnished to the PPDBDU by FBI Agent [redacted]. [redacted] advised that the entire quantity of explosives was in a single box marked "FBI" in an explosives bunker.

b6
b7C

Officer [redacted] met the writer, [redacted] and [redacted] at the PPDBDU office at the PHILADELPHIA POLICE ACADEMY. Officer [redacted] accompanied [redacted] and the writer to the explosives bunker area. [redacted] unlocked the larger of the two bunkers and pointed out a cardboard box marked "FBI" and displayed its contents, C-4 and TNT. All four individuals transported the box and its contents to the "K-9" Dog Training area. The lid of the box was removed and the as yet uncounted blocks of TNT were put in it. The bottom portion of the box containing the C-4 was weighed on the scale. Prior to weighing the C-4, [redacted] commented that he was present when the quantity was weighed on the same scale of Friday, October 25, 1985, at which time it was found to weigh 31½ pounds. The writer read the scale and it indicated the entire quantity of C-4 in the lidless box weighed 32½ pounds. [redacted] was asked to read the scale and he agreed it indicated 32½ pounds. He commented that the box had gained a pound since the last weighing.

b6
b7C

The C-4 and TNT was then taken outside the "K-9" office area and further examined. It was determined that the quantity of C-4 consisted of 46 pieces of C-4 which were approximately equal in

Investigation on 10/28/85 at Philadelphia, Pa. File # Philadelphia 44A-4393-71

size to one half of a 1½ pound block of C-4. The pieces were individually contained in clear plastic bags. There were also seven small pieces of C-4, six of which were individually contained in plastic bags. [] photographed the entire quantity of C-4.

[] stated he agreed there were 46 larger pieces of C-4 and seven smaller ones. The TNT was examined and found to consist of 24 one-quarter pound sticks of TNT and a single one pound block of TNT. All of the TNT was in the original cardboard tube containers with metal end caps intact. [] stated that he agreed there were 24 one-quarter pound sticks and a single one pound block of TNT.

[] photographed the entire quantity of TNT. He also photographed the entire quantity of C-4 and TNT combined. [] then accompanied the writer as he transported the explosives from the PHILADELPHIA POLICE ACADEMY. [] was discharged from the FBI vehicle at 16th and Market Street and the writer and [] returned to the Philadelphia FBI Office.

b6
b7C

At the FBI Office, the writer and Assistant Special Agent in Charge [] reweighed the C-4. A reading of 32 pounds was obtained for the lidless box of C-4. The lidless box was weighed and it registered 1½ pounds. The wrapped C-4 alone was weighed and equalled 30 ¾ pounds. The writer retained custody of the explosives.

Philadelphia, Pennsylvania 19106

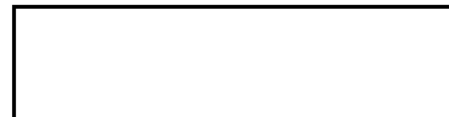

Dear Mr. Davis:

This office is presently conducting an investigation of the MOVE confrontation that occurred on May 13, 1985.

During our inquiry several technical questions have arisen pertaining to fire and explosive issues. Since the F.B.I. employs persons who are recognized experts in these fields, we would like to have the opportunity to discuss our concerns with them.

Your assistance in helping us identify and communicate with those experts will be sincerely appreciated. I look forward to your advise.

Very truly yours,

Deputy District Attorney
Investigations Division

SUBJECT: DISTRICT ATTORNEY'S OFFICE
PHILADELPHIA, PA.
INVESTIGATION OF THE MOVE
CONFRONTATION, MAY 13, 1985

Enclosed is the original of a letter dated November 13, 1985, from [redacted] Deputy District Attorney, Investigations Division, Philadelphia, Pa. District Attorney's Office, which requests the identity and means of communication with persons in our employ knowledgeable in fire and explosives issues. Enclosed also is response of Philadelphia SAC WAYNE G. DAVIS dated 11/20/85.

b6
b7c

For the information of the FBI Laboratory, the assistance of the Bomb Data Center was made available to a limited degree, that of furnishing information on our role and nature of training, to the Philadelphia Special Investigation Commission, a non-law enforcement body appointed by Philadelphia Mayor Wilson Goode to look into the MOVE confrontation.

It is the understanding of SAC, Philadelphia, that the District Attorney's Office is conducting an investigation from a criminal standpoint into the same incident.

November 25, 1985

The Honorable Edwin Meese, III
United States Attorney General
Room 5111
Main Justice Building
10th at Constitution Avenue, NW
Washington, DC 20530

Dear Mr. Attorney General,

I write you today because of my mounting concern that a thorough and expeditious investigation must be undertaken into the reports that an agent of the Federal Bureau of Investigation (FBI) allegedly delivered a quantity of C-4 explosives to the Philadelphia Police Department in apparent violation of bureau regulations.

I am shocked and perplexed that an FBI agent could commit such an act without supervisory approval. In fact the source of the C-4 would have remained a secret had it not been discovered in the aftermath of the probe into the catastrophic fire at the MOVE compound May 13 which destroyed 61 homes and killed eleven persons.

Since I first condemned the bombing of the MOVE compound, I have been deeply concerned about the origin of the C-4. Local police officials have stated repeatedly that they did not possess such high grade explosives. Now we have learned from the hearings of the Philadelphia Special Investigation Commission that untrained police personnel had employed one of this country's most deadly military-grade explosives in a residential neighborhood.

If it is true that the FBI was the source of the C-4, it raises the still more disturbing question of what other items from the Federal arsenal might be in the hands of the local police.

Mr. Attorney General, I am sure that you agree with me that Philadelphians have a right to know if any federal laws were violated by the transfer of the C-4. I'm also sure you agree that Federal agencies which may be asked to assist a local police department during an emergency are expected to abide by the same rules and regulations that govern their conduct during the normal execution of their assigned duties.

Finally, a thorough explanation of the Federal role in this matter undoubtedly will help the city and the members of the Philadelphia Special Investigation Commission who are trying to unravel the incidents which contributed to the Osage Avenue tragedy.

Thank you for your consideration of this most vital issue confronting my city and my district.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Will H. Gray', with a stylized flourish at the end.

William H. Gray, III
Member of Congress

Gray Calls for U.S. Probe Of FBI-Supplied Explosive

Washington, D.C. -- U.S. Rep. William H. Gray, III (D.-Pa.) today called on the U.S. Attorney General to conduct a "thorough and expeditious investigation" into reports that an FBI agent supplied an unauthorized quantity of C-4 explosive to the Philadelphia Police Department.

Gray said in a letter to Attorney General Edwin Meese that he was "shocked and perplexed that an FBI agent apparently could commit such an act without supervisory approval." Gray stated:

"It is incumbent upon the highest officials of the U.S. Department of Justice to make full disclosure of this entire matter.

"Since I first condemned the May 13th police bombing of the MOVE compound, I have been deeply concerned about the origin of the C-4. Local police officials have stated repeatedly that they did not possess such high grade explosives. Now we have learned from the hearings of the Philadelphia Special Investigation Commission that untrained police personnel had employed one of this country's most deadly military-grade explosives in a residential neighborhood.

MORE

Gray/Ist add

"If it is true that the FBI was the source of the C-4, it raises the still more disturbing question of what other items from the Federal arsenal might be in the hands of the local police," Gray added.

The Congressman, whose Second Congressional District includes the Osage Ave. area that was inhabited by MOVE and destroyed by the May 13th fire, first condemned the use of a bomb in a June 14th letter to the Chairman of the Philadelphia Special Investigation Commission.

Gray explained that he wrote the Attorney General because he believes that Philadelphians have a right to know if any federal laws were violated by the transfer of the C-4.

"Federal agencies that may be asked to assist a local police department during an emergency should be expected to abide by the same rules and regulations that govern their conduct during the normal execution of their assigned duties," Gray stated.

Gray also explained that he had written to Meese because he feels that a thorough explanation of the federal role in the MOVE matter would help the city and Commission members who are trying to unravel the steps that contributed to the Osage Ave. catastrophe.

ON DECEMBER 4, 1985, A MEETING WAS HELD AT THE OFFICE OF
U.S. ATTORNEY EDWARD S. G. DENNIS, EDPA, AND INCLUDING DENNIS,
THE FOLLOWING WERE IN ATTENDANCE: ACTING CHIEF ASSISTANT [REDACTED]

[REDACTED] DEPARTMENTAL ATTORNEYS [REDACTED] AND
DEPUTY CHIEF, CRIMINAL SECTION, CIVIL RIGHTS DIVISION, [REDACTED]

[REDACTED] FBIHQ SUPERVISOR [REDACTED] PHILADELPHIA ASAC

[REDACTED] SUPERVISOR [REDACTED] AND CASE AGENT

[REDACTED] THIS MEETING CONCERNED INVESTIGATIVE AND
PROSECUTIVE MATTERS INVOLVING THE CIVIL RIGHTS INVESTIGATION OF
CAPTIONED MATTER.

USA DENNIS BEGAN THE MEETING BY STATING HE HAD BEEN ADVISED

44-4393-79 b6 b7C

PAGE TWO, PH 44A-4393, U N C L A S

BY ASSISTANT ATTORNEY GENERAL WILLIAM BRADFORD REYNOLDS THAT THE OFFICE OF THE USA, EDPA, WAS TAINTED WITH REGARD TO INVESTIGATION AND PROSECUTION IN THIS MATTER INASMUCH AS THERE HAD BEEN REPRESENTATION BY THAT OFFICE OF PHILADELPHIA FBI AGENTS SUBSTANTIVELY INVOLVED IN THE MOVE INVESTIGATION. ADDITIONALLY, DENNIS INDICATED THAT THE GARITY V. NEW JERSEY (385 U.S.493(1967)) LEGAL DECISION FURTHER TAINTED HIS OFFICE FROM ACTIVELY PARTICIPATING. DENNIS ADVISED, THEREFORE, THAT THE EDPA USA'S OFFICE IS WITHDRAWING FROM ANY ACTIVE INVOLVEMENT IN THE MOVE INVESTIGATION AND ANY SUBSEQUENT PROSECUTION. DENNIS ALSO ADVISED THAT IT WAS HIS OPINION THAT THE PHILADELPHIA DIVISION OF THE FBI IS ALSO TAINTED FACTUALLY AND FROM A STANDPOINT OF PERCEPTION BECAUSE OF THE FOLLOWING:

1. EXTENSIVE LOCAL TELEVISION COVERAGE REGARDING THE MOVE INCIDENT AND ORGANIZATION;
2. EXTENSIVE PRESS AND ELECTRONIC MEDIA COVERAGE OF THE HEARINGS CONDUCTED BY THE PHILADELPHIA SPECIAL INVESTIGATION PAREN MOVE END PAREN COMMISSION;
3. INVOLVEMENT AND INTERACTION OF PHILADELPHIA FBI OFFICIALS WITH MEMBERS OF THE MOVE COMMISSION'S STAFF;
4. INVOLVEMENT OF AGENT OF THE PHILADELPHIA OFFICE WITH THE FURNISHING OF C-4 EXPLOSIVE TO THE

PAGE THREE, PH 44A-4393, U N C L A S

PHILADELPHIA POLICE DEPARTMENT; 5. THE ISSUE OF AGENTS OF THE PHILADELPHIA OFFICE HAVING BEEN PRESENT AT MEETINGS OF THE PHILADELPHIA POLICE DEPARTMENT AND HAVING BEEN CONTACTED BY OFFICERS OF THE PHILADELPHIA POLICE DEPARTMENT WITH REGARD TO RAID/ASSAULT PLANS.

SAC, PHILADELPHIA, WAS NOT PRESENT AT THE MEETING DUE TO OFFICIAL BUSINESS IN HARRISBURG BUT UPON REVIEW OF THE AFOREMENTIONED AREAS DOES CONCUR THAT QUESTIONS OF OBJECTIVITY ~~AND~~ AND UNDOUBTEDLY WOULD BE SURFACED AND VERY PROBABLY ERRONEOUS PERCEPTIONS, BUT PERCEPTIONS NEVERTHELESS, COULD BE DERIVED.

ADDITIONALLY, ASAC [] ADVISED THOSE IN ATTENDANCE AT THE MEETING THAT PHILADELPHIA SPECIAL INVESTIGATION COMMISSION [] [] EDPA, RECENTLY ADDRESSED ALL PHILADELPHIA DIVISION AGENT PERSONNEL AT THE ANNUAL AGENTS CONFERENCES ON PARTICULARS OF THE COMMISSION'S INVESTIGATION.

[] ADVISED THAT HE CONCURRED WITH THE POSITIONS OF USA DENNIS AND ASAC [] AND INDICATED THAT THERE WERE ATTORNEYS ASSIGNED TO THE DEPARTMENT WHO ARE TAINTED WITH REGARD TO THIS INVESTIGATION BECAUSE OF THE GARTY DECISION AND THAT BECAUSE OF THIS, SPECIFIC ATTORNEYS HAVING NO PRIOR KNOWLEDGE OF

b6
b7c

b6
b7c

PAGE FOUR, PH 44A-4393, U N C L A S

PREVIOUSLY SUBMITTED REPORTS AND OTHER DOCUMENTARY EVIDENCE HAVE BEEN DESIGNATED AT THE DEPARTMENT TO HANDLE THE RESULTANT CIVIL RIGHTS INVESTIGATION.

USA DENNIS FURTHER ADVISED THAT ON DECEMBER 3, 1985, HE INTENDED TO MAKE A PRESS RELEASE TO MEMBERS OF THE PHILADELPHIA MEDIA CORPS THAT HIS OFFICE IS WITHDRAWING FROM ANY ACTIVE PARTICIPATION AND WOULD NOT BE RENDERING INVESTIGATIVE OR PROSECUTIVE OPINIONS/DECISIONS IN THIS MATTER.

THE ATTENTION OF FBIHQ IS INVITED TO THE FACT THAT THE DEPARTMENT OF JUSTICE IS ANXIOUS AND APPARENTLY READY TO MOVE AHEAD AT THIS TIME ON THIS INVESTIGATION, HAVING ASSIGNED TWO TEAMS OF DEPARTMENTAL ATTORNEYS TO WORK WITH WHATEVER FBI PERSONNEL ARE ASSIGNED TO THIS INVESTIGATION. ATTENTION OF FBIHQ IS ALSO INVITED TO THE FACT THAT FOR THE PAST THREE YEARS THE PHILADELPHIA DIVISION HAS BEEN CONDUCTING EXTENSIVE CORRUPTION OF PUBLIC OFFICIALS INVESTIGATIONS INVOLVING THE PHILADELPHIA POLICE DEPARTMENT WHICH FACT HAS STRAINED RELATIONSHIPS BETWEEN THAT DEPARTMENT AND THE FBI. CIVIL RIGHTS INVESTIGATIONS BY THEIR NATURE WILL UNDOUBTEDLY FURTHER STRAIN THESE RELATIONSHIPS.

SAC, PHILADELPHIA, OPINES THAT IF THIS DIVISION IS OBLIGED

PAGE FIVE, PH 44A-4393, U N C L A S

TO CONDUCT THE CIVIL RIGHTS INVESTIGATION IN CONNECTION WITH CAPTIONED MATTR, DIFFICULT QUESTIONS CONCERNING THE OBJECTIVITY WITH WHICH THE INVESTIGATION IS BEING PURSUED WOULD UNDOUBTEDLY SURFACE AND A PUBLIC PERCEPTION RESULT THAT WE SHOULD NOT AND CANNOT CONDUCT A REVIEW OF A MATTER IN WHICH MEMBERS OF THIS OFFICE HAVE BEEN SUBSTANTIVELY INVOLVED. FURTHER, BECAUSE OF THE GARTY ISSUE, EVENTUAL PROSECUTION OF THIS MATTER, IF ANY, WITH REGARD TO CIVIL RIGHTS VIOLATIONS, COULD WELL BE NEGATED.

SAC, PHILADELPHIA, PRESENTS FOR THE CONSIDERATION OF FBIHQ THE OPTION OF ASSIGNING FOUR AGENTS FROM OTHE DIVISIONS EXPERIENCED IN CIVIL RIGHTS INVESTIGATIONS TO BE SUPERVISED IN THIS MATTER BY A SUPERVISOR, ASAC, OR INSPECTOR NOT ASSIGNED TO THE PHILADELPHIA DIVISION. A DECISION ON THIS MATTER IS REQUESTED AS SOON AS POSSIBLE IN VIEW OF THE LIKELIHOOD OF INQUIRIES OF THIS OFFICE BY THE MEDIA ONCE USA DENNIS MAKES HIS RELEASE.

I was happy to hear that the U.S. Justice Department has decided to investigate the Move Siege.

Some of the questions that should be asked I think are:

Should the city government have the right to:

- 1 Deliberately murder men, women and children?
- 2 To use excessive force and brutality in carrying out the law?
- 3 To fire 1,000 rounds of ammunition into a building because some emotionally disturbed person fires a gun out of a window?
- 4 To send other people to jail for thirty years because they happen to be in the building?
- 5 To continue to pick on and brutalize one group of people?
- 6 For the justice department to turn its back on the entire situation as though nothing has happened?

Is this Natzie Germany?

What has happened to the constitution and who is seeing to it that it isn't being violated?

Yours truly,

[Redacted]
